

# Regional Resource Stewardship Council

January 19 & 20, 2011

## Questions for Discussion and Advice

1. We generally described the NRP process. Are there areas in the process that need to be strengthened? What other opportunities for input should we consider?
2. Are the Program Options appropriate, comprehensive, and easily understood? Are there “Flagship” ideas you’ve seen elsewhere that TVA should consider incorporating into the NRP?
3. Is the Natural Resource Economics Valuation process clear and credible?
4. The Benefits Weighting Exercise provided input for a cost-benefit analysis of NRP programs. Do you agree with the overall priorities as determined by the weighting?
