

TVA Energy Efficiency Disaster Assistance Initiative

Business and Industry

Counties across the TVA service area have been affected by recent natural disasters (flooding, tornadoes, severe storms, and mudslides). To help affected businesses recover from these events, TVA is offering incentives to encourage eligible commercial and industrial business owners to install higher efficiency lighting and heating and cooling equipment as they rebuild, helping them save energy and money on future power bills.

For qualifying customers with a FEMA Registration Number, TVA and participating local power companies will offer simple, prescriptive incentives for installation of efficient lighting, HVAC systems, motors and food services equipment selected from a list of qualifying equipment. For affected businesses, TVA will waive pre-measurement requirements for qualifying installations. These incentives can be combined with other state and/or federal incentives.

Here are the basics:

- Install qualifying equipment upgrades (see application at www.energyright.com/commercial)
- Complete Business Incentive Application Package
- Return application with applicable receipts and/or invoices
- Receive incentives once application is processed and approved*

Who is eligible?

ALL commercial customers and industrial customers with a contract demand of 5,000 kW or less, located in federally declared disaster areas in the TVA service territory that have received a Federal Emergency Management Agency (FEMA) Registration Number are eligible.

How do I find out more information or start the process?

Contact your local power company, or call toll free at 1-866-233-0450.

When does this offer start and end?

This offer is available for properties affected by natural disasters beginning April 26, 2011, and ends December 31, 2011.

Who can make the improvements to my business?

Any contractor you choose can make improvements to your business.

What if I need help finding a contractor?

Contact your local power company or call 1-866-233-0450 for a list of TVA Preferred Partner Network (PPN) members.

This is a network of trade allies and energy services companies. These partners are qualified to supply technologies and equipment that deliver high-quality energy efficiency and demand response results.

What efficiency improvements are eligible for rebate?

All technologies covered under the EnergyRight® Solutions for Business-Standard Rebate are eligible, application can be found at www.energyright.com/commercial.

If I have already had my work done, can I get a rebate?

Businesses that have already had work done on their properties, and have a FEMA Registration Number, may qualify for a rebate.

How do I Participate?

1. Call toll-free 1-866-233-0450 for more information and to request an Incentive Application Package.
2. Complete the application and return to address provided with the following:
 - Signed Business Incentive Application
 - FEMA Registration Number
 - Receipts and/or Invoices with all required information as outlined in the Business Incentive Application Package
3. Receive incentives.*

**Some projects may be randomly selected as candidates for an onsite post installation review of the energy efficiency improvements. If this is the case, businesses will be notified and a representative will contact for scheduling.*
