

### Shop Operations: Fabrication Services

When your repair or refurbishing project calls for new components, you'll find the expertise you need at TVA's Power Service Shops.

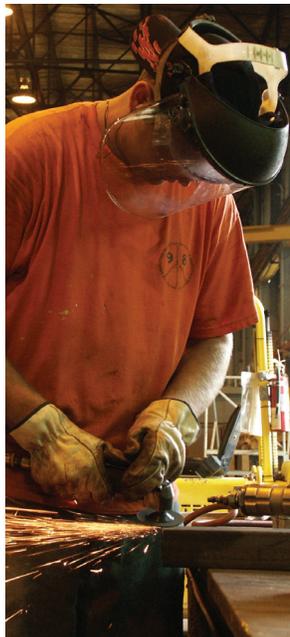

Our Structural Fabrication Shop employs five kinds of specialized craft workers:

- Boilermakers
- Steamfitters
- Sheet-metal workers
- Ironworkers
- Painters.

We can handle any type of fabrication and repair need, including nuclear QA and ASME code work. We can shear, break and roll plates up to two inches thick and 12 feet long, fabricate tube and pipe elements of any configuration, roll pipe and structural shapes, clean and test coolers, weld various metals, do sandblasting and painting, and train, test and certify welders.

These are a few of our typical products:

- Coal chutes
- Pressure vessels
- Expansion joints
- Sluice and wicket gates
- Heat shields
- Cribbing
- Racks
- Uniquely shaped covers
- Acid cleaning devices.

TVA has been in the power business for more than seven decades. That means a level of expertise honed over millions of work-hours at every type of plant and facility. Put that experience to work for your plant by contacting us today.
