

TVA Board Committee Feedback

Anda Ray, Senior Vice President

Environment and Technology

Draft NRP Overview

Review of Recent Board Committee Feedback

◆ Overview:

- We recently met with the Customer and External Relations (C&ER) Board Committee to provide an update on the Natural Resource Plan (NRP)

◆ Feedback:

- Overall, the Board Committee feels we are making great progress in the development of the NRP
- Moving forward, they provided the following advice to incorporate in the final NRP:
 - Clearly articulate or define what we are going to do differently (than current) and how much it will cost
 - Design a more flexible and efficient lands planning process
- Also, the Board Committee was impressed with the RRSC guiding principles, specifically:
 - Managing the river comes with the responsibility, along with the TVA mandated mission on Stewardship, to do a first class job of managing the water, shoreline, and natural resources
 - Cost of all programs borne by rate payers and must be balanced with TVA's low-cost energy mission and economic development
