

## **Appendix D – Summary of Public Participation**

Page intentionally blank

## Kingston Ash Recovery – Proposed Recreation Areas

### Summary of Public Participation

#### **Analysis of Comments**

During the draft environmental assessment (EA) public comment period, TVA received 48 comment submissions from 43 commenters, and one petition with 382 signatures. TVA carefully reviewed all comment submissions and identified the specific comments about the draft EA in each of them. Using qualitative methodology, all public comments were compiled and analyzed to identify the range of issues and concerns. Each comment was categorized by its major issue, and comments were sorted by themes.

Seven predominant issues were identified from all the comments provided. These included the following:

- land use, including suggested recreation uses for TVA property
- terrestrial and avian resources – shorebirds and loss of shorebird habitat
- impacts to the local economy
- adequacy of the NEPA document
- traffic flow
- public involvement
- site location

Of these, most comments concerned specific suggestions for recreation land uses not included in the draft EA, or involved requests for TVA to restore lost shoreline and shorebird habitat in the recreation plan. Comments to the substantive comments are included in the Comment Response Report further below in Appendix D.

#### **Commenters and Comment Excerpts**

The individuals, businesses, organizations, and agencies and excerpts from their comment letters the draft EA are listed in the Comment Letters Report in Appendix D. The entire comment letters, e-mails, facsimiles, and transcripts of verbal statements have been included in the administrative record.

#### **Petition**

TVA received a petition with 382 signatures concerning shorebird habitat that was impacted by the 2008 ash spill event. The petition and all of the signatures are included in Appendix D.

#### **Agency Correspondence**

TVA received one comment letter on the draft EA from the Tennessee Department of Environment and Conservation, and one consultation letter from the Tennessee State Historic Preservation Officer prior to the completion of the draft EA. These two letters are included in Appendix D.

## Comment Response Report – KIF Recovery Recreation Draft Environmental Assessment

The following comment statements and comment responses have been provided by TVA in response to comments provided to TVA during the public comment period from August 1 through September 16, 2011. The comment responses are arranged by common topics and issues. Comments and comment excerpts are included following the comment responses.

### **Topic/Issue: Land Use – Suggestions for additional recreation uses**

**Comment Statement:** I (we) think TVA should consider additional recreation land uses not described in the draft EA.

A summary of suggestions for potential land uses for the property acquired since the ash spill are listed below. Actual comments or excerpts of comments are included in the Comment Letters Report.

- youth football field with practice areas
- dog park
- bike trails
- skateboard park
- disc golf course
- children's playground
- camping area
- indoor pool
- allow space for a radio control airfield/runway
- specific requests for the naming of a walking trail, nature area, or ball fields
- replace wildlife management area removed by the gypsum pond
- facility for the fire department
- facility for community gatherings
- suggestions for additional parking and service buildings at ball fields
- suggestions for management and operation agreements of the ball fields

**Response:** TVA is in the process of developing a master plan for the proposed recreation areas and all of these suggestions will be provided to designers and decision makers for consideration in the final Master Plan. The final Master Plan will be made available to the public upon its completion.

### **Topic/Issue: Land Use – In support of proposed land uses**

**Comment Statement:** I (we) support TVA's planned use of the property.

**Response:** Comments reviewed and noted. TVA appreciates the positive feedback from the public.

### **Topic/Issue: Land Use – Not in support of proposed land uses**

**Comment Statement:** I (we) do not support TVA's planned use of the property.

**Response:** Comments reviewed and noted. TVA will continue to collaborate with Roane County and other stakeholders to develop and implement a recreation plan to restore/improve the area impacted by the 2008 ash spill event.

**Summary:** The park itself sounds beautiful. But it will be difficult to bulldoze all those houses while leaving the trees etc. that make the area so appealing. The plan apparently is to 'bulldoze them' (the Lakeshore homes) into dumpsters, to clear the land and create the park. It's very environmentally irresponsible, too, not to salvage everything possible from the homes, and to dispose of the remaining rubble in a sustainable fashion.

**Response:** Some of the homes are being removed because they do not meet current county and state habitation codes. On others, TVA removed many items that can be reused in homes it is still maintaining. With whatever is remaining, TVA is letting the contractor determine if there are salvageable items and what the dispensation of those items will be. In terms of disposal, TVA is complying with all environmental laws and is separating waste for disposal based on the type of waste it is and where that waste needs to be disposed of.

**Summary:** While I love the use to which the Gupton farm is being put, I don't think there is a need for the second park on Lakeshore Drive. This second park creates several concerns. - I've heard (granted, second or third hand) that at least one family is 'desperate' to buy back their home (which TVA initially stated in public, and I thought that was in the official transfer of property). But I hear they've been denied. If true, this is totally unacceptable to me. TVA should honor their original promises, or give the public a viable reason why they changed their minds.

**Response:** TVA attended a scoping meeting with the community to find out their wishes for the property. TVA's conceptual information presented at the August 2011 public meeting reflected many of the community's ideas. The development of the former Gupton property and the Lakeshore property will result in two very different kinds of areas. The Lakeshore property will be more recreational - fishing, boating, picnic area, and walking trails, while the Gupton property will be walking trails for birding, wetland, and water habitat viewing.

When purchasing property from homeowners, TVA agreed that should the property be declared "surplus" within 5 years of the date of the sale, the former owner would have a right of first refusal to purchase the property back. However, TVA is not declaring the property "surplus," so the property will not be offered back for sale.

### **Topic/Issue: Terrestrial and Avian Resources – Shorebirds and loss of shorebird habitat**

**Comment Statement:** I (we) believe TVA should replace/restore lost shorebird habitat due to the ash spill event.

Actual comments or excerpts of comments are included in the Comment Letters Report. Suggestions for shorebird and shoreline restoration improvements include:

- restore (or mitigate for) impacted wetlands
- restore original shoreline habitat to provide foraging areas for migrating shorebirds comparable to what existed before the ash spill

- a link to the Tennessee Ornithological Society Website showing photos of the shorebird habitat previously available to shorebirds prior to the ash spill was provided
- include educational signage near picnic areas and ball fields
- leave the existing dike (berm) in the in the Berkshire slough to help maintain a water level year long
- shallow ponds could be dug and the water level managed to provide feeding opportunities for shorebirds passing through Tennessee during their migration
- re-plant with all native plant and tree species; native warm season grasses are readily available

**Response:** TVA appreciates all of the feedback from the birding community. TVA is in the process of developing a Master Plan for the proposed recreation areas that will include restoration to wetlands, shoreline, and shorebird habitat. A team of recreation experts and biologists are consulting with the design firm to ensure proper consideration of natural resources, such as wetlands and shorebird habitat restoration, are included in the plan. These suggestions will be provided to plan designers and decision makers for consideration in the final Master Plan. The final Master Plan will be made available to the public upon its completion.

### **Topic/Issue: Economic Impacts – Tax revenues**

**Comment Statement:** I (we) have concerns regarding economic impacts.

**Summary:** Neither the draft Recreation Areas EA nor the final Kingston Fossil Plant Structure Razing EA discusses how TVA intends to mitigate the impact left from removing these properties from the county's tax rolls (an impact of nearly \$250,000 per year) and how it will ensure that the county is not adversely impacted by their removal from the tax rolls. I know TVA has provided some 'in lieu of taxes' support for projects that otherwise would not have been done.

**Response:** Many of the former residents of the impacted area have moved to other locations in Roane County, generally offsetting the property tax losses associated with their former residence. There may be others who have temporarily located outside the county, but who will eventually move back into the county. As a result, the impact on local tax revenues is reduced considerably. In addition, the changes that are being made in the use and appearance of the affected areas will improve the view of some residents of nearby areas. These visual improvements, along with enhanced recreation opportunities, would likely increase the value of nearby homes.

TVA has built additional assets on the newly acquired property surrounding KIF, thereby increasing the tax equivalent payments TVA makes to the state and Roane County under Section 13 of the TVA Act. Furthermore, TVA funded a \$43 million Foundation, of which \$32 million went to school projects, enabling Roane County to avoid a property tax increase. TVA's enhancements to the Swan Pond community also included \$4 million in utility enhancements, in addition to restoration of utility lines affected by the spill. These actions, including the green space and recreational enhancements, more than offset any short-term negative impacts on local government revenues. In the longer term, TVA will continue tax equivalent payments to Roane County as required by the TVA Act, and the increased attractiveness of the area around KIF will contribute to growth in the immediate and surrounding areas, thereby adding to the local tax base.

### **Topic/Issue: NEPA Adequacy – More information needed**

**Comment Statement:** I (we) do not think the draft EA adequately addresses all resource issues.

*Summary:* TVA has not presented a plan that addresses how they intend to use the total property TVA acquired as a result of the Ash Spill. TVA's EA should contain a discussion of all of the properties and what it intends to do with those properties.

**Response:** TVA does not have plans for all of the property acquired as a result of the ash spill, but has made plans available to the public as they are developed. TVA is preparing appropriate NEPA environmental reviews as the projects are developed. Development of a Recreation Master Plan is underway and will be available to the public upon finalization. A strategy for the Emory River Road property will not be developed until the cleanup is complete. However, if TVA devises a plan other than residential for the Emory River Road properties, the NEPA process will be followed, including public involvement.

*Summary:* TVA's earlier EA, *Kingston Fossil Plant Structure Razing*, does not address or discuss how TVA intends to utilize the acquired properties.

**Response:** As described in the final environmental assessment (FEA), TVA determined that some of the structures on the property need to be removed to meet TVA business needs and to expand the buffer surrounding the KIF Reservation boundary. TVA identified structures as needing to be removed because of building code requirements, TVA needs, habitability issues, or for buffer requirements.

At the time of *Kingston Fossil Plant Structure Razing* publication (June 2011), TVA indicated its plans to retain some of these properties as permanent extensions to the existing plant boundary and the FEA indicated that TVA is continuing to evaluate potential uses for these sites. The *Kingston Fossil Plant Recreation EA* involves the evaluation of potential uses for these sites.

*Summary:* TVA appears to be segmenting its NEPA compliance documents to avoid addressing the total potential environmental impact.

**Response:** TVA is preparing NEPA compliance documents as the projects are developed and sharing the documents with the public. The structure razing EA's actions were independent of the proposed recreation areas because the structures would be removed whether or not the proposed recreation areas were constructed and TVA's Recreation EA tiers from the Structure Razing EA.

### **Topic/Issue: Transportation – Suggestions to improve traffic flow**

**Comment Statement:** I (we) would like to see roadway improvements in improve traffic flow.

**Response:** TVA will defer to Roane County to determine road impacts based on the type of ball fields that are installed (e.g., tournament, recreation, etc.), and make roadway modifications if warranted.

### **Topic/Issue: Public Involvement –Comment period**

**Comment Statement:** I (we) request a 30-day extension of the draft EA comment period.

**Response:** TVA extended the public comment period on the draft EA from 30 days, ending August 30, 2011 to 46 days, ending September 16, 2011. Eight commenters provided responses after August 30.

### **Topic/Issue: Public Involvement – Need for more opportunities**

**Comment Statement:** I (we) believe there was not enough public involvement opportunities.

**Response:** Roane County held a public scoping meeting on September 21, 2010, and TVA held a public meeting August 2, 2011. Additionally, TVA accepted comments following the release of the draft EA and extended the draft EA public comment period from August 30 to September 16 in response to requests from the public. The plans for the ball fields are still being developed and public feedback is being used in the development of the plans.

### **Topic/Issue: Site Location – Possible negative impacts to personal property**

**Comment Statement:** I (we) have concerns regarding potential impacts because of proximity to my property.

**Summary:** Concerned with mosquitoes from wetland development.

**Response:** Although wetlands can provide habitat for mosquitoes, numerous species of mosquito-eating fish, amphibians, insects, and birds, all of which help limit mosquito populations, are found in healthy wetlands. Many mosquito species need only a small puddle or a depression in which to breed. Experts recommend the best personal protection is to reduce mosquito habitat by eliminating places where water can stagnate in containers such as buckets, flower pots, and old tires.

**Summary:** Can I still hunt deer on my property - rabbits, since it is adjacent to TVA developed area?

**Response:** The proposed recreation project would not impact your use of your private property.

**Summary:** Concerns with property flooding as a result of the new berm and proposed water levels; 100 year flood level concern with property - changes to the flood levels on property.

**Response:** TVA is uncertain at this time whether the berm will be left in place. The restoration work in that embayment (North Embayment) will be included in the master plan that is currently under development. However, should the berm be left in place, the design will incorporate the 100-year floodplain elevations.

**Summary:** Concern about being cut off by boat from the main lake channel; always had access to the main channel (17' boat).

**Response:** Prior to the ash spill event, Swan Pond embayment (North Embayment) was open to access by small watercraft through the culvert under Swan Pond Circle Road, although the upper end of this embayment was extremely shallow and limited from a recreational boating perspective.

TVA is currently working on a master plan for this embayment area. In the plan, the land use will be developed primarily around the management of migratory shorebirds and waterfowl and other wildlife resources habitats in an effort to replace shorebird and waterfowl habitats that were impacted by the ash spill. Therefore, boating access into the upper portions of this embayment may not be desirable from a habitat management and dispersed recreation use perspective.

TVA is planning to provide public recreational boat access when the Lakeshore Drive recreation area is developed and this area may include access for non-motorized boats to the North Embayment as part of the public access and interpretive activities. However, motorized boat access will be limited to research, operations and management activities in the North Embayment.

## Comment Letters Report – KIF Recovery Recreation Draft Environmental Assessment

The following comments and comment excerpts were provided to TVA during the public comment period from August 1 through September 16, 2011. The comments are arranged by topics and issues.

### Topic/Issue: Land Use – Suggestions for additional recreation uses

Anonymous

**Comment:** I feel that strong consideration should be given to naming a walking trail or nature area after the Wright Family (Wright Walking trail, Wright Wildlife area, etc...). The Wright family has done so much for the Swan Pond Community over the last 100+ years and the family tradition in caring for the Swan Pond Community carries on today with their grandson Randy Ellis.

Anonymous

**Comment:** Instead of a bird watching park a dog park facility would most likely accommodate our county better.

Anonymous

**Comment:** Dog Park

Anonymous

**Comment:** You need much more parking and room for service buildings at ball fields proposed.

Anonymous

**Comment:** Name the ball fields 'The Lindsey Marie Higgins Memorial Fields'

Anonymous

**Comment:** Bike trails! Paved or rails-to-trails style. Swan Pond is a safe place for cycling if we can get the bicycles off of the road.

Anonymous

**Comment:** The North Embankment and Gupton Farm should have a bike path around all of the property; two entrance areas, one south side and one north with parking

Anonymous

**Comment:** Many residents would appreciate a dog park. There are also young people who might appreciate a skateboard area.

Avel, Andy                      133 Osprey Way, Harriman, TN

**Comment:** 1. TVA should consider extending the current 'Birding Trail' on the former 'Gupton' property to Swan Pond Circle Road by following the existing transmission line corridor (to which TVA has an access easement. This extension should include the establishment of a trailhead with a parking lot at the intersection of Swan Pond Circle Road and the transmission line. 2. TVA should consider extending the current 'Birding Trail' on the former 'Gupton' property to the proposed 'Berkshire Recreation Area.' 3. TVA should consider connecting the current 'Birding Trail' to the proposed 'Lakeshore Green Space.' 4. TVA should consider leaving the existing dike in the 'North Embayment Wetlands' area to provide a constant level, spring fed, year-round fishing pond.

Cox, Rick	211 Little Emory Road, Harriman, TN	
-----------	-------------------------------------	--

**Comment:** In regard to the proposed recreation areas at Kingston, I'd like to see the plan revised to allow management of the ball fields by the Kingston Optimist Club and the American Youth Soccer Organization. These groups have supported and managed youth sports in Roane County for years and have a proven track record. It's my understanding most Roane County Commissioners do not support this project and I fear they will not support, manage, or sustain it. For three years, my grandson has played youth football in Kingston along with 110+ other boys and girls aged 4 thru 13. They have never had a designated practice field. Each year, and many times week to week these children are bumped from one baseball field or soccer field to another as other sports are given priority. A youth football field with practice areas for the four youth teams should be incorporated into the design.

Freels, Robert	111 Edinburgh Drive, Lenoir City, TN	Tenn. Eagles Radio Control Aircraft Club
----------------	--------------------------------------	--

**Comment:** I would like to ask the committee on the ash spill project, if they would allow the Tennessee Eagles R/C Club to have a space for a radio control airfield/runway on the property being improved for community activities. We would only need about 5 or 6 acres, with an area for overfly that is not over the other facilities or people and it could be near the water. The runway would need to be around 800 ft. long by 100 ft wide. We would like this property, because, we would like the opportunity to provide more activities for the community and Roane county. If we are allowed to have some space, after the airfield is built, we would assume the responsibility of maintaining the area.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>

Gibson, Hope	119 Arrowood Lane, Harriman, TN	
--------------	---------------------------------	--

1. Include a youth football field and practice area in the design of the sports complex – The Kingston Optimist Club has long suffered for the lack of a safe open space for approximately 200 kids (between the ages of 4 and 12). They are truly in desperate need of a place to call home. Some have suggested that the soccer fields could be used as both, however the seasons run concurrently and the local AYSO program desperately needs those fields as well.
2. Make Ball Field Management Leases/Agreements directly with local Youth Athletic Organizations - The current proposal calls for the Roane County Government to be the focal point for management of the sports complex. This will not work and is doomed for failure! Local Youth Athletic Organizations could not only manage and operate the facilities at little or no cost to tax payers, but they could maintain, improve, and develop the parks with great passion and zeal! The Kingston Optimist Club (KOC) and the local American Youth Soccer Organization (AYSO) will cherish and make these fields into beautiful places for their children play. Allowing the Roane County Government to manage these ball fields would be a monumental mistake as would restrict Kingston youth organizations from being to utilize them to their full potential.
3. Limit the Roane County Government to managing the "Park Areas" only- This is far more likely to be supported by the Roane County Commission.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Miller, Jeff	950 Douglas Overlook Way, Dandridge	
<b>Comment:</b> To me, the most logical approach would be to use the land that might be affected in the future by the Kingston Plant for rec park and sell the rest of the nice homes. TVA could use the millions of dollars saved from tearing down valuable houses and fix the dilapidated Recreation Areas that it already has.		

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Perrone, Anthony	10366 Carrollwood Ln, #228, Tampa, FL	
<b>Comment:</b> I would like to recommend an indoor pool on the 32 acre recreational area to be developed.		

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Poole, Victor	1091 N. Gateway Avenue, Rockwood, TN	
<b>Comment:</b> I would like to express the sport of the future. Disc golf only needs 20 acres or so. It has been a big plus at Roane County Park. 20 or more play in a league, just on Tuesdays. Why can't we think like the person who envisioned Victor Ashe Park in Knoxville? They have softball, soccer, disc golf, and a fishing pond. Let's put an 18-hole disc golf course in on the TVA property. It is monstrous in Knoxville and other areas.		

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Scruggs, Julia	231 Arrowhead Trail, Kingston, TN	
<b>Comment:</b> I appreciate the opportunity to provide suggestions to TVA on development of the area of the ash spill. Dog parks are becoming very popular. I would like to see a fenced area where dogs could run loose and romp in the water without being constrained by a leash. This would be a good place for dogs and their owners to congregate and be away from walkers, runners, etc. who don't wish to be around dogs (and this probably includes children). It would be a great way for dogs to get exercise outside which helps make better pets. The owners would also have an incentive to get out and move and socialize. We have nice parks in the area. I would like for TVA to top them with the extra amenities that current parks and green spaces do not offer. Thanks for considering my input and for going forward to develop the area		

for all to enjoy.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Stokes, Eugene	PO Box 812, Kingston, TN	Kingston Optimist Club (KOC)

**Comment:** 1. Management and operation agreements/licensing for the ball fields should be made directly with the American Youth Soccer Organization and the Kingston Optimist Club and Not the Roane county government. 2. A youth football field with practice area needs to be incorporated into the design of the complex. Soccer and Football seasons coexist in the fall and joint use is not feasible! 3. The Roane County Government should only be allowed to manage the land and parks and NOT the athletic fields.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Willis, Cathy	Swan Pond Circle Road, Harriman, TN	

**Comment:** Please clear and remove the shrub growth along SP Circle along the Northshore slough. The area could be much improved with clean up. 3) Please add a facility for fire department. 4) Please ensure there are playgrounds for young children, a facility for community gatherings, Roane County does an excellent job of maintaining and overseeing RC Park. Why not have them take the lead in the same functions here?

**Topic/Issue: Land Use – In support of proposed land uses**

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
-----------------------	----------------	---------------------

Morgan, Joni	385 Emory River Rd., Harriman, TN	
--------------	-----------------------------------	--

**Comment:** I am delighted that TVA is responding so thoroughly to the Swan Pond residents' requests for a replacement ball field and for a new park. However, the ball fields may be more elaborate than are really appropriate for this area. Overall I have no problem with the general idea of ball fields. Just worried that the County might not be able to use them effectively because of finances. While I love the use to which the Gupton farm is being put, I don't think there is a need for the second park on Lakeshore Drive. This second park creates several concerns. - I've heard (granted, second or third hand) that at least one family is 'desperate' to buy back their home (which TVA initially stated in public, and I thought that was in the official transfer of property). But I hear they've been denied. If true, this is totally unacceptable to me. TVA should honor their original promises, or give the public a viable reason why they changed their minds.

The plan apparently is to 'bulldoze them' (the Lakeshore homes) into dumpsters, to clear the land and create the park. The park itself sounds beautiful. But it will be difficult to bulldoze all those houses while leaving the trees etc. that make the area so appealing. It's very environmentally irresponsible, too, not to salvage everything possible from the homes, and to dispose of the remaining rubble in a sustainable fashion.

I do not look forward to an extensive 'park' all along the river across from my house, bring all sorts of people in who will party loud and long and leave lots of trash.

**Topic/Issue: Terrestrial and Avian Resources – Shorebirds and loss of shorebird habitat**

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
-----------------------	----------------	---------------------

Beachy, Tiffany		
-----------------	--	--

**Comment:** As a wildlife biologist and avid birdwatcher, I am aware of the devastating impacts that the ash spill had on the local flora and fauna. It is only fitting that steps are taken to restore the affected habitat to its previous condition. I request that all impacted wetlands are restored or mitigated, and that the original shoreline be restored to provide foraging areas for migrating shorebirds. I am not opposed to a certain level of recreational development, but I believe that the majority of the restoration needs to go toward the wildlife and their habitats. There is great opportunity to establish nature and birding trails, educational signs, etc, alongside picnic areas and playing fields

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Blane, Deedee	1104 Sharon Rd, Knoxville, TN	Knoxville Chapter Tennessee Ornithological Society

**Comment:** It has been brought to my attention that the draft environmental assessment of TVA's proposal to develop public recreational areas near Kingston Fossil Plant does not address the important issue of replacing shoreline which was lost by the 2008 ash spill. Replacing this shoreline is critical for the shore birds who used the shoreline before the accident.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Cantwell, Billie	1613 Cove Creek Lane, Knoxville, TN	Knoxville Chapter Tennessee

Ornithological Society

**Comment:** Please consider replacing the shore line that drew so many shore birds to the plant. This was a big draw for birders and is a must for the shore birds.

<b>Commenter Name</b>	<b>Address</b>	<b>Type</b>
Cantwell, Billie	1613 Cove Creek Lane, Knoxville, TN	<b>Petition</b>

**Comment:** We the <382> undersigned appreciate your proposal to develop public recreation areas near Kingston Steam Plant. The recreation areas would restore and enhance the community that was hurt by the ash spill in December 2008. However, this area was one of the top birding sites in East Tennessee for shorebirds. Rare and/or unusual species reported at Kingston Steam Plant include Piping Plover, American Avocet, Baird's Sandpiper, Riff, Whimbrel, Hudsonian Godwit, Marbled Godwit, Red Knot, Red-necked Phalarope, Franklin's Gull, Nelson's Sharp-tailed Sparrow, and Snow Bunting. We are asking that the shoreline habitat be replaced for the shorebirds. Thank you for your consideration.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Colburn, Stan	158 Vinita Lane, Loudon, TN	Tellico Birding Club

**Comment:** Please include in your environmental plan habitat for shore birds! Shore birds used this area before the spill. With the ever dwindling habitat for wildlife, it would be wrong not to re-establish a niche for the shore birds.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Gobert, Carole	1304 Barcelona Drive, Knoxville, TN	

**Comment:** Before the ash spill I visited the plant several times a year to bird. The site was especially known as being a good place to view shore birds during migration. That is one aspect of the plan that seems to be lacking and good shore bird habitat is hard to come by in this area. It would seem a fairly simple thing for TVA to add some good shorebird habitat to the site. A couple of shallow ponds could be dug and the water level managed to provide feeding opportunities for shorebirds passing through Tennessee during their migration.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Henderson, Vickie	312 Leconte View Ln, Knoxville, TN	

**Comment:** I am writing to request that you include in your environmental plan, shoreline and shorebird habitat restoration comparable to what existed before the ash spill. The Kingston Steam Plant has historically been a well-established stop-over site for migrant and wintering birds. It has also been a much favored destination for bird watchers who enjoy seeing these birds whenever they are present

**Comment:** I have previously left a comment on the restoration of the Kingston Steam Plant area recreation. I am adding a link here that will take you to the Tennessee Ornithological Society website giving a description and photos of the shorebird habitat that was previously available to shorebirds and birders prior to the ash spill. Please consider restoring this much loved spot for birds and birding. <http://www.tnbirds.org/birdfinding/KingstonSteamPlant.htm>

Hoff, Ron	282 Hackworth Lane, Clinton, TN	Knoxville Chapter Tennessee Ornithological Society

**Comment:** I am a member of the Knoxville chapter of the Tennessee Ornithological Society. I

had been birding the steam plant since the late 1970's, finding many unusual species there over the years in all seasons. I am hoping that when TVA gets around to re-establishing some bird habitat at the ash spill site, they will take into consideration not only the resident birds but in particular, the migrating shorebirds. East TN as a whole has very little good shorebird habitat. Mostly this consists of shallow areas of water and/or shoreline where these species can forage for food in the form of tiny aquatic life. Before the ash spill, the ash ponds provided much needed feeding areas for these species for many years. While this benefit for birders was not mandatory on TVA's part, it provided local and not-so-local birders a great, safe place to see some of these species that, in our state, are mostly only found over near Memphis, along the Mississippi flyway. Finally, I would urge TVA to try as much as they can to re-plant ALL native plant and tree species. Native warm season grasses are readily available. I know some people who specialize in these plants and have much experience in ridding places of invasive exotic species. Best wishes on the continuing clean-up of the spill.

Leonard, Colin	1613 Cove Creek Lane, Knoxville, TN	

**Comment:** This use to be one of the top birding spots in east TN for shorebirds. I am hoping that you will be replacing the shoreline habitat for these birds. Please consider that what was lost (shoreline) needs to be replaced.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Routledge, Cynthia	1515 N. Willow Bend Ct, Clarksville, TN	Tennessee Ornithological Society

**Comment:** Clean up is great. But please do it not only for the people of the State. But do it with the waterfowl and shorebirds in mind. They too lost vital habitat and land with the ash spill. Please rework your plan and include the much needed and much deserved shoreline for migrating shorebirds. There's so little left as it is...here is your chance to make a difference for generations of birds and citizens of Tennessee to enjoy them. Thank you.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Routledge, Steve	1515 N. Willow Bend Ct., Clarksville, TN	Tennessee Ornithological Society

**Comment:** I very much appreciate the massive clean-up of the Kingston Steam Plant. In so doing, though, I would encourage the inclusion of habitat that would be conducive to shorebirds and waterfowl. Kingston Steam Plant was an excellent area for these birds before the spill and it would be exciting to see it return in the near future.

### Topic/Issue: Economic Impacts - Tax revenues

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Avel, Andy	133 Osprey Way, Harriman, TN	

**Comment:** TVA has not adequately addressed the socioeconomic impact to the area from removing property from the county tax roles. The National Environmental Policy Act requires that an Environmental Assessment (EA) explain potential impacts to the area and present plans for mitigating those impacts. TVA's current EA contains no discussion of the removal of the properties from the tax roles nor how TVA plans to limit the impact of the loss of tax revenue to the county. TVA should present a discussion on how they intend to mitigate the damage or potential damage caused to the county from the loss of the tax revenue.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
-----------------------	----------------	---------------------

Morgan, Joni                      385 Emory River Rd., Harriman, TN      Roane County Community Advisory Group

**Comment:** This plan also removes so many homes from tax rolls; our County has enough trouble with funding projects as it is. I know TVA has provided some 'in lieu of taxes' support for projects that otherwise would not have been done. But we're talking about VERY long-term loss of property tax income to the County. I can't imagine that TVA is willing to subsidize this forever, nor do I feel that the resulting park will actively draw in enough outside visitors to make up the difference in sales taxes and purchasing power.

**Topic/Issue: NEPA Adequacy – More information needed**

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Avel, Andy	133 Osprey Way, Harriman, TN	

**Comment:** TVA has not presented a plan that addresses how they intend to use the total property TVA acquired as a result of the Ash Spill. The subject EA presents TVA's plans for only a small number of the total properties acquired. TVA should include their comprehensive plans for their intended property usage for all of the properties acquired as a result of the Ash Spill. In order for the community to understand and provide comments on TVA's plans for its Swan Pond properties, the community should have the opportunity to see the total plan that encompasses the whole TVA site and all of its properties.

**Comment:** TVA's EA should contain a discussion of all of the properties, what it intends to do with those properties and how it will ensure that the county is not adversely impacted by their removal from the tax roles. TVA's earlier EA, *Kingston Fossil Plant Structure Razing*, does not address or discuss how TVA intends to utilize the acquired properties nor does it discuss how TVA intends to mitigate the impact left from removing these properties from the county's tax roles (an impact of nearly \$250,000 per year). By segmenting the total project into smaller groups (as the earlier and current EA have done), the community and any other interested parties will not have the opportunity to understand what TVA intends to do and therefore cannot adequately judge whether or not TVA's current plans have the potential to adversely impact the environment. TVA appears to be segmenting its NEPA compliance documents to avoid addressing the total potential environmental impact.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Morgan, Joni	385 Emory River Rd., Harriman, TN	Roane County Community Advisory Group

**Comments:** The heavy-handed attitude of demolishing the homes without regard to original owners' desires leaves me very uneasy about the status of the homes bought on Emory River Road. I still live here. There is no plan for these homes yet . I enjoyed my neighbors' company and hope to see people moving back into these homes permanently at some point in the future.

**Topic/Issue: Transportation - Suggestions to improve traffic flow**

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Ellis, Randy	319 Virginia Ave, Harriman, TN	Roane County Commissioner

**Comment:** Also I would like to see the road widened on Swan Pond Circle Rd from Swan Pond Road to Lakeshore Dr. Maybe a 3 lane? With the 3rd lane being a center turn lane to help minimize any extra traffic to help reduce the impact on the local residents.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Willis, Cathy	Swan Pond Circle Road, Harriman, TN	

**Comments:** I do have request that I would like to see addressed: 1) I feel the current roadway, i.e., SP Circle is not adequate for additional traffic that would be coming to the area, in particular the narrow road conditions at the split into Northshore and the turn off SP road where the ball fields are proposed. Please add new lanes or widen the road at those spots.

**Topic/Issue: Public involvement – Public comment period**

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Avel, Andy	133 Osprey Way, Harriman, TN	

**Comment:** I request a 30 day extension of the comment period.

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Morgan, Joni	385 Emory River Rd., Harriman, TN	Roane County Community Advisory Group

**Comment:** The Roane County CAG requests an extension of 30 days of the comment period for the Environmental Assessment titled, 'Kingston Fossil Plant Ash Recovery – Proposed Recreation Areas'. TVA's current comment period does not allow adequate time for the CAG members to review the document, discuss potential comments, or solicit comments from the impacted community.

**Topic/Issue: Public involvement – More opportunities needed**

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Morgan, Joni	385 Emory River Rd., Harriman, TN	Roane County Community Advisory Group

**Comment:** The ball fields may be more elaborate than are really appropriate for this area, and since there was no public forum for this to be discussed, many people may not have thought about this. I don't know where Roane County will find the money to build the required facilities for such a huge set of fields. I wish this could have been discussed before the public's presence in more detail before proceeding.

**Topic/Issue: Site Location - Possible negative impacts to personal property**

<b>Commenter Name</b>	<b>Address</b>	<b>Organization</b>
Bardill, Ronnie	1451 Swan Pond Circle Road, Harriman	

**Comment:** Concerns - with property flooding as a result of the new berm and proposed water levels - concern about being cut off by boat from the main lake channel. Always had access to the main channel (17' boat). 100 year flood level concern with property - changes to the flood levels on

property. Can I still hunt deer on my property - rabbits, since it is adjacent to TVA developed area?  
Concerned with mosquitoes from wetland development.

## PETITION

Requesting impacted shoreline habitat be replaced for the shorebirds at Kingston Fossil Plant.

TVA&nbsp;

We the undersigned appreciate your proposal to develop public recreation areas near Kingston Steam Plant. The recreation areas would restore and enhance the community that was hurt by the ash spill in December 2008. However, this area was one of the top birding sites in east Tennessee for shorebirds. Rare and/or unusual species reported at Kingston Steam Plant include Piping Plover, American Avocet, Baird's Sandpiper, Ruff, Whimbrel, Hudsonian Godwit, Marbled Godwit, Red Knot, Red-necked Phalarope, Franklin's Gull, Nelson's Sharp-tailed Sparrow, and Snow Bunting. We are asking that the shoreline habitat be replaced for the shorebirds. Thank you for your consideration.

	<b>Name</b>	<b>From</b>	<b>Comments</b>

4.	Carole Gobert	Knoxville, TN	
5.	Mick Gill	Mackay, Australia	
6.	Colin Leonard	Knoxville, TN	
7.	David Trently	Knoxville, TN	There is very little habitat in east Tennessee that is suitable for feeding large numbers of migrating shorebirds (e.g. sandpipers and plovers). The old ponds at the Kingston Steam Plant were one of the best sites for this, especially since the change in time schedule for lowering the water level on Douglas Lake (and decreasing shorebird habitat in the Rankin Bottoms area during prime migration periods). If TVA is able to rebuild an area that is suitable for shorebirds during migration, it would be a big help to the birds as they move north in spring and south in summer/fall - and provide wonderful opportunities for the public to view the spectacle of these 'wind birds'.
8.	Deedee Blane	Knoxville, TN	
9.	Janet Lee McKnight	Greenback, TN	I'll never forget the snow bunting at Kingston Steam Plant! Bring back the birds!
10.	Vickie Henderson	Knoxville, TN	Please restore shoreline habitat for the many shorebird species that have historically used this migration stop-over site.
11.	Kathy Getsey	Knoxville, TN

RE: TVA DEA Kingston Fossil Plant

Dear Ms. Baxter:

The Division of Remediation (DoR) has received your environmental review request, dated August 1, 2011, regarding the TVA DEA Kingston Fossil Plant. After reviewing your assessment and our project files, we are in agreement with the rehabilitation around the plant.

If you have any further questions, do not hesitate to call Dan Hawkins, our Knoxville Field Office Manager, at (865) 594-5445.

Sincerely,

  
Andy Binford

RE: TVA, CULTURAL RESOURCES ASSESSMENT, SWAN POND CIRCLE ROAD BY-PASS,  
KINGSTON, ROANE COUNTY, TN

Dear Mr. Howard:

At your request, our office has reviewed the undertaking in accordance with regulations codified at 36 CFR 800 (Federal Register, December 12, 2000, 77698-77739). Based on the information provided, we concur that the project area contains no historic properties eligible for listing in the National Register of Historic Places.

If project plans are changed or archaeological remains are discovered during construction, please contact this office to determine what further action, if any, will be necessary to comply with Section 106 of the National Historic Preservation Act.

Your cooperation is appreciated.

Sincerely,

E. Patrick McIntyre, Jr.  
Executive Director and  
State Historic Preservation Officer
