Public Notice Responses

Memorandum

To: Amy Robinson, COE, Nashville

CC: WPC, NRS

Amy Fritz, WPC, JEFO

2/9/2007

The Preserve Marina Owners Association, PN #07-01, application #2006-04097, Haw
Branch embayment construction of community dock, Hardin Co.

Amy:

There has been much concern over this project from the Friends of Pickwick Group comprised of private citizens. We receive frequent complaints and just comment of overall disapproval of how the shoreline area and very natural cove areas are being so easily developed.

This office would like to comment to the effect that The Preserve project does have the appearance of being piece-mealed (boat ramp, floating docks). This office of the Division of Water Pollution Control would like to suggest or ask that the TVA (Muscle Shoals office) and/or the Nashville District Corps office work with The Preserve and/or other developments (i.e. North Shore) on this project and in the future to create an overall management plan for the entire shoreline area to streamline shoreline development issues as a whole and avoid a piece-meal approach and possible cumulative impacts in this part of the Pickwick Reservoir.

Please consider these comments when processing the public notice identified above and all others that may occur in the Pickwick Reservoir.

Amy Fritz, ES5

Attention: Ms. Amy Robinson, Regulatory Branch

Subject: Public Notice No. 07-01. The Preserve Marina Owners Association. Proposed Community Floating Boat Docks, Tennessee River Mile 209.6, Right Bank, Kentucky Lake, Hardin County, Tennessee.

Dear Colonel Roemhildt:

Fish and Wildlife Service personnel have reviewed the subject public notice. The proposed project would involve the construction of five floating community boat docks for residential use in the Haw Branch Embayment at Tennessee River Mile 209.6R, Hardin County, Tennessee. The five docks would extend between 36 to 48 feet lakeward from the normal summer pool elevation, and accommodate a total of 53 boats. The public notice indicates that no dredging is proposed. The applicant (The Preserve Marina Owners Association) also proposes to construct a 24-foot-wide boat launching ramp that meets the criteria for Nationwide Permits #36. The following constitute the comments of the U.S. Department of the Interior, provided in accordance with provisions of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661 et seq.) and the Endangered Species Act (87 Stat. 884, as amended; 16 U.S.C. 1531 et seq.).

Endangered species collection records available to the Service do not indicate that federally listed or proposed endangered or threatened species occur within the impact area of the project. We note, however, that collection records available to the Service may not be all-inclusive. Our data base is a compilation of collection records made available by various individuals and resource agencies. This information is seldom based on comprehensive surveys of all potential habitat and thus does not necessarily provide conclusive evidence that protected species are present or absent at a specific locality. However, based on the best information available at this time, we believe that the requirements of section 7 of the Endangered Species Act of 1973, as amended, are fulfilled. Obligations under section 7 of the Act must be reconsidered if (1) new information reveals impacts of the action that may affect listed species or critical habitat in a manner not previously considered, (2) the action is subsequently modified to include activities which were not considered during this consultation, or (3) new species are listed or critical habitat designated that might be affected by the action.

We do not anticipate significant adverse impacts to fish and wildlife or their habitats as a result of this project. Therefore, the Service has no objection to the issuance of a permit for the work described in the subject public notice.

We appreciate the opportunity to review the subject permit application. Please contact Robbie Sykes (telephone 931/528-6481, ext. 209) of my staff if you have questions regarding the information provided in this letter.

Sincerely,

A handwritten signature in black ink, appearing to read "Lee Barclay". The signature is written in a cursive, flowing style.

Dear Mr. Austin:

I would like to add my voice to those that are in support of The Preserve development in Hardin County.

As the sponsor of the TN River Resort Bill that would bring additional revenue to our county it is imperative that we continue to develop these type of projects. The natural beauty of Pickwick Lake and the Tennessee River draw many people to our area and it is our hope that with the development of retirement villages and tourist attractions our economy will grow.

I hope you will give this project serious consideration. Please feel free to contact me if I can answer any questions or provide any additional information.

Respectfully,

Randy Rinks

Re: The Preserve at Pickwick

To whom it may concern:

I would like to take this opportunity to express my personal support of the Preserve at Pickwick, as well as, placing a few things in perspective that you may wish to consider.

I moved to Pickwick nine years ago and although I'm not a lifetime resident of the area, I am quite cognizant of the happenings in and around Pickwick Lake. I presently serve on several boards and organizations in the community serving as treasurer of the Friends of Pickwick Landing State Park, treasurer of Hardin County Chamber of Commerce, board member of the Southwest Tennessee Tourism Association, secretary of Pickwick Landing Rotary Club, finance chairman of Shiloh Falls, finance chairman of Pickwick United Methodist Church and member of several other civic organizations.

I personally feel I can offer a glimpse of the real Pickwick contrary to the version I've heard presented by just a very few dissatisfied and unsupportive residents in the area. Although I'm not speaking officially for the groups I'm involved with, I would like to express my views and the sentiments I know exist with the over-whelming majority of residents in the Pickwick area.

First, I would like to dispel some confusion that might exist between a group registered as the Friends Of Pickwick Inc. which opposes progress at Pickwick not to be confused with a group called Friends of Pickwick Landing State Park (a 501c3 group) consisting of 100 plus members. At last weeks Board meeting, our board members verbally supported the Preserve at Pickwick and the economic benefits that could result from the planned development and voiced their concerns of our Friends group being confused with the other group. The Friends of the Pickwick Landing State Park sees the Preserve at Pickwick having the same goals and visions as our group in that both groups want to support recreational activities while being cognizant and supportive of the environment. The Preserve at Pickwick meets this test.

Second, I would like to express my views and the views of my fellow Rotarians by offering our support of the Preserve as we feel the economic benefits generated from the Preserve at Pickwick including the marina certainly outweighs any negative response I have heard. The Preserve at Pickwick is an exceptionally well-planned development that offers recreational activities while maintaining an excellent balance with the environment.

Third, At last week's chamber of commerce meeting our board unanimously voted to offer our support of the Preserve at Pickwick even though the development was not on our membership roles. Our chamber could not imagine any group being opposed to the Preserve as all indications are that the development offers a well-planned community keeping nature and the environment to the forefront while offering superb recreational activities for its residents. The entire county should benefit from the economic impact this development will have on our area and the opportunity our area can reach out to retirees who can relocate here.

Fourth, I presently live in a competing gated community to the Preserve but I can already notice additional interest in our development because of the exposure of the Preserve. The Preserve's uniqueness to Pickwick Lake offers tremendous benefits to our entire area thus a win-win situation for both developments. Like Shiloh Falls, I see the Preserve equally responsible to their residents and to the environment in the construction of their marina as I see our marina has done.

Although I can't specifically offer any concrete and precise evidence of the support for the Preserve at Pickwick, I would suspect that the Pickwick area over-whelming supports the Preserve at Pickwick and that support could exceed 98% of the residents.

I would like to 'thank you' in advance for taking the opportunity to consider my remarks about the positive support I feel the Preserve at Pickwick has in our community.

Respectfully

Dave

Re: The Preserve at Pickwick

To Whom it may concern;

Please accept this communication in support of the Preserve at Pickwick, an extremely well-planned lakefront development bordering the north shore of Pickwick Lake in Hardin County, Tennessee. The Preserve relies heavily on its assets being influenced by being able to provide a marina and boat slips to compliment their resort community. This development will provide a positive economic impact on the immediate and surrounding area, as well as providing a substantial residual impact on the entire southwest Tennessee tourism region.

Tourism at Pickwick Lake is perhaps Hardin County's biggest industry and our county is fortunate to have private enterprise such as the Preserve at Pickwick. Their unique development is interested in locating, investing, and developing a community by enhancing the landscape at Pickwick Lake. The success surrounding the Preserve at Pickwick will be measured not only by today's generation but for generations to follow as the Pickwick area will continually see the results of this well-planned community by the influx of retirees seeking to relocate to our southwest region.

Hardin County lacks county zoning ordinances and standards which should regulate and support planned growth in our county surrounding and adjacent to the Tennessee River. Fortunately, the owners and developers of the Preserve at Pickwick have a vision of incorporating their resources for a planned resort at Pickwick by the construction of a marina in their development which will present an aesthetically pleasing environment.

On behalf of the Hardin County Chamber of Commerce Board of Directors representing small & large businesses, independent owners and national chains, the area's manufacturing and service sectors, I encourage you to approve any and all applications being submitted by the Preserve at Pickwick to obtain access to Pickwick Lake with the construction and operation of a marina in their planned lake development.

I sincerely appreciate your consideration of our organization's request above and recognizing the support for this endeavor by our Hardin County business and industry leaders.

Respectfully,

Beth Pippin
Executive Director – Hardin County Chamber of Commerce

Dear Mr. Austin,

It is a pleasure for me to have the opportunity to write a letter of support for the proposed development in the Pickwick Lake and the Tennessee River area. I learned this past weekend at our quarterly board meeting in Columbus, Mississippi that there was a proposed development in that area called *The Preserve*. I am certainly excited about the development potential *The Preserve* offers and I want to add the Tennessee-Tombigbee Waterway Development Authority to the list of supporters. As you may know, the Authority is a four state compact created by congress in 1958 to promote the construction and development of the Tennessee-Tombigbee Waterway. Now that the waterway is complete our mission is to promote it and work to see that it is always navigable.

Part of our work is promoting tourism, which has seen tremendous growth in recent years. One of the most popular tourism spots along the four states that we work in is Pickwick Lake and that area, and this offers tremendous growth opportunities for the states of Tennessee, Mississippi, and Alabama. All of these states are part of our service area.

EDDISSUPERFOOD

PAGE 03

To Whom It May Concern:

I am writing regarding my purchase of Lot ⁺²⁴19 in Pickwick Preserve. I purchased this lot knowing that an application had been placed but not yet approved for potential boat slips. It was my reasonable expectation that this project would be permitted a marina in similar fashion to those issued for the developments known as Lands of Pickwick, Rivercliff, Shiloh Falls, Points of Pickwick, and Grand Harbor.

I am writing requesting that you make a full investigation into this matter. It is respectfully my position that the political pressures of others are delaying the issuance of the permit.

It is further my respective position that the failure to issue this permit would be inconsistent with the historical practices of TVA and the U.S. Corps of Engineers. I would appreciate any assistance you could offer in getting the proposed slips approved.

Sincerely,

Richard N. Rogers D.D.

To Whom It May Concern:

I have recently purchased a lot in the beautiful development known as Pickwick Preserve. This development is a great enhancement to Pickwick Lake, and the plan represents a unique approach to provide individual home sites near the lake with potential access to the lake.

I am writing to express my belief that it is most important that the proposed slips requested by Pickwick Preserve be issued. I recently made an inquiry regarding the slips and was shocked that TVA had not already issued the permit.

I was informed that additional consideration was being given to the concerns of others. I have no personal knowledge regarding any objection to the issuance of the slips, and I am requesting that the boat slips be approved as requested.

Sincerely,

Bill Crowell
66 Avalon Pl.

Community South

A Better Way To Bank

Dear Sir or Madam,

I would like to express my opinion of the development known as the Pickwick Preserve. As a citizen of Hardin County, I am pleased and excited to hear of the increasing interest in this project. Regarding the public notice, I believe that the requested boat slips would certainly be in the best interest of Pickwick and Hardin County, Tennessee.

I suggest that TVA and the U.S. Corps of Engineers confidently agree to approve this request.

Thank you for your time and consideration.

Sincerely,

Donny Turnbow
City President

Dear Sir or Madam:

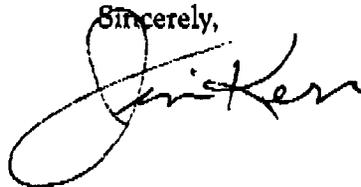

I am writing to express my strong concern and feelings regarding the position taken by "The Friends of Pickwick." I have reviewed a handbill, which they have been circulating, and it is riddled with inaccurate information.

It is respectfully my position that the voice of "The Friends of Pickwick" represent the sound of a very few versus the majority of Hardin or Shelby County.

I am submitting this letter in conjunction with many others to support our position that the proposed water use facilities for The Preserve should be issued.

I would greatly appreciate a fair consideration to the request. I have every confidence that this should result in the approval of the slips.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeni Kern". The signature is written in a cursive style with a large, looping initial "J".

Mr. Austin,

As Hardin County Mayor, I give my enthusiastic and full support of *The Preserve* located at Pickwick Lake.

The development of this community is a vital asset to our county. Tourism and retirement villages are the main base for our growing economy. The use of Pickwick Lake and the Tennessee River, as an attraction and recreational facility, is essential.

Hardin County strongly supports *The Preserve* in pursuing the construction of boat slips to enhance this project. If you should need my assistance, please feel free to contact this office at any time.

Sincerely,

KEVIN C. DAVIS
Hardin County Mayor

RE: The Preserve Development - Montana Land Company, L.L.C.

To Whom It May Concern:

The Savannah City Commission recently voted to participate in the Resort Bill as part of our economic development package. In order to realize the most benefit from having Resort Status, it is important to increase the tax base along the Tennessee River by encouraging new developments. The Preserve is such a development and should be allowed to continue progressing towards completion.

Please feel free to contact me if additional information is needed.

Sincerely,

Bob Shutt, Mayor
City of Savannah

Community South

A Better Way To Bank

Dear Sir:

I am writing in full support of the requested boat slips for The Preserve and any storage facility or boat ramp. The primary means to obtain access to the north side of Pickwick Lake is through the state park boat ramp. On peak weekends, it is difficult to launch your boat at the state park ramp and almost impossible to park your trailer. If the requested slips are not issued, owners of homes in The Preserve will be forced to use the state park ramp, further stressing the facility. I would also add that the cost of the slips and the perpetual maintenance will be borne by those owners in The Preserve versus their use of the lake being assessed to the public by using a public facility. In order to protect the public's use of the Pickwick Landing ramp, we would respectfully request your approval of the water use facility for The Preserve.

Thank you for your time.

Sincerely,

Donnie Gean
Regional President

The Preserve At Pickwick

We, the undersigned citizens of the United States of America, do hereby petition and provide our expressed approval and support for the TN Valley Authority and U.S. Corps of Engineers to approve pending applications submitted on behalf of The Preserve at Pickwick, L.L.C. in the Preserve at Pickwick, including, but not limited to, boat ramps, boat docks, boat slips and other recreational usages. We believe it is in the best interest of TVA and the U.S. Corps to approve any pending and future applications in the Preserve at Pickwick. Signed this date by our free act and deed.

Duane Wright
Wright's Marine Construction Co.
P.O. Box 93
Pickwick Tn. 38365

02-08-07

To Whom It May Concern:

Wright's Marine Construction Company has been established on Pickwick Lake since 1968. I am a second generation owner of our company doing business myself at Pickwick Lake for the last 24 years. All of my life I have been working on or somewhere near Pickwick Lake. Over the years I have witness many changes all around the lake and surrounding areas. One of the best changes that I have witness is when developments such as The Preserve at Pickwick comes in and develops the property surrounding the lake. Every time a project such as this begins the lake just gets more beautiful. The Shore line in all of our developments begin to start being maintained and the damage from normal wear and tear from nature begins to come under better control and the lake begins to look so much better all around the shore. We no longer see all the washed out shore lines with dead trees lying all around the shore in such developments. Not only do I consider these developments a great support for environment it is a tremendous support for our surrounding communities by providing jobs during the development phase. Then after the development has begun to take hold the surrounding population begins to grow even stronger requiring even more jobs to be created. I personally feel that it is in the best interest to the majority of all the people in the surrounding areas for developments such as The Preserve to be support by every one around including all business and government agencies.

Hardin County is mainly supported by the growth of the developments around Pickwick Lake and this draws more people to our county. When more people move in then more jobs are created for the young group so that our younger people do not have to move away and it also makes our county more attractive to the professional people that will come in and provide things such as better medical care to our elderly people. With better medical care our elderly people that have retired and moved to the lake will not have to sell out and move back to the cities when they start requiring more medical attention.

There are many reasons to support developments such as The Preserve and these are just a few but it is of my personal and business opinion that all the agencies and businesses would truly benefit from supporting these developments with everything they need. The surrounding businesses will grow even more to be able to employ more of our citizens and our government agencies such as TVA would have more help from individuals in maintaining our shorelines and our other government agencies would have relief from those that are on our unemployment rolls needing financial and medical support.

One of the core needs of developments on Pickwick Lake to survive is the ability to obtain the proper permitting to be able to install nice community docks that are needed to be able to attract outside people to come in and purchase more of our raw land around our lake. With out the ability to be able to supply docks with the purchase of lake property the land is harder to promote and the tax basis for the county is a lot less. It is very highly important for The Preserve at Pickwick to be able to obtain these permits for the continued growth of its development, which will continue the growth of our county. As a citizen of Hardin County and as one of many business owners that employ of the people in our county I would greatly appreciate that everyone and anyone that will be helping make decisions on allowing the proper permitting for the needed dock space, would truly look at all the benefits that our county and our people would receive and help cut all the red tape as possible so that the fine folks doing the development at The Preserve at Pickwick could continue with helping our county to grow by developing the property on the North shore of Pickwick Lake. I am always available to take any questions that any one would have by calling my cell phone 731-607-3076.

Best regards,

Duane Wright {pres.}

RE: COE-N, PN# 07-01/COMMUN. DOCKS/TRM 209.6R, UNINCORPORATED,
HARDIN COUNTY

Dear Ms. Robinson:

The above-referenced undertaking received on Friday, January 12, 2007 has been reviewed with regard to National Historic Preservation Act compliance by the participating federal agency or its designated representative. Procedures for implementing Section 106 of the Act are codified at 36 CFR 800 (Federal Register, December 12, 2000, 77698-77739).

In order to complete our review of this undertaking, this office will need to receive from you the review comments and recommendations of your agency's cultural resources staff regarding this undertaking's potential to affect historic properties.

Upon receipt of the additional information, we will complete our review of this undertaking as expeditiously as possible. Until such time as this office has rendered a final comment on this project, your Section 106 obligation under federal law has not been met. Please inform this office if this project is not funded or canceled by the federal agency. Questions and comments may be directed to Jennifer M. Barnett (615) 741-1588, ext. 17.

Your cooperation is appreciated.

Sincerely,

Richard G. Tune
Deputy State Historic
Preservation Officer

Re: Public Notice #07-01
Applicant: The Preserve Marina Owners Association, Inc.
Proposed Construction of Five Community Docks, Consisting of 53 Boat Slips, and a
Boat Ramp for The Preserve Marina Homeowners Association, Inc.
Haw Branch Embayment, Tennessee River Mile 209.6, Right Bank, Pickwick Lake
Hardin County, Tennessee

Dear Ms. Robinson:

The applicant proposes to construct five private, covered, floating community boat docks in the Haw Branch Embayment of Pickwick Lake in Hardin County.

The Tennessee Wildlife Resources Agency has concerns regarding this project. The area of Pickwick Lake where this project is proposed has numerous boat docks and is a high traffic area for recreational boating and commercial vessels. The Haw Branch embayment is one of the last coves in this area of Pickwick Lake where jet skiers can safely recreate. The upstream section of Haw Branch is used extensively by sport fishers seeking largemouth and smallmouth bass, species very valuable to recreational sport fishers. We are concerned about the potential boating safety issues, reduction in area of public waters available to recreational boaters (such as jet skiers), and reduction in area of public waters available to sport fishers within Haw Branch. The placement of the boat docks in Haw Branch will probably deter sport fishers from fishing this area and inhibit their navigation upstream past the docks due to increased boating traffic and associated safety issues. The applicant should also be aware that if the boat docks are permitted, it is highly unlikely that they would qualify for a no wake zone.

Although it is stated in the figures provided in the public notice that all of the proposed boat docks will be under the third of the cove rule, we are uncertain that this is the case after reviewing the information in the public notice. It appears that docks A, B, and C may conform to the rule, but docks D and E may not. If you include the distance from the shoreline for dock D and E (12 feet) and add it to the 24 feet for the header and dock fingers, then the constructed dock will extend 36 feet into the embayment (36 feet times 3 = 108 feet); where the channel width is only 105 feet at these locations, which will exceed the third of the cove rule by 5 feet.

The Tennessee Wildlife Resources Agency requests that this permit be held in abeyance until our concerns regarding boating safety issues and recreational use issues are addressed by the

The State of Tennessee

applicant, and it is determined that the proposed project does not violate the third of the cove rule. If the applicant fails to agree to the above condition, we request that the permit be denied.

Thank you for the opportunity to comment.

Sincerely,

Robert M. Todd

13 MARCH 2007

AMY M. ROBINSON, CORPS OF ENGINEERS, KENLEY AUSTIN, TVA
COMMENTS ON JOINT TVA/COE PUBLIC NOTICE (07-01)

APPLICANT: "PRESERVE MARINA OWNERS ASSN INC."

PROJECT: "COMMUNITY DOCKS" (AKA 'MARINA')

LOCATION: HAW BRANCH COVE, PICKWICK LAKE, TN, MILE 209.6

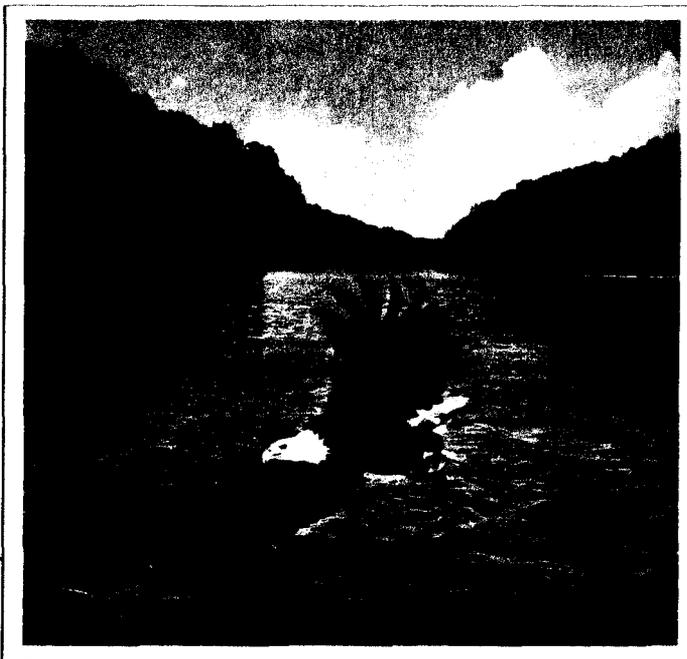

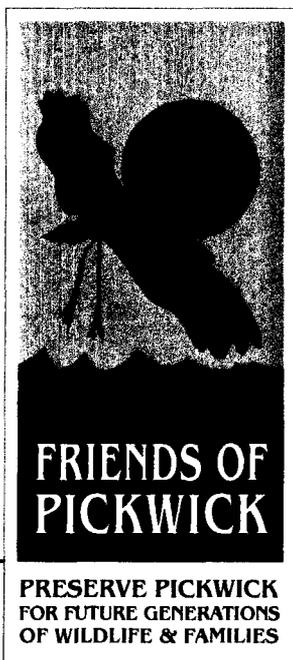

Photo Illustration by Charles & Barbara Tignett, Plain Branch, 2006

**ALTHO WE'RE A DIVERSE GROUP OF RESIDENTS & RECREATIONAL
'FRIENDS OF PICKWICK', WE SHARE A DEDICATION TO
PRESERVING PICKWICK FOR FUTURE GENERATIONS OF WILDLIFE,
AND FAMILIES...FISHING, BOATING AND SIMPLY SAVORING
NATURAL SHORELINES, PRISTINE HABITAT AND CLEAN WATER.
OUR MISSION IS CONSERVATION, COMPLIANCE & COMMUNITY ACTIONS,
IN HARMONY WITH PUBLIC TRUST & PRESERVATION.**

"Of all the questions that can come before this nation, short of the actual preservation of its existence in a great war, there is none which compares in importance with the great central task of leaving this land even a better land for our descendants, that it is for us."

This wonderful quote from President Theodore Roosevelt, was used by TVA Board Member and Community Relations Committee Chairman, Susan Richardson Williams, in newspaper article (1.14.07) announcing TVA's recent ban on selling or swapping any more public lands for private development. We wholeheartedly salute this new TVA Board and the 5000+ people who overwhelmingly (over 92%) supported this new policy that Ms. Williams aptly described as "preserving and protecting the limited amount of land managed by TVA, for the public's use." We also urge this new TVA Board to support our efforts to protect public lands in Haw Branch cove, one of the same "scarce resources" TVA pledged to protect with it's enlightened and courageous new land management policy vote just a few months ago. Please help us protect these public lands.

Barbara Tignett & Doris Jackson Jibeault, Friends of Pickwick Inc. March 13, 2007

15 MAR 2007

Proposed Permit Applications (and CE) by "Preserve MARINA Owners Assn. Inc" - Issued 1.12.07

Amy M. Robinson, Regulatory Branch
Nashville District Corps of Engineers
3701 Bell Road, Nashville TN 37214

E-mailed version 13 March 2007. FDX hard copies to follow, with photos, references, etc.

Please seriously consider the following facts and comments respectfully submitted by our conservation group, "Friends of Pickwick, Inc.", on 'Joint Public Notice 07-01, Application 2006-040797 by "Preserve Marina Owners Assoc. Inc." issued 1.12.07 for public comments by U.S. Army Corps of Engineers and Tennessee Valley Authority, for "Proposed Community Docks" and "pre-approved boat ramp" at mile 209.6, Pickwick Lake, Tenn. FYI: The original public comment period on this controversial project has been hampered by a series of serious issues and delays involving difficulties getting requested meetings and information (including over 400 pages of related FOIA requested information that arrived the day before last public comment deadline). Altho TVA/COE initially refused another extension, (even though we only had 24 hours to review 416 pages of info), officials did grant us last minute extension again, giving us thru 3.13.07 for our final comments. Unfortunately, 619 pages of potentially critical data was excluded by TVA from these recent FOIA requests, much of it info originally publically presented by TVA officials in 2000 (and requested thru proper channels for over 8 months), but we'll address and appeal that significant information gap separately. This e-mail to be followed by FDX hard copies of comments, plus photos, graphics, references. Please also consider all previous e-mails, graphics, letters, faxes, postcards and issues raised during our discussions, as part of official record of 'Friends of Pickwick' comments and concerns.

The following summarizes majority of our regulatory and policy compliance issues...our concerns relating to the EA review process itself...and most important, the direct, indirect and cumulative adverse environmental impact this entire project will have on vanishing natural resources at Pickwick Lake, if this permit is approved.

1. **Critical, pertinent, environmental info, on this project and area, withheld for months by TVA officials:** Only 1 page (of 416 pages of FOIA info rec'd 2.6.07) related to assets of cove. All environmental data TVA presented in 2000 excluded. But, in 1/2000 land swap ap, (that involved this same cove), developer states 'Public Benefits' as: "The project would be something both developer and TVA agreed on. Haw Branch would become a forever protected and undeveloped cove. This would enhance boaters', fishermen's and recreational use of the lake because of the privacy and natural habitat of existing terrain and wetlands area." In spite of some wording issues, his statement confirms what TVA officials advanced at the time...that back of this cove was pristine, critical habitat, adjacent to protected wetlands, but cove too narrow, so many environmental restrictions, it was "virtually undevelopable" - so that's why developer wanted to swap it for more lucrative waterfront in front of 2 coves (one was Haw Branch). But now, TVA officials openly support permit approvals for cove development - boat docks, 200' ramp, 160' jetski pier, 53+ boat slips (for starters?). Flip-flop? Why? TVA also still withholding info verifying valid environmental restrictions.
2. **More issues with transparency of process, equal access to information, as background to controversy:** In 5/'06, developer publishes plans showing "Full Service Marina" in same cove TVA had said was "virtually undevelopable" in 2000 ("due to environmental restrictions"). Our authorized calls seeking 26a permit activity information (from May thru Nov '06) thru proper TVA channels, produces nothing. Then, a Christmas surprise. TVA gets piecemeal "pre-approval" of 26a permit (via invalid 'Exclusion') for big boat launching ramp, integral part of marina project.
3. **Violation of NEPA 'Categorical Exclusion' regs barring "controversial" projects from automatic (CE) exclusion.** Besides piecemeal issues, regs state any action normally qualifying as (CE) exclusion shall NOT be so classified if there is substantial (or likely to become) controversial. We can document controversy, official awareness, scope, etc !

4. **'After the fact' Violation: Reviewers notes on CE Checklist dated 4-5 weeks AFTER ramp permit approved.**
Altho "pre-approved" boat ramp permit, (via a questionable Categorical Exclusion) was approved by TVA on 12.20.06 (2 days after \$200 fee was paid), 40 out of 52 of reviewers notes on the Categorical Exclusion (CEC) were dated 1.25.07, over 4 weeks AFTER permit was approved. Why? Isn't this highly inappropriate, "after the fact" reviewing? Is this valid? Also noted - many highly questionable "No" checkmarks totally misrepresent impact.
5. **Violation of '26a Permit' regs preventing adverse impact on public land (marina ramp adjoins TVA public land)**
Since 200' boat ramp will have severe impact on public land, this project was ineligible for automatic 26a permit.
6. **Violations of several sections of '26a Permit' regs due to boat ramp NOT built according to approved plans.**
Boat ramp not built in location shown on approved permit plans. Permit should be revoked, as we've requested.
7. **Issues with feasibility, spec sizes, compliance issues and no dredging claims on boat docks, pier and boat ramp.**
We challenge specs showing that all the docks, with sizes shown...(with the space from shoreline to edge of dock being confirmed as 10-12 feet). Will plans comply with one-third-of-cove rule at summer pool? We also take serious issue with contention that no dredging will be required due to the apparent gentle sloping of shoreline visible at winter pool (see photos to follow taken 2.22.07) and required draft for boats. Plus, we have concerns about dredging regarding boat ramp. Was it done during pre-construction as markings on edge of bank seem to indicate? What about area under the boat ramp, to provide access and required depth for trailers, was that area or will that area be dredged? No shoreline erosion measures around boat ramp visible 2.22.07. We have serious issues with claims that docks can be built and 50+ boats moored in this narrow, shallow back of cove without dredging.
8. **Piecemeal issues with "pre-approval" of boat ramp permit vs. total project and other review/permit issues:**
In first phone call with Lisa Morris, COE on 1.16.07, when I explained issue with boat ramp being referred to as "pre-approved" in 1.12.07 Public Notice...even tho it was a boat ramp for the same project...at the same exact site...for same applicant, "Preserve Marina Owners Assn Inc.", Ms. Morris quickly responded that this would be **unacceptable** to the Corps since that's "**piece-mealing**". We were concerned with the practice and obvious implications but unaware of term or legalese, however we did some research, submitted questions on this issue several times, but don't recall getting meaningful official response at all from any official. However, now we have it on good authority that regulations are clear (including NEPA) that what has happened here does NOT comply with regulations prohibiting piecemeal approvals like this...due to the fact that the long-term, overall, CUMULATIVE Impact can never be accurately assessed if portions of projects are routinely approved in this piecemeal way. And, even when we saw that the wrongfully pre-approved boat ramp had already been built (seen during site visit 2.22), contrary to our many previous challenges, officials just they they were unaware it was already underway...besides "they already had the permit". Even when shown later, boat ramp was not built according to approved plans in the permit application...but at different location, no reaction from officials. (Were we expecting a **lack of impartiality** in the process at every stage of reviews?) We also challenged the fact that COE, NWP permit limits the boat ramp to 20 ft wide, yet specs on one permit ap showed width as 24 ft. How wide is it? It appears to us that this may be a case of fast-track approval (in a few days over Christmas), get it built ASAP during low water, and deal with any problems later (just ask "**forgiveness**" later)? Also, since then, we reported boat ramp was not built as shown on permit plans (different location) and possibly encroaches on TVA public land. TVA official, Stan Davis, agreed the topo map made it unclear if new location for boat ramp was just adjoining or actually encroaching on TVA land .
9. **Is this project in compliance with SMI shoreline regulations and all TVA/COE formal environmental policies?**
Even tho 'policies are not law' and documented decisions in federal register (1999 SMI/2002 FEIS) regs are not either...but isn't the health of our environment and the integrity of our system better served when officials enforce regs and honor policies that dedicated agency experts have spent years developing, and taxpayers and stakeholders have spent millions funding? Like the \$5.2 million on SMI? FYI: Most of Pickwick was actually grandfathered out of important SMI (shoreline management) regs during 6 of the most frenzied, rampant development periods ever! Since "The Preserve" was only recent project NOT grandfathered, are all SMI regs being enforced? In lieu of project scope, permit numbers, wouldn't a multi-agency, 'big-picture' approach better serve protections and public interest?
10. **Consider an alternate location, protect public lands and "preserve" pristine cove as a signature feature of "The Preserve!"**

It should also be noted that altho it took us over five weeks to get TVA and Corps officials to agree to an on-site meeting to verify specs, consider site specific issues, etc., the meeting also gave us an opportunity to discuss the steps in NEPA Environmental Assessment review and decision making process and what we could expect, time-wise, following submission of our comments after the deadline. While reviewing details of the NEPA/EA process with Stan Davis, Sr. TVA/NEPA Specialist and Amy Robinson, COE, we heard that after all public comments were reviewed, the applicant was also given an opportunity to review all public comments and then submit additional comments. We asked how long does applicant have review and rebut all public comments? Ms. Robinson, replied, "as long as they like." When we requested the same access to public information and comment opportunity as the developers, we were told by officials they did not see a problem with that, so we trust when the appropriate time comes, we'll be given the same equal access and opportunity to comment as given to the applicant/developers.

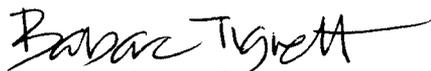

While we recognize the complexity of this cross-jurisdictional permit review process, we urge all TVA and Corps officials to seriously consider all the regulatory, policy and public interest issues raised here and previously, by our conservation group and informed government agencies, such as, Tennessee Wildlife Resources Agency. We appreciate this respected agency's expertise and their request this permit "be held in abeyance" until all concerns regarding accuracy of permit specs (boat dock sizes vs. one-third-of-cove rule), as well as "boating safety, recreational uses". And, if all these issued not resolved, TWRA requests permit be denied. We wholeheartedly concur, plus...

We also respectfully request again, that a public hearing be held so the public can be fully informed on the details, scope, and potential impact of this project...and that this permit review process be elevated beyond a more "routine" 'EA', to full EIS in lieu of facts that: (a) Haw Branch was once described by TVA as "narrow pristine (critical) habitat, with adjacent protected wetlands" that "abounds with springs, streams, forests and wildflowers," * and (b) adverse impact on adjoining public lands, water quality, habitat, etc. will be severe...(c) cove is a virtual safe harbor, last refuge in area for recreational boaters and fishing"...(d) Haw Branch is "scarce natural resource area" with protection due to status as "unique in nature...and scarce in quantity, in area or region"...and finally, (e) this pristine narrow cove adjoins newly TDEC designated "Exceptional Tier II Waters", yet (TDEC, TVA, COE) admit to limited resources to do full environmental assessments of this natural treasure. A full EIS could get that done.

We object again to the pre-emptive, 'pre-approval' of the 200 ft boat ramp, an integral part of this same project, on same site, by same applicant. This piecemealing violates regulations requiring all related permit applications be submitted and reviewed at same time. 33 CFR 325.1(d)(2), 40 CFR 1502.4 & 1508.24 (CEQ Regs).

Furthermore, to allow this "Preserve Marina Owners" project to be considered separately from the massive 1200 acre "Preserve at Pickwick" *parent project*, (with a multitude of past, present, future permits, involving nearby shorelines, upland areas, adjoining public land, wetlands, nearby state park, same watershed, and more), seems tantamount to piecemeal reviewing vs. considering the 'big-picture' impact, (as 'Friends of Pickwick' suggested to both TDEC and TVA officials many months ago). As we now know, this 'non-segmented' approach is addressed in regulations mandating "proposals, or related parts of proposals, reasonably related to same project", should be included (or evaluated) in the same application. NEPA regs define connected and cumulative actions that must be considered in same document (EA or EIS). Piecemealing violates both the letter and spirit of regulatory requirements.

On behalf of residential and recreational "Friends of Pickwick" and for reasons stated, we formally request officials enforce established regulations, honor formal policies and deny this permit to "Preserve Marina Owners Assn Inc." Please preserve Haw Branch. Prevent the inevitable, significant adverse, direct, indirect and cumulative impact that this highly questionable project would have on these vanishing natural resources and the public trust.

Barbara Tigrett & Doris Jackson Jibeault, Co-founders, "Friends of Pickwick, Inc.", Established 2000

* TVA Official direct quote in "Commercial Appeal" Editorial 9/4/00, that opposed proposed land swap involving same exact area TVA - now seems to support developing. (?)

FYI..3/6/07...FROM FOIA INFORMATION FINALLY REC'D By Friends of Pickwick, after MONTHS of requests thru channels (for environmental info presented by TVA during proposed Pickwick land swap in 2000) then FOIA starting 1.18.07. This is page 5 of 416 total pages...from application by developer for land swap...saying "HAW BRANCH would become FOREVER PROTECTED and undeveloped cove...enhance boaters', fishermen's, recreational use because of privacy and the NATURAL HABITAT of existing terrain and WETLANDS area." Altho, front of this cove was to be developed if land swap had not failed (due to land appraisal discrepancies we exposed - \$474K vs. over \$3 Million!)...THIS CONFIRMS WHAT WE'VE SAID ALL ALONG...that TVA officials said in 2000 that back of cove COULD NOT/WOULD NOT be eligible for any development permits due to environmental restrictions on natural habitat, shorelines, adjacent wetlands...which was the very reason developer wanted to swap it off for "high value shorelines" in front of Haw Branch and only only other undeveloped public lands in area, Lower Anderson cove. SO WHY THE TOTAL ABOUT-FACE NOW BY TVA by fast-tracking/facilitating new permit approvals, denying any potential "adverse impact" of new proposed development?

ALSO...Even tho we have requested this and IG information repeatedly for MONTHS, it arrives the day before the FINAL DEADLINE FOR PUBLIC COMMENTS on permits submitted by PRESERVE MARINA OWNERS ASSN INC for this same cove. There is no way we can review all 416 pages in 24 hours, evaluate and submit comments based on this very important and pertinent information. WE FORMALLY REQUEST A 30-60 DAY EXTENSION SO WE CAN REVIEW INFORMATION FINALLY RECEIVED AND SO TVA/COE CAN REVIEW/ADDRESS OTHER UNRESOLVED ISSUES AND RESPOND TO OTHER VALID QUESTIONS WE'VE SUBMITTED (Environmental parameters, models & NEPA).

PLEASE RESPOND TODAY! Barbara Tigrett & Doris Jackson Jibeault, Friends of Pickwick 3/6/07

FYI...FROM FOIA INFO REC'D 3.6.07...Page 2, TVA Land Swap Application from Pickwick Developer 2000.

Anticipated Economic Impacts of your Project:

A. Projected cost estimate and funding source (if project is to be completed in phases, please include time schedule and costs for each phase):

This land transfer would be constructed in 2 phases. Phase I - west side of Haw Branch. Start date 2005 and completion date 2010. Cost will be \$4,000,000. -This includes infrastructure, roads, utilities, etc.

Phase II will start in 2010 and be completed in 2020. Cost will be \$5,000,000

B. Number of jobs to be created - Near -Term (including construction) 50
Long - Term N/A

C. Negative socioeconomic impacts considered:

There wouldn't be any since it would provide more residential developments

D. Expected public and investor benefits:The public benefits would be something that both developer & TVA already both agree on. Haw Branch would become a forever protected and undeveloped cove. This would enhance boaters' fishermen's, and recreational use of the lake because of the privacy and the natural habitat of the existing terrain and wetlands area. As an investor, it economically allows Montana Land Co. to develop property which adjoins it and that already has more than 50% of the necessary infrastructure in place to market said property

10. Describe Anticipated Environmental Impacts: (Include copies of reviews, assessments, or letters from federal or state agencies)
Minor and insignificant impact resulting from storm water.

11. Alternative Site(s) Considered: (Include justification for rejecting alternate locations; attach explanation if needed)
N/A

12. List all permits, approvals, or certifications required by other federal, state, or local agencies: (include those required for any structure, construction activity, discharge or other activities described in this application)

Issuing Agency	Type Approval	Identification Number	Date of Application	Date of Approval
(A) State of TN	ARAP for minor road crossings			
(B) NPDES State	Storm Water Permit for construction activity was renewed in 1999.			

13. Has any agency denied approval for the project described herein or any activity related to the project?
 No Yes (If "Yes", attach explanation)

development which would result if land or landrights are granted.

Send your completed request to the TVA Resource Stewardship Watershed

Tennessee Valley Authority

**TENNESSEE VALLEY AUTHORITY
INSTRUCTION
IX ENVIRONMENTAL REVIEW**

4.5 "Important farmland" includes prime farmland, unique farmland, and farm land of Statewide importance as defined in 7 CFR, part 657 (1981).

5.0 Procedures

5.1 Action Formulation and NEPA Determination

Each office within TVA is responsible for integrating environmental considerations into its planning and decision making process at the earliest possible time to ensure that potential environmental effects are appropriately considered to avoid potential delays and to minimize potential conflicts. Environmental analyses are to be included in or circulated with and reviewed at the same time as other planning documents. This responsibility is to be carried out in accordance with the environmental review procedures contained herein.

The General Manager and Board of Directors are the major decision points within the agency for TVA's principal programs that are likely to have a significant effect on the quality of the human environment. Alternatives considered by the General Manager and Board of Directors shall be encompassed by the range of alternatives discussed in relevant environmental documents, and the General Manager and Board of Directors shall consider the alternatives described in relevant EISs.

At the earliest possible time, the office proposing to initiate an action will initially determine the level of environmental review required for a specific action. The level of review will be in one of the following categories:

	<u>Procedure</u>
Categorical Exclusions	5.2
Environmental Assessments	5.3
Environmental Impact Statements	5.4

5.2 Categorical Exclusions

Categories of actions listed in this section are those which do not normally have, either individually or cumulatively, a significant impact on the quality of the human environment and require neither the preparation of an EA nor an EIS. The office proposing to initiate an action shall determine, in consultation with the Environmental Quality Staff as appropriate, whether or not the proposed action is categorically excluded. An action which would normally qualify as a categorical exclusion shall not be so classified if: (1) the proposed action could have a potentially significant impact on a threatened or endangered species, wetland or floodplain, cultural or historical resource, important farmland, or other environmentally significant resource; or (2) substantial controversy over the significance of the environmental impacts associated with the proposed action has developed or is likely to develop. Categorical exclusion actions are:

1. Routine operation, maintenance, and minor upgrading of existing TVA facilities.
2. Technical and planning assistance to State and local organizations.
3. Personnel action.
4. Procurement activities.
5. Accounting, auditing, financial reports, and disbursement of funds.
6. Contracts or agreements for the sale, purchase, or interchange of electricity.

Categorical Exclusion Checklist for Proposed TVA Actions

Categorical Exclusion Number Claimed	Organization ID Number RLR176005	Tracking Number (NEPA Administration Use Only) 14282
Form Preparer Angela M Polly	Project Initiator/Manager Angela M Polly	Business Unit RSOE - Resource Stewardship
Project Title 26a Category 3 RLR176005 The Preserve Marina Owner Association, Inc. Pickwick Reservoir		Hydrologic Unit Code 06010201-240
Description of Proposed Action (Include Anticipated Dates of Implementation) <input checked="" type="checkbox"/> Continued on Page 3 (if more than one line) For Proposed Action See Attachments and References		
Initiating TVA Facility or Office Pickwick-Wheeler Watershed Team	TVA Business Units Involved in Project	
Location (City, County, State) For Project Location see Attachments and References		

Parts 1 through 4 verify that there are no extraordinary circumstances associated with this action:

Part 1. Project Characteristics

Is there evidence that the proposed action---	No	Yes	Information Source
1. Is major in scope?	X		Polly A. M. 01/25/2007
2. Is part of a larger project proposal involving other TVA actions or other federal agencies?	X		Polly A. M. 01/25/2007
*3. Involves non-routine mitigation to avoid adverse impacts?	X		Polly A. M. 01/25/2007
4. Is opposed by another federal, state, or local government agency?	X		Polly A. M. 01/25/2007
*5. Has environmental effects which are controversial? X		X	For comments see attachments
*6. Is one of many actions that will affect the same resources?	X		Polly A. M. 01/25/2007
7. Involves more than minor amount of land?	X		Polly A. M. 01/25/2007

* If "yes" is marked for any of the above boxes, consult with NEPA Administration on the suitability of this project for a categorical exclusion.

Part 2. Natural and Cultural Features Affected

Would the proposed action---	No	Yes	Per- mit	Comm- mit	Information Source for Insignificance
1. Potentially affect endangered, threatened, or special status species?	X		No	No	For comments see attachments
2. Potentially affect historic structures, historic sites, Native American religious or cultural properties, or archaeological sites?	X		No	No	For comments see attachments
3. Potentially take prime or unique farmland out of production?	X		No	No	Polly A. M. 01/25/2007
4. Potentially affect Wild and Scenic Rivers or their tributaries?	X		No	No	Polly A. M. 01/25/2007
5. Potentially affect a stream on the Nationwide Rivers Inventory?	X		No	No	Polly A. M. 01/25/2007
6. Potentially affect wetlands, water flow, or stream channels?	X		No	No	Simbeck D. J. 11/15/2006
7. Potentially affect the 100-year floodplain?	X		No	No	Polly A. M. 01/25/2007
8. Potentially affect ecologically critical areas, federal, state, or local park lands, national or state forests, wilderness areas, scenic areas, wildlife management areas, recreational areas, greenways, or trails?	X		No	No	Simbeck D. J. 11/15/2006
9. Contribute to the spread of exotic or invasive species?	X		No	No	For comments see attachments
10. Potentially affect migratory bird populations?	X		No	No	Simbeck D. J. 11/15/2006
11. Involve water withdrawal of a magnitude that may affect aquatic life or involve interbasin transfer of water?	X		No	No	Simbeck D. J. 11/15/2006
12. Potentially affect surface water?	X		No	No	For comments see attachments
13. Potentially affect drinking water supply?	X		No	No	Simbeck D. J. 11/15/2006
14. Potentially affect groundwater?	X		No	No	Simbeck D. J. 11/15/2006
15. Potentially affect unique or important terrestrial habitat?	X		No	No	Simbeck D. J. 11/15/2006
16. Potentially affect unique or important aquatic habitat?	X		No	No	Simbeck D. J. 11/15/2006

Part 3. Potential Pollutant Generation

Would the proposed action potentially (including accidental or unplanned)---	No	Yes	Per- mit	Commit- ment	Information Source for Insignificance
1. Release air pollutants?	X		No	No	Polly A. M. 01/25/2007
2. Generate water pollutants?	X		No	No	Polly A. M. 01/25/2007
3. Generate wastewater streams?	X		No	No	Polly A. M. 01/25/2007
4. Cause soil erosion?	X		No	No	Polly A. M. 01/25/2007
5. Discharge dredged or fill materials?	X		No	No	Polly A. M. 01/25/2007
6. Generate large amounts of solid waste or waste not ordinarily generated?	X		No	No	Polly A. M. 01/25/2007
7. Generate or release hazardous waste (RCRA)?	X		No	No	Polly A. M. 01/25/2007
8. Generate or release universal or special waste, or used oil?	X		No	No	Polly A. M. 01/25/2007
9. Generate or release toxic substances (CERCLA, TSCA)?	X		No	No	Polly A. M. 01/25/2007
10. Involve materials such as PCBs, solvents, asbestos, sandblasting material, mercury, lead, or paints?	X		No	No	Polly A. M. 01/25/2007
11. Involve disturbance of pre-existing contamination?	X		No	No	Polly A. M. 01/25/2007
12. Generate noise levels with off-site impacts?	X		No	No	Polly A. M. 01/25/2007
13. Generate odor with off-site impacts?	X		No	No	Polly A. M. 01/25/2007
14. Produce light which causes disturbance?	X		No	No	For comments see attachments
15. Release of radioactive materials?	X		No	No	Polly A. M. 01/25/2007
16. Involve underground or above-ground storage tanks or bulk storage?	X		No	No	Polly A. M. 01/25/2007
17. Involve materials that require special handling?	X		No	No	Polly A. M. 01/25/2007

Part 4. Social and Economic Effects

Would the proposed action---	No	Yes	Commit- ment	Information Source for Insignificance
1. Potentially cause public health effects?	X		No	Polly A. M. 01/25/2007
2. Increase the potential for accidents affecting the public?	X		No	Polly A. M. 01/25/2007
3. Cause the displacement or relocation of businesses, residences, cemeteries, or farms?	X		No	Polly A. M. 01/25/2007
4. Contrast with existing land use, or potentially affect resources described as unique or significant in a federal, state, or local plan?	X		No	Polly A. M. 01/25/2007
5. Disproportionately affect minority or low-income populations?	X		No	Polly A. M. 01/25/2007
6. Involve genetically engineered organisms or materials?	X		No	Polly A. M. 01/25/2007
7. Produce visual contrast or visual discord?	X		Yes	For comments see attachments
8. Potentially interfere with recreational or educational uses?	X		No	Polly A. M. 01/25/2007
9. Potentially interfere with river or other navigation?	X		No	Polly A. M. 01/25/2007
10. Potentially generate highway or railroad traffic problems?	X		No	Polly A. M. 01/25/2007

Part 5. Other Environmental Compliance/Reporting Issues

Would the proposed action---	No	Yes	Commit- ment	Information Source for Insignificance
1. Release or otherwise use substances on the Toxic Release Inventory list?	X		No	Polly A. M. 01/25/2007
2. Involve a structure taller than 200 feet above ground level?	X		No	Polly A. M. 01/25/2007
3. Involve site-specific chemical traffic control?	X		No	Polly A. M. 01/25/2007
4. Require a site-specific emergency notification process?	X		No	Polly A. M. 01/25/2007
5. Cause a modification to equipment with an environmental permit?	X		No	Polly A. M. 01/25/2007
6. Potentially impact operation of the river system or require special water elevations or flow conditions??	X		No	Polly A. M. 01/25/2007

"The economic aspect of the deal is its most questionable element."
(From this Commercial Appeal editorial, Sept 5, 2000)

FACT: WITH AREA LAKE LOTS IN THE \$200K RANGE, TVA APPRAISED THE 23 TVA ACRES OF "HIGH VALUE SHORELINE" IT WANTS TO SWAP TO BIG DEVELOPER AT ONLY \$474,600. IN RETURN FOR THIS MULTI-MILLION DOLLAR FAVOR, MR. CLAUSEL WILL TRADE IN 164 ACRES OF OFF-SHORE LAND THAT HE PAID \$1200. AN ACRE FOR IN '96, LAND TVA NOW APPRAISES FOR \$457,600 EVEN THO MUCH OF IT HAS BEEN CLEAR-CUT!

"Give light and the people will find their own way."

THE SWAP

TVA promotes iffy proposition at Pickwick

THE PUBLIC might benefit from the trade of 23 acres of lakefront property at Pickwick for 164 hilly, wooded acres nearby. But that proposition remains to be demonstrated.

The Tennessee Valley Authority, the publicly owned utility that owns the 23 acres, has never put the property on the market. The swap with the Savannah, Tenn.-based Montana Land Co. was arranged privately, with inadequate exploration of available options

The arrangement proposed by the company would put 164 acres of land along the upper end of Haw Branch under TVA control, in exchange for the prime lakefront property near the mouths of Lower Anderson Cove and Haw Branch.

The agency no longer needs the 23 acres -- some of which TVA retained as part of a safety harbor to shelter recreational and commercial navigators in distress -- because the designated harbor was moved to the

south side of the lake several years ago.

Proponents argue that putting the undeveloped acres to use as a public hiking and fishing area would represent the highest and best use of the land. But more than 200 people have signed petitions opposing the exchange because they believe it would cause environmental damage and cheat TVA ratepayers.

The economic aspect of the deal is its most questionable element. Lakefront lots on the north shore of Pickwick are listed at prices between \$175,000 and \$250,000. The shore is quickly becoming crowded with vacation and retirement homes that sell for a half-million dollars or more.

The property TVA would get in return for its 23 acres can be developed, but it is farther from the main body of the lake and worth less on the market. A TVA spokesman says the trade conforms to the federal utility's "maintain-or-gain" policy, which is designed to protect environmental and recreational benefits available to the public along the shorelines of TVA reservoirs.

A 50-foot-wide buffer along the shoreline below the land given to the developer would help protect the lake's water quality. But it would have negligible effect on the value of the property.

A hiking and fishing area for general public access surely would be a valuable addition to the recreational opportunities of the Pickwick Lake area. Some of the property has been clear-cut for commercial purposes, but it abounds with springs, streams, forests and wildflowers.

The question is whether that new recreational area could be obtained at a lesser price. According to a TVA spokesman, a TVA appraisal indicates the land it would give up and the property it would receive in the swap are of comparable value. That is a questionable assertion, however, in the absence of actual bids.

Critics have additional concerns about the esthetic effects of the deal, which would allow development on land near the mouths of two coves that now offer an uncluttered view of the Pickwick shoreline.

The sheer rate of development on the shores of the lake is an-

other reason for opposition to the land swap. To others, the proposed exchange simply has the appearance of favoritism toward a major local developer.

Eddie Clausel, chief manager for Montana Land, points to the favorable amount of acreage the public would get in the deal, the benefits to the Hardin County tax base and the inevitable development of other lakeside property on land the company owns. That assessment may be valid, but the way TVA is making this deal is the problem.

An environmental review of the project is nearing completion and public comments on the deal are being reviewed. TVA's three-member board is expected to make a final decision later this year.

THE BOARD should send this deal back for reconsideration. It leaves too many questions unanswered about some of the public's most attractive real estate.

Critics make waves over TVA's proposed Pickwick land swap

By Tom Charlier
The Commercial Appeal

COUNCE, Tenn. — Casting a curious glance at passing boaters, a deer wanders onto a limestone outcropping at water's edge along a wooded cove of Pickwick Reservoir known as Haw Branch.

At almost any other spot on the booming north shore of Pickwick, the animal couldn't have reached the lake without sidestepping freshly turned dirt, new foundations and pilings supporting half-million-dollar vacation and retirement homes under construction.

But in Haw Branch, towering pines, sycamores and white oaks still envelop rustling reeds. Boaters entering the cove hear only the calls of birds and see only the veil of vegetation on rugged hillsides.

Under a proposed property exchange with a major developer, this area soon could belong to the Tennessee Valley Authority, which plans to preserve it for hiking and similar kinds of public recreation.

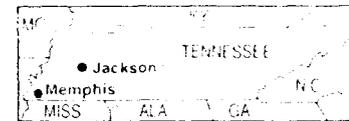

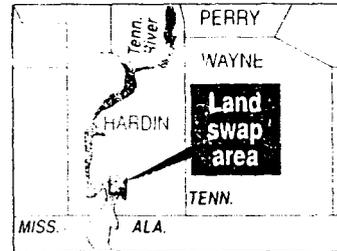

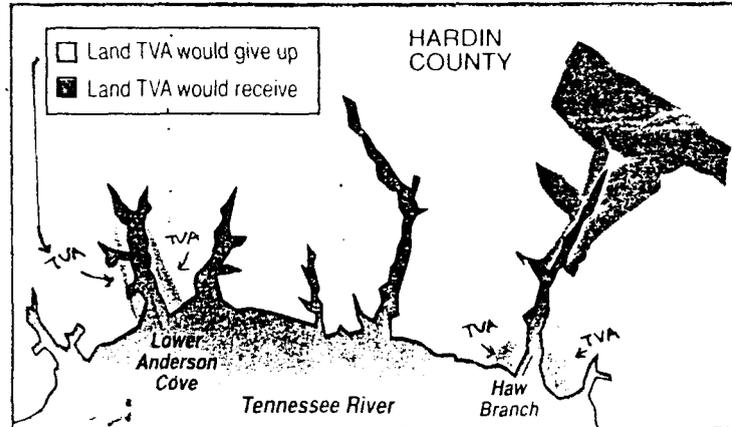

But to many area residents and lake-users, the cost of the deal appears as steep as the land itself. More than 200 of them recently signed petitions opposing the exchange between TVA and Montana Land Co., which is based in Savannah, Tenn., charging it would cause environmental damage and cheat ratepayers.

The deal, proposed by the company, would bring the federal utility 164 acres that Montana Land owns along the upper end of Haw Branch. In exchange, TVA would give up 23 acres of prime lakefront

Pickwick land swap

Under a proposed land exchange on the north shore of Pickwick Reservoir, the Tennessee Valley Authority would give a major developer, Montana Land Co., 23 acres of lakefront property near the mouths of two coves in exchange for 164 acres along the upper end of Haw Branch.

Area shown

land near the mouths of Lower Anderson Cove and Haw Branch.

TVA is reviewing public comments and wrapping up an environmental assessment of the proposal. The matter eventually will go before the federal utility's three-member board, with a final decision expected later this year.

While the deal would give Montana Land prime acreage for more high-dollar home sites, TVA officials contend the public would benefit as well.

With the exchange, some of the fast-dwindling undeveloped land on the lake will be preserved for recreation, agency officials say.

"One of our interests is to protect natural resources and provide the public the opportunity to use those resources in an undeveloped setting," said TVA spokesman Tim Meeks.

"As development goes on, it's securing a place that would be suitable for public involvement."

The swap, Meeks said, is consistent with the agency's "maintain-or-gain" policy, which is designed to protect the environmental and recreational benefits available to the public along the shorelines of TVA reservoirs.

The agency contends it no

To: "Barbara Tigrett" <imagery@mindspring.com>
1 Attachment, 188 KB

Barbara:

I have attached a copy of the report on Haw Branch below. This report does not have the list of aquatic insects collected as I did not have that saved electronically. I can fax you this, however, if you want it. Bottom line is, it scored the highest possible score for the biological component and a 176 out of 200 possible points on the habitat assessment. Haw Branch (east fork only) is now our 1st order 65J ecoregion reference stream based on this recent assessment. This means that this stream will be used to compare all other 1st order 65J streams to when determining their ability to support fish and aquatic life. Haw Branch (east fork only) is also classified as exceptional waters because of its high biological score.

This assessment of Haw Branch does not extend downstream of the confluence of Haw Branch with its embayment. Our Division currently does not have a biological scoring system established for reservoirs/embayments.

Hope this information is helpful to you.

Amy Fritz, Division of Water Pollution Control
Jackson Environmental Field Office

• EMAIL FROM
AMY FRITZ/TDEC
JACKSON EFO
After she told me 2/7/07
about assessment of
"wetlands" (area streams
in back of Haw Branch)
as "Exceptional Tier II Waters!"
Jack Wade, TDEC suggested
I call Amy about this - study
of East Fork/stream only. I ask
about under studies, downstream.
Also mentioned comment by Greg DeHaven
(TDEC) last year - saying all ONWR waters (Tier I)
in east TN except Reelfoot. + Exceptional Tier II

FROM FOIA INFO 2601/LAND SWAP AP 100

5

Anticipated Economic Impacts of your Project:

A. Projected cost estimate and funding source (if project is to be completed in phases, please include time schedule and costs for each phase):

This land transfer would be constructed in 2 phases. Phase I - west side of Haw Branch. Start date 2005 and completion date 2010. Cost will be \$4,000,000. This includes infrastructure, roads, utilities, etc.
Phase II will start in 2010 and be completed in 2020. Cost will be \$5,000,000

B. Number of jobs to be created - Near - Term (including construction) 50
Long - Term N/A

C. Negative socioeconomic impacts considered:

There wouldn't be any since it would provide more residential developments

D. Expected public and investor benefits: The public benefits would be something that both developer & TVA already both agree on. Haw Branch would become a forever protected and undeveloped cove. This would enhance boaters' fishermen's, and recreational use of the lake because of the privacy and the natural habitat of the existing terrain and wetlands area. As an investor, it economically allows Montana Land Co. to develop property which adjoins it and that already has more than 50% of the necessary infrastructure in place to market said property

10. Describe Anticipated Environmental Impacts: (Include copies of reviews, assessments, or letters from federal or state agencies)

Minor and insignificant impact resulting from storm water.

11. Alternative Site(s) Considered: (Include justification for rejecting alternate locations; attach explanation if needed)

N/A

12. List all permits, approvals, or certifications required by other federal, state, or local agencies:

(Include those required for any structure, construction activity, discharge or other activities described in this application)

Issuing Agency	Type Approval	Identification Number	Date of Application	Date of Approval
(A) State of TN	ARAP	for minor road crossings		
(B) NPDES	State Storm Water Permit	for construction activity	was renewed	in 1999.

13. Has any agency denied approval for the project described herein or any activity related to the project?

No Yes (If "Yes", attach explanation)

Send your completed request to the TVA Resource Stewardship Watershed Team listed below:

A complete request should include:

1. This completed application form and a check or money order with Social Security Number on the check made payable to "TVA" for the appropriate land transaction fee.
2. A location map indicating the area of TVA land or landrights affected by the project.
3. Drawing(s) or plan(s) of any proposed construction activity or development which would result if land or landrights are granted.

TO TVA: FORMAL REQUEST TO REVOKE PRE-APPROVED PERMIT FOR NEW MARINA BOAT RAMP PLUS...RESUBMITTING 3 REQUESTS. SEE BELOW.

We request meeting with site visit with officials to verify location, length of docks, no dredging claims, etc. but TVA refuses, even tho Rep admits to multiple meetings with developer to prepare permit app. Is public entitled to equal access of officials & info?

1200 ACRE "THE PRESERVE" By EXQUISITE DEVELOPMENT Destin, Florida & MONTANA LAND CO. Savannah, Tennessee DEVELOPERS

"PRESERVE MARINA OWNERS" BOAT RAMP
(Demand to Revoke TVA Permit, 1.26.07)

FYI...DEVELOPERS PLANS SHOW A 'FULL SERVICE MARINA' HERE...BUT PERMIT AP SAYS JUST 'COMMUNITY DOCKS + 200' BOAT RAMP'
EITHER WAY...ADVERSE IMPACT DEVASTING ON PUBLIC LANDS & THIS LAST PRISTINE COVE

OUR BEST GUESS... LOCATION OF PROPOSED BOAT DOCKS NOT CLEAR
1/19...WE CHALLENGED TVA ON DOCK WIDTH RESTRICTIONS (COVE SO NARROW), SUSPECT 'NO DREDGING' CLAIMS FOR BOAT DOCKS & RAMP. ASK FOR SITE VISIT TO VERIFY SPECS (DENIED). PERMIT INFO LACKING.

MAP ADAPTED FROM TVA MAPS IN FOIA

FYI: MAP SHOWING SITE OF THE PROPOSED ("PRE-APPROVED") 200 FOOT BOAT RAMP...IN PERMIT APPLICATION SUBMITTED TO TVA BY "PRESERVE MARINA OWNERS ASSOCIATION INC.," AND QUICKLY APPROVED BY TVA, DEC 20, 2006 WITH NO PUBLIC NOTICE OR PROPER REVIEWS. FYI: DEVELOPER PAID \$200. PERMIT FEE ON DEC 18, PERMIT APPROVED 2 DAYS LATER, WITH WORK PERMITTED TO START LESS THAN 7 WORKING DAYS LATER, ON NEW YEARS DAY. THIS HAS THE APPEARANCE OF A "FAST-ONE" IN MORE WAYS THAN ONE. THESE NEW DETAILS DISCOVERED 1/26 IN FOIA INFO. WE FORMALLY REQUEST PERMIT BE REVOKED ('26a', Sec 2(e), TVA 17416):

Permit may be revoked by TVA by written notice if...adverse impact on public lands...(boat ramp is but a few feet away from public lands we saved from land swap in 2000...and will have an extremely adverse impact on the water quality, aquatic and wildlife habitat, '99 SMI shoreline restrictions, plus endangered species, wetlands both noted in area in past). Also TVA/NEPA regs bar "environmentally controversial" projects from (CE) exclusions. TVA reps say "no adverse impact"...TVA lawyer says it's their call if project is environmentally controversial or not. FYI: TVA well aware of public outcry to protect these public lands for years, and recently. Documentation available.

'FRIENDS OF PICKWICK' CHALLENGED THE VALIDITY OF TVA'S EXPEDITED, BACKDOOR, PRE-APPROVAL OF THE BOAT RAMP IN EMAILS TO TVA & THE CORPS OF ENGINEERS ON 1.19.07 AND PUBLICALLY AT THE TVA BOARD MEETING IN MEMPHIS 1.25.07. THIS UPFRONT EXCLUSION BY TVA ALLOWS THE BOAT RAMP TO BE IMPROPERLY EXCLUDED FROM OVERALL 'ENVIRONMENTAL ASSESSMENT' FOR PROPOSED NEW BOAT DOCKS FOR MARINA.

- DUE TO THIS & OTHER IRREGULARITIES, WE SUBMITTED (1/19) 4 REQUESTS:**
- (1) REVIEW/REVOKE BOAT RAMP EXCLUSION. REVISE 'EA' TO INCLUDE IT WITH DOCKS.
 - (2) JOINT MEETING REQUEST WITH TVA/USACE REPS (& SITE VISIT) TO REVIEW SPECS.
 - (3) A 60 DAY EXTENSION ON PUBLIC COMMENT END 2/12, TO CLARIFY KEY ISSUES/INFO.
 - (4) A FULL 'ENVIRONMENTAL IMPACT STUDY' (VS. ROUTINE 'EA') DUE TO MANY FACTORS.

* All structures developed, except those to be saved from Land Swap in 2003.

HELP PRESERVE NOT DESTROY

LAST PRISTINE COVE & SAFE SAFE HARBOR IN OUR AREA

Back of cove and inlet are narrow. Gently sloping, shorelines at site of boat docks/slips for 50+ boats, belie 'no dredging' claims in lieu of draft needed, even at summer pool water levels. During site visit (2.22.07), officials underestimate actual depth of docks/slips, by 10-12 feet, not to mention adverse environmental impact on pristine habitat, water quality and more.

PICKWICK BOATERS ASSOCIATION

P.O. BOX 204 . PICKWICK DAM , TN 38365-0204

21 January 2007 09 MAR 2007

We the undersigned newly elected officers of Pickwick Boaters Association, do hereby express support for our sister group, "Friends of Pickwick's" long-time efforts to preserve and protect Haw Branch Cove, the last remaining pristine cove in this area...and very important safe harbor for recreational boaters.

Furthermore, we urge officials at TVA and the Corps of Engineers to respond positively to recent formal requests relating to questionable exclusions, request for joint site meeting, public comment period extension and a full 'Environmental Impact Study' vs. the more routine 'Environmental Assessment' planned.

The Pickwick Boaters Association, Inc. has represented hundreds of boating families for years, many who have treasured the natural beauty and recreational opportunities Pickwick offers for generations. We urge you to preserve Haw Branch Cove for future generations of wildlife, families, fishing and safe harboring.

NOTE: BONNIE BLAIR WIDOW OF FOUNDER OF PBA LIFETIME MEMBER

PICKWICK BOATERS ASSOCIATION, INC
P.O. BOX 204 , PICKWICK DAM, TN 38365-0204

21 August 2006

Commissioner Jim Fyke and,
Deputy Commissioner Paul Sloan
Tennessee Department of Environment & Conservation

Dear Commissioners,

We appreciate this opportunity to express our support for the recent formal requests submitted by our sister group, "Friends of Pickwick" (as we all certainly are). As you know, we have many PBA members who have been boating, fishing and enjoying Pickwick's natural beauty for decades - generations of families, (and many newcomers) who all treasure natural shorelines, wildlife habitat, unspoiled coves and important safe harbors for recreational boaters. As our membership continues to grow, so does our interest in trying to preserve the balance between private development, preservation efforts, public safety and trust.

We encourage you to review serious regulatory enforcement problems that continue to threaten water quality, natural shorelines and scenic beauty that attracts millions of visitors to Pickwick Lake every year.

The Board of Directors of Pickwick Boaters Assn. , urges you to apply TDEC's vast resources and environmental commitment to preservation efforts to protect the last pristine cove in this area as a Permanent Natural Resource Area. We ask you to please help prevent the major dredging, development and proposed wetland filling that threatens to destroy scenic beauty and diminishing wildlife habitat - for aquatic life, eagles, osprey, herons, and endangered species noted nearby. We've appreciated your past attention to previous PBA concerns, and have faith that you will give these serious issues the attention they deserve.

We trust we can rely on your support to help preserve water quality , natural shorelines and habitat in Haw Branch Cove for future generations of wildlife, fishing, families and as safe harbor for recreational boaters.

Sincerely,

David Caughron, President,
Pickwick Boaters Association

**SPECIAL THANKS TO EVERYONE WHO SIGNED
OUR RECENT PETITION TO "SAVE OUR COVES".
YOUR SUPPORT CRITICAL TO KEEPING PRESSURE
ON TO GET ANSWERS & ACTIONS WE STILL NEED!**

Thanks again PBA and everyone from the Friends of Pickwick Lake
Boaters Assn. August 21, 2006

Subject: Pickwick Lake

We've been boating at Pickwick Lake for years. We USED to park out over night and enjoy the evening and sometime watch deer come down to drink. Now you can hardly fine a place to park your boat just to swim. There only a few coves left, PLEASE don't ruin our last cove.

Many Thanks, Mr. & Mrs A. A. Ison

Subject: Haw Brance

Please safe Haw Branch from commercial/residential development. This is one of the last coves that recreational boaters need for their exclusive use. We certainly don't need another marina with their high slip rental and gas prices. Right now even the State Park Marina is gouging us on gas prices. Their is no control over these places once they are their.

Thanks for letting us appeal.

Subject: HAW BRANCH COVE

We stand in strong objection to the development of this last safe haven in our part of Pickwick (Pickwick State Park). More and more poorly planned and executed development is defacing this shoreline and destroying the peace and quiet that we, as boaters, and the wildlife of the area so much enjoy. Please don't let this happen!

Subject: RE: Haw Branch development

Dear Ms Robinson,

It has come to my attention that developers are trying to construct a marina in Haw Branch on Pickwick Lake. To allow such a development is a travesty to the environment. Too much development and lax policy enforcement by TVA officials is already very evident by other developments where trees have been clear cut to the waters edge. Please do not allow this development. It will have a negative impact on the environment. The only thing that allowing this development will do is line the pockets of the developers and politicians who allow it.

Yours Truly,

Bess McMillan

Re: Preserve full service marina

On Thursday, 22 February 2007, we (friends of Pickwick) had our on site visit. It was apparent how narrow the Haw Branch cove was. The boat ramp was under construction. The ramp was not to have been started and yet was well underway before the time period had expired. What will the Corp do about this? It would appear the ramp is partly on public land.

The marina plans A dock and B dock has them a 165' across when it really is 120'. The back of Haw Branch is not that wide (165') in the back, C dock plans has it at 140' wide where calls for it to be 108' when in fact the cove is less than 100'.

When we were in the back of the cove close to the boat ramp in question, it was obvious how narrow the back was. The Tennessee Wildlife Resources Agency (TWRA) has inspected the cove and stated in a letter that their plans would not meet the 1/3 1/3 1/3 requirement without extensive dredging.

The boat docks would extend into the water 42'. The slips are 24'. The average boat is approximately 40' which would add another 16' to the 42' and would extend out into the water 58'.

The Corp plans to let this big full service marina operate under a 26a permit. This is unheard of. Then is the Corp going to approve dredging when asked for?

It would be unconscionable to destroy this beautiful cove with the Wildlife, Eagles, Heron and wet lands and Exceptional Water with Tier=2 rating of 176 out of 200.

I have owned property on Pickwick Lake since 1960. Anyone wanting a boat dock would be required to get a 26a permit. Some of the applicants have been disapproved. Now a full service marina under a 26a permit has been given the green light.

If the Preserve management would alter their plans to Bluff Creek, I'm sure they would be approved.

Ms. Robinson,

This email is to oppose the development of Haw Branch Mile 209.6 on the Tennessee River for marina purposes by The Preserve Marina Owners Assn. This is one of the few undeveloped coves on the river in this area. Many boaters enjoy having this cove to enjoy the natural beauty. Developing this cove for the enjoyment of few, would destroy many wildlife habitats and have adverse environmental impact.

Thank you for your consideration.

Dear Ms. Bell:

Apparently an application by "Preserve Marine Owners Assoc" has been made to put in a bunch of boat slips in Haw Branch Cove at Pickwick Lake. (mile 209.6)

I am 100% against this proposal. This is the only deep water cove near the dam that hasn't been spoiled by shoreline development. I have no objections to houses being built, but putting in boat slips would benefit only a very few, and harm the many thousands of people who would like to visit or fish in this naturally beautiful cove. Once lost, it can never be replaced.

Sincerely yours,

Robinson, Amy M LRN

RE: Haw Branch Cove (Mile 209.6), Pickwick Lake

Dear Ms Robinson:

I have been a boater and property owner at Pickwick Lake for many years. Cove by cove developers are taking away the pristine nature of why I, and many others, have enjoyed Pickwick Lake. I urge TVA and Corps of Engineers to prevent any type of development of Haw Branch. This is the last pristine cove in the area and it is imperative that such natural habitats be free of any residential or commercial venture.

Please deny any permits for construction of any type including the boat facilities proposed by The Preserve Marina Owners Association. It is imperative that Haw Branch remain in its natural state for future generations of wildlife... and for our children and grand children to enjoy. There are plenty of boat slips available at Pickwick, but wildlife and natural areas are rapidly disappearing with continued development.

I would be happy to discuss this issue in more detail. Please feel free to contact via phone or email at your convenience.

Sincerely,

Jerry Ehrlich

I'm sixty now and I still love pickwick lake. When I was a boy my dad would carry me fishing on the lake, we never caught many fish but I loved being outside one with nature. It's becoming harder and harder to find a place like Haw Branch where you can get away from it all and relax and not have to listen to mankind. I urge you to keep some areas closed to development so that the not- so -rich public will still have a piece of this magnificent area. I hope someday to have a grandson to take fishing and he too can have this wonderful experience.

Respectfully, Rick Blount

Robinson, Amy M LRN

Subject: Haw Branch Pickwick Mile 209.6

Amy,

I am asking that the Corp to fairly enforce regulations and policies in the protection of Haw Branch and adjacent public lands from the adverse effect of proposed development by the people of "The Preserve Development". In 2000 TVA officials stated this cove is undevelopable due to width, adjacent protected wetlands and critical habitat. Now the Preserve wants a marina in Haw Branch which would clearly mandate the desruction of most of the trees with significant dredging and a multitude of developmental activity that is in direct conflict to what has already been established by TVA.

The value of Pickwick Lake is it's protected pristine character and a development of one of the most pritine coves left on pickwick lake, Haw Branch, would change the charater of this area that would be irreversable threatening critical habitat and turning it into a boat hotel for the privelege of only a few.

I am asking that you oppose the proposed marina development by the Preserve and actually PRESERVE HAW BRANCH.

Thank you for your consideration,

Sincerely,

Greg and Stephanie Basye

Amy

Please consider the attached comments when processing this permit application. Could you also forward this to the appropriate individual at the Muscle Shoals office, TVA?

Thank you,

Amy Fritz

5 March 2007 (With current public comment period scheduled to end in two days, 3.7.2007)

This (began as) a letter version of the original e-mail with formal requests (see page two) sent on 2.26.07 to TVA: Tom Kilgore, Susan Tidwell, Stanford Davis, J. Kenley Austin, and to COE: Ron Gatlin, Amy M. Robinson, Bradley Bishop.

Re: SERIOUS ISSUES, URGENT FORMAL REQUESTS: Following 2.22 joint site visit (that we'd been requesting for over 5 weeks), with TVA & COE officials.

FYI: Meeting to review specs/on site for controversial "pre-approved" 200 ft boat ramp permit and proposed "Preserve MARINA Owners Assn Inc" project for boat facilities (that developers' brochures and current website all describe as a "Full Service Marina & Storage" (vs. "community docks"), but both with adverse impact.

Note: While 2 extensions (21 days) have been granted by officials, this is effort by users of an organizers to initial requests, requests to meet information withheld (with) confirming provisions, reduce serious issues (details as follows)

AT ISSUE IS...a quarter of a mile+ of boat docks, 50-60 boat slips, headers, 160ft. watercraft pier, gangways, etc...proposed along natural shorelines in narrow back of pristine Haw Branch cove, Pickwick (Public Notice 07-01)...plus, 200 ft boat ramp that was pre-emptively "pre-approved" via a highly questionable TVA 26a permit (approved 2 days after \$200 fee was paid 12.18.06) and other discrepancies. Plus, due to indisputable substantial environmental controversy surrounding this project, the "Categorical Exclusion" given the boat ramp disregarded specific limitations outlined in NEPA Environmental Review regulations. As a result, the boat ramp, will/was not subject to the same environmental & regulatory reviews as all the boat docks, slips, etc for same project, by the same applicant, at same site, violating federal regulations barring 'piece-mealing' reviews or approvals, as referenced by Corps of Engineers official during 1.16.07 phone call, our first opportunity to discuss this Public Notice with officials following issuance by TVA / COE 1.12.07. Also at issue are specs (narrow cove vs. dock sizes), ramp location, adverse impact on water quality, aquatic habitat, natural shorelines, adjoining public land, adjacent "Exceptional Tier II waters" recreational and safety issues, as well. See TWRA letter, raising like concerns, challenging valid "one third of cove" compliance, requesting action be "held in abeyance", pending resolutions.

OUR PURPOSE IS CONSERVATION & COMPLIANCE...urging officials to enforce regulations and honor policies (as NEPA requires): "to make better decisions based on an understanding of environmental consequences, taking actions that protect, restore, enhance the human environment." Please consider the attached list of violations and actions, seemingly not in compliance with regulations, decision documents, and in stark contrast with commendable environmental policies.

We also urge local and Destin developers to seriously consider ample empirical/fiscal evidence of "overwhelming positive economic effect on property values" (up 20-33%) when passive and natural areas in proximity are preserved...not to mention the obvious PR and marketing value if "The Preserve at Pickwick" owners opted to live up to it's admirable namesake and 'Preserve' the last pristine cove as a *signature feature*, in this densely developed area of Pickwick lake. Afterall, within this 1200 acre project, there are miles of other shorelines available, better locations outside of Haw Branch, for these proposed boat facilities (and/or current published plans for a "Full Service Marina & Storage"?) We urge developers to *preserve, not destroy*, this last pristine cove for future generations of wildlife, area residents (including those in 'The Preserve') and countless visitors attracted to Hardin County for the recreational and natural scenic beauty more at risk now than ever, amidst the rampant development in this and other areas of Pickwick.

Furthermore, Friends of Pickwick goes on record again, refuting false claims by local officials and interested parties, that we oppose the project itself, or promised economic benefits to the area. We cannot and do not oppose 'The Preserve' in any way. Our sole goal is to try and save a small part of the last pristine cove in the area, just the narrow back of Haw Branch cove, behind the public lands we saved from a TVA/Montana Land Co land swap in 2000...same area TVA officials once described as "pristine, critical habitat, adjacent to protected wetlands and public lands... and *virtually undevelopable*" due to narrow width, natural areas and environmental restrictions.

FORMAL REQUESTS: We realize it's highly unlikely this developer will forsake potential profits for the more intangible 'win-win' in choosing to "Preserve" God's work in this pristine cove, but we also recognize his private property and access rights...as long as the project complies with all TVA/COE regs. But, at the same time, citizens have a right to expect that these regulations will be enforced, that formal environmental policies will be honored, on the ground...and, that public interest and involvement will be encouraged, not discouraged or discounted - even if it may conflict with in-house pre-conceived conclusions or other underlying issues. While we admire many of the individual agency pros we've met, there seems to be a culture in certain circles that resists inquiries or verifications, understandably perhaps. But, as a result, citizen groups seeking to grasp and participate in this complex process, may find it hard getting timely answers/actions, to valid questions, without repeated requests and help from the outside or higher-ups, especially under the pressure of short public comment deadlines, in a big, busy bureaucracy. For example, we've been denied very important pertinent public information (thru proper TVA channels, then FOIA) for over 7 months now...and it took us over 5 weeks just to get that on site meeting. Other response delays were explained by one TVA exec who warned - if you choose to direct questions to a higher level, (when other efforts fail), then you have to allow time for questions to "roll down, then roll back up" before you get answers. But, when a conservation group like ours is "under the gun" of looming comment deadline, what do we do? Seriously? We submitted these requests 2.26.07 and while officials responded with 7 day extension to 3/7, that was almost a week ago and still no answers. Yet, FINAL comment deadline is 2 days away again. Is this fair and meaningful public participation?

1. We formally requested (2/26) that flawed original Public Notice be withdrawn, pending review of all irregularities, then resubmitted properly as "one Notice for all proposed work", (as recent Corps email stated was "expected"), free of all discrepancies and full access to all requested information.
2. We formally requested (2/26) work stop on boat ramp that we'd first contested 1.16.07, due to regulatory violations prohibiting 'categorical exclusions' for controversial projects, bans on piecemeal approval process (according to COE official), and potential impact on public lands. Why did Corps officials appear to be re-examining issues, say original Public Notice "expected to be withdrawn", but then abruptly revert to terms of original Public Notice? Amidst this time-consuming confusion, we also asked TVA officials to make sure work did not proceed on the boat ramp pending resolution of those outstanding issues, but when we pulled into cove during site visit 2.22, we were shocked to see boat ramp already being built. Mr. Austin said he didn't know work already had begun. Was this "ask forgiveness later"? Officials later admit to "appearance" issues on ramp.
3. We also formally requested TVA revoke the boat ramp permit (per regs), since "the structure was not in accordance to approved plans". We discovered later, boat ramp was NOT being constructed at same location shown on approved plans (TVA 12.20.06). This is a clear 26a permit violation!
4. We formally requested confirmation of exact location of boat ramp...on public or private land? New location either adjoins or encroaches on public lands, contrary to location approved on 26a permit plans. TVA's Stan Davis agreed that topo map was not definitive proof either way. A cease and desist should be issued pending resolution of all these serious issues and permit violations.
5. Since 26a regs and CE's both bar any project with potential adverse impact on public land from qualifying for an "Exclusion" or 26a permit, why were these regs ignored, even tho there will be unmistakable adverse environmental impact on adjoining public lands? Also, on CEC boat ramp Environmental Checklist, why are most review notes dated 5 weeks after the permit was approved?

On behalf of hundreds of residential and recreational 'Friends of Pickwick' and future generations of wildlife, we urge TVA/COE officials to honor these requests and answer questions (submitted 2.26.07) and important NEPA clarifications (submitted 3.1.07). Please respond. Thank you.
