

Natural Resource Plan

Linking the Vision, Strategy, and Policy

RRSC Meeting

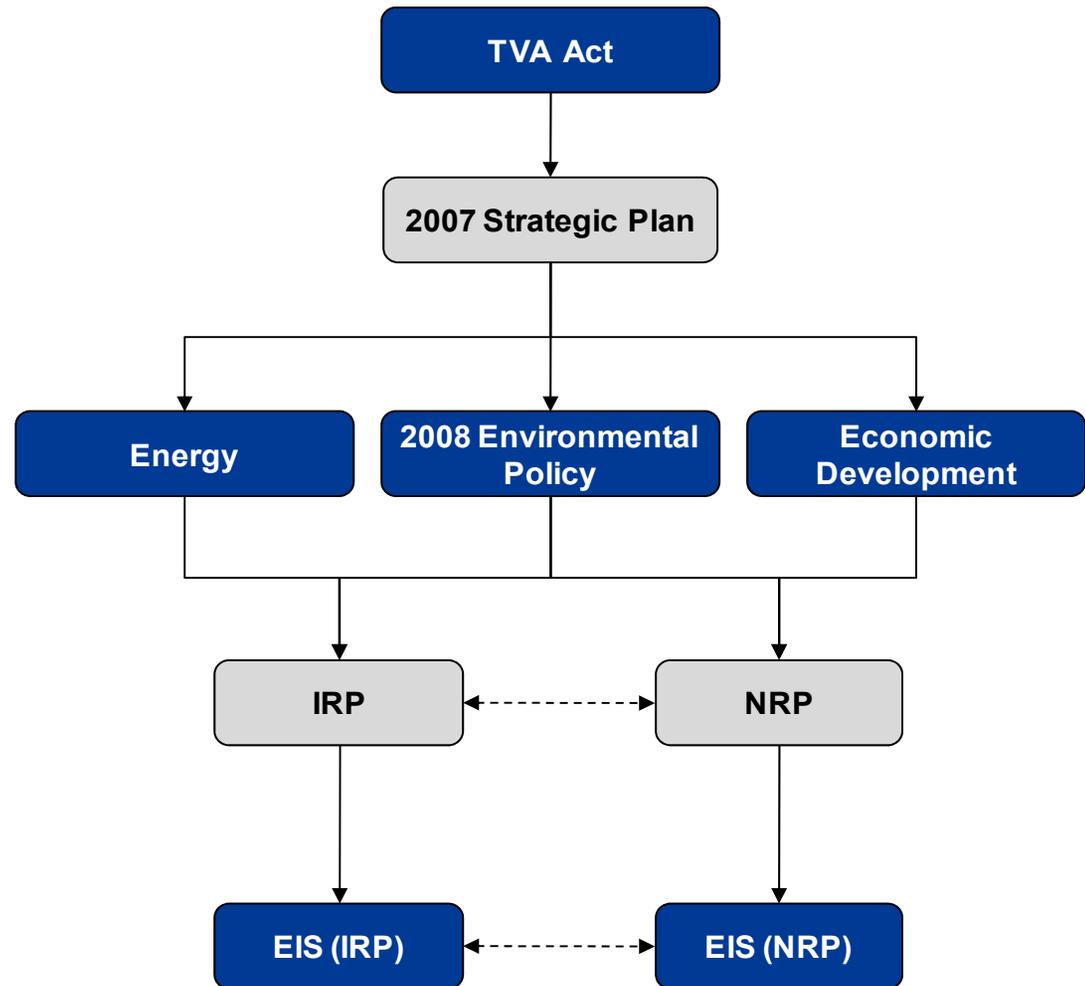

January 19-20, 2011

NRP – Linking the Vision, Strategy, and Policy: Overview

- ◆ The Integrated Resource Plan (IRP) and NRP are implementation plans for the 2008 Environmental Policy
- ◆ The two resource plans began as one planning effort but were split into separate projects
- ◆ The IRP will focus on the power supply portfolio, and the NRP will focus on water resources, biological and cultural resources, recreation, and lands planning
- ◆ Separate EISs are required to evaluate alternatives in the IRP and NRP
- ◆ All four documents – IRP, EIS (IRP), NRP, EIS (NRP) – will be synchronized as closely as possible during development

2011 will mark the Agency's first comprehensive Natural Resource Plan (NRP)
