

SUPPLEMENT TO OFFERING CIRCULAR DATED MAY 18, 2000

\$250,000,000

# Tennessee Valley Authority

7.14% POWER BONDS 2000 SERIES F DUE MAY 23, 2012

---

*The attached Offering Circular dated May 18, 2000 (the "Offering Circular") relating to Tennessee Valley Authority's ("TVA") offering of \$750,000,000 principal amount of 7.14% Power Bonds 2000 Series F Due May 23, 2012 (CUSIP No. 880591 DL3) (the "Series F Bonds") is hereby supplemented by the information contained herein. Unless otherwise defined herein, all capitalized terms in this Supplement shall have the meanings assigned thereto in the Offering Circular.*

*In accordance with the terms of the Supplemental Resolution adopted by TVA's Board of Directors, as of February 17, 1999, TVA is issuing an additional \$250,000,000 of the Series F Bonds (the "Additional Bonds" and, together with the Series F Bonds initially issued, the "Bonds"). The Additional Bonds will be purchased solely by Morgan Stanley & Co. Incorporated at a purchase price of 102.125% of the principal amount thereof (\$255,312,500 in the aggregate) plus accrued interest from May 23, 2000 to the date of delivery. Morgan Stanley & Co. Incorporated proposes to offer the Additional Bonds from time to time for sale in one or more negotiated transactions, or otherwise, at market prices prevailing at the time of sale, at prices related to such prevailing market prices or at negotiated prices. For further information with respect to the plan of distribution and any discounts, commissions, or profits on resale that may be deemed underwriting discounts or commissions, see "The Underwriter" herein. It is expected that delivery of the Additional Bonds, in book-entry form, will be made through the book-entry system of the Federal Reserve Banks on or about July 11, 2000, against payment therefor in immediately available funds.*

*Except as affected by the modifications described herein, the terms of the sale of the Additional Bonds shall be as contained in the Offering Circular. The Additional Bonds shall be identical in all respects to the Series F Bonds initially issued. For federal and state income tax purposes the Additional Bonds should be treated as part of the same issue as the Series F Bonds initially issued.*

*The validity of the Additional Bonds will be passed upon for TVA by Edward S. Christenbury, Esq., General Counsel of TVA, and for the Underwriter by Orrick, Herrington & Sutcliffe LLP, 666 Fifth Avenue, New York, New York 10103.*

---

## TENNESSEE VALLEY AUTHORITY

### RECENT DEVELOPMENTS

#### Liquidity and Capital Resources

In May 2000, TVA issued in the public market \$750 million principal amount of Power Bonds (due 2012) (the original Series F Bonds) to retire existing debt. In June 2000, TVA issued in the public market \$1,000 million principal amount of Power Bonds (due 2030) to retire existing debt. On May 31, 2000, TVA's short-term debt owed to the U.S. Treasury was \$113 million.

#### Other Matters

The following text replaces the text in the "Other Matters" section of the Offering Circular.

In April 2000, TVA implemented the Wholesale Energy to Market Program. This experimental program provides an opportunity for distributors of TVA power to gain knowledge and experience about wholesale energy markets while limiting their exposure to risk. On a weekly basis, participating distributors may elect to purchase power (in an amount equal to up to 5 percent of the average weekly energy taken by the distributor from TVA during the TVA fiscal year beginning October 1, 1997) and arrange for its delivery to the TVA system. TVA credits each participating distributor's wholesale power bill for the amount of power the distributor arranges for delivery to the TVA power system at the prices TVA quotes weekly for these deliveries. Each participating distributor continues to be a full requirements customer of TVA and must pay any additional costs incurred by TVA in the event of any disruption of the delivery arrangements made by the distributor under this program.

In 1998, TVA unveiled a new clean air strategy. As part of this strategy, TVA now plans to install equipment that breaks down nitrogen oxide into nitrogen and water on a total of at least 13 units at various fossil plants. TVA currently expects that this strategy will reduce nitrogen oxide emissions from its coal fired plants by up to 168,000 tons per year by 2005. TVA currently anticipates the cost of implementing this strategy at these units to be about \$700 million. See "Environmental Matters" — "Air Pollution" in the current Information Statement.

The U.S. Court of Appeals for the District of Columbia recently upheld the U.S. Environmental Protection Agency's ("EPA") mandated revisions to State Implementation Plans for reduction of ozone transport (the "NO<sub>x</sub> SIP Call Rule"). See "Environmental Matters" — "Air Pollution" in the current Information Statement for a discussion of this rule. The stay of the requirement that states submit to EPA plans to comply with the NO<sub>x</sub> SIP Call Rule has been lifted, and the states are directed to submit complying plans by October 2000.

On May 4, 2000, TVA filed a petition for review in a federal appeals court seeking review of an administrative order issued to TVA in November 1999 by EPA. In that order, EPA alleged that TVA violated the Clean Air Act in the course of maintaining certain of its coal-fired generating units over the last two decades. (For more information about EPA's administrative order see "Environmental Matters" — "Air Pollution" in the current Information Statement). TVA brought legal proceedings after several months of settlement discussions with EPA produced no agreement. In the court case, TVA will ask the court to invalidate EPA's order because it is based on a new interpretation of the Clean Air Act that conflicts with the plain language of EPA's implementing regulations and previous EPA interpretations. Alabama Power, Duke Power and the Tennessee Valley Public Power Association ("TVPPA") have also petitioned for review of EPA's order to TVA, seeking to invalidate it. Georgia Power has moved to intervene in opposition to EPA. The U.S. Department of Justice ("DOJ") is seeking to have TVA's petition for review dismissed on the basis of DOJ's view that TVA lacks legal authority to file the petition and that EPA's order should not be viewed as "final." TVA disagrees with DOJ's view. Though it is not possible to predict with certainty the impact on TVA of EPA's enforcement action, if EPA substantially prevails in this matter, TVA could be required to incur capital costs in excess of \$3 billion and possibly be forced to implement substantial rate increases. These expenditures would be made over some period of years, perhaps as long as 10 to 15 years. Any additional

controls that TVA could be required to install on units as a result of this matter would, however, also be sufficient to comply with reduction requirements that are anticipated under other air quality programs. Thus, because of other environmental program requirements, TVA would, in any event, likely have to incur a substantial portion of the costs that might result from the EPA enforcement action, albeit the schedule for installation of the controls could be substantially accelerated by the EPA enforcement action. TVA currently estimates that the costs of such other programs could be in excess of \$2.5 billion.

TVA has been working closely with the TVPPA, the association that represents all distributors of TVA power, to further refine the consensus position on industry restructuring reached by TVA and the vast majority of the distributors of TVA power in September 1999. Recently, the consensus position on the TVA provisions to be included in national restructuring legislation was modified as follows: (1) simultaneous repeal of the "anti-cherry picking provision" and the "fence" (as these terms are used in the current Information Statement) would be effective on the effective date of the restructuring legislation rather than at a later time; (2) renegotiation of power contract terms would continue to be allowed for, but there would no longer be a one-year negotiation period required before distributors have the right to terminate the contract upon three years' notice; (3) distributors would have statutory rights to take partial requirements from other suppliers in the absence of reaching a different agreement with TVA on partial requirements; (4) most of TVA's existing regulatory roles with respect to distributors would be reduced rather than terminated; and (5) new TVA generation would be limited to *meet demand* within its current service territory rather than being limited to locations within its current territory without regard to demand. Other portions of the consensus position remain unchanged. See "Competition" in the current Information Statement. U.S. Senator Frist has introduced a bill in the Senate that incorporates the consensus position.

U.S. Representative Freylinghuysen has introduced a bill in the House of Representatives that would, among other things, require the sale of all TVA fossil and nuclear power plants and the termination of all of TVA's existing power supply contracts. While this bill, if enacted, would have a material adverse effect on TVA, TVA believes it is highly unlikely that this bill will be enacted or even considered by Congress.

In addition to the installation of the new peaking capacity described in "Power System" — "Generating Resources" in the current Information Statement, TVA plans to install an additional eight 85 MW natural gas combustion turbines in 2002. TVA also plans to purchase either two combined cycle generating units (500 MW total capacity) or two power steam cogeneration plants (455 MW total capacity) for installation in 2003.

#### **THE UNDERWRITER**

Subject to the terms and conditions set forth in an underwriting agreement (the "Underwriting Agreement") between TVA and Morgan Stanley & Co. Incorporated (the "Underwriter"), TVA has agreed to sell to the Underwriter and the Underwriter has agreed to purchase the Additional Bonds in the amount equal to 102.125% of the principal amount of the Additional Bonds. The Underwriting Agreement provides that the obligations of the Underwriter are subject to certain conditions precedent and that the Underwriter will be obligated to purchase all of the Additional Bonds if any are purchased.

The distribution of the Additional Bonds by the Underwriter is being effectuated from time to time in negotiated transactions or otherwise at varying prices to be determined at the time of each sale. In connection with the sale of any Additional Bonds, the Underwriter may be deemed to have received compensation from TVA equal to the difference between the amount received by the Underwriter upon the sale of such Additional Bonds and the price at which the Underwriter purchased such Additional Bonds from TVA. In addition, the Underwriter may sell Additional Bonds to or through certain dealers, and dealers may receive compensation in the form of underwriting discounts, concessions or commissions from the Underwriter and/or any purchasers of Additional Bonds for whom it may act as agent (which compensation may be in excess of customary commissions). The Underwriter may also receive compensation from the purchasers of Additional Bonds for whom it may act as agent.

TVA has been advised by the Underwriter that it intends to make a market in the Bonds, but it is not obligated to do so and may discontinue making a market at any time without notice.

In order to facilitate the offering of the Additional Bonds, the Underwriter may engage in transactions that stabilize, maintain or otherwise affect the price of the Bonds. Specifically, the Underwriter may over allot in connection with the offering, creating a short position in the Bonds for their own account. In addition, to cover over allotments or to stabilize the price of the Bonds, the Underwriter may bid for, and purchase, the Bonds in the open market. Any of these activities may stabilize or maintain the market price of the Bonds above independent market levels. The Underwriter is not required to engage in these activities and may end any of these activities at any time.

TVA has agreed to indemnify the Underwriter against certain civil liabilities or to contribute to payments the Underwriter may be required to make in respect thereof.

\*\*\*\*\*

Any statements in this Supplement involving matters of opinion, whether or not expressly so stated, are intended as such and not as representations of fact. This Supplement is not to be construed as a contract or agreement with the purchaser of any of the Additional Bonds.

TENNESSEE VALLEY AUTHORITY

By:           /s/ DAVID N. SMITH

*Chief Financial Officer*

Dated July 6, 2000

OFFERING CIRCULAR

\$750,000,000

Tennessee Valley Authority

7.14% POWER BONDS 2000 SERIES F DUE MAY 23, 2012

Interest Payable May 23 and November 23

The 7.14% Power Bonds 2000 Series F Due May 23, 2012 (the "Bonds") of the Tennessee Valley Authority ("TVA") will have the following terms. For more detail, see "Description of Bonds."

- The Tennessee Valley Authority — a corporation owned by the United States of America — is the issuer.
TVA will pay principal and interest solely from its Net Power Proceeds (as defined in "Description of Bonds" — "General").
The Federal Reserve Banks will maintain and transfer the Bonds as book-entry securities.
The Bonds will be available for purchase in minimum denominations of \$1,000 and additional integral multiples of \$1,000.
TVA will apply to list the Bonds on the New York Stock Exchange. See "Underwriting."
Principal and interest on the Bonds are generally exempt from state and local income taxes. See "Tax Matters."
TVA may not redeem the Bonds prior to maturity.
Subject to certain terms, conditions and limitations, each of the Bonds will be repayable at the option of the beneficial owner (together with the Holder, as defined herein), on May 23, 2002, at 100 percent of the principal amount plus any accrued interest to the date of repayment. See "Description of Bonds" — "Repayment."
The Bonds will bear interest at a rate of 7.14%. TVA will pay interest on the Bonds each May 23 and November 23, beginning November 23, 2000.

The Bonds are not obligations of the United States of America, and it does not guarantee the payment of the principal of or the interest on the Bonds. TVA is not required to register the Bonds under the Securities Act of 1933 or to make reports to the Securities and Exchange Commission under the Securities Exchange Act of 1934. TVA does not intend to register the Bonds or file any reports with the Securities and Exchange Commission.

Table with 4 columns: Description, Price to Public (1), Underwriting Discounts and Commissions, Proceeds to TVA (1) (2). Rows include Per Bond and Total.

(1) Plus any accrued interest from May 23, 2000, to date of delivery.
(2) Before deducting expenses payable by TVA estimated at \$50,000.

The Bonds offered by this Offering Circular are offered by the Underwriter subject to prior sale, withdrawal, cancellation or modification of the offer without notice, to delivery to and acceptance by the Underwriter and to certain further conditions. The Underwriter is required to purchase all of the Bonds if it purchases any of the Bonds. The Underwriter expects the Bonds will be delivered to it on or about May 23, 2000.

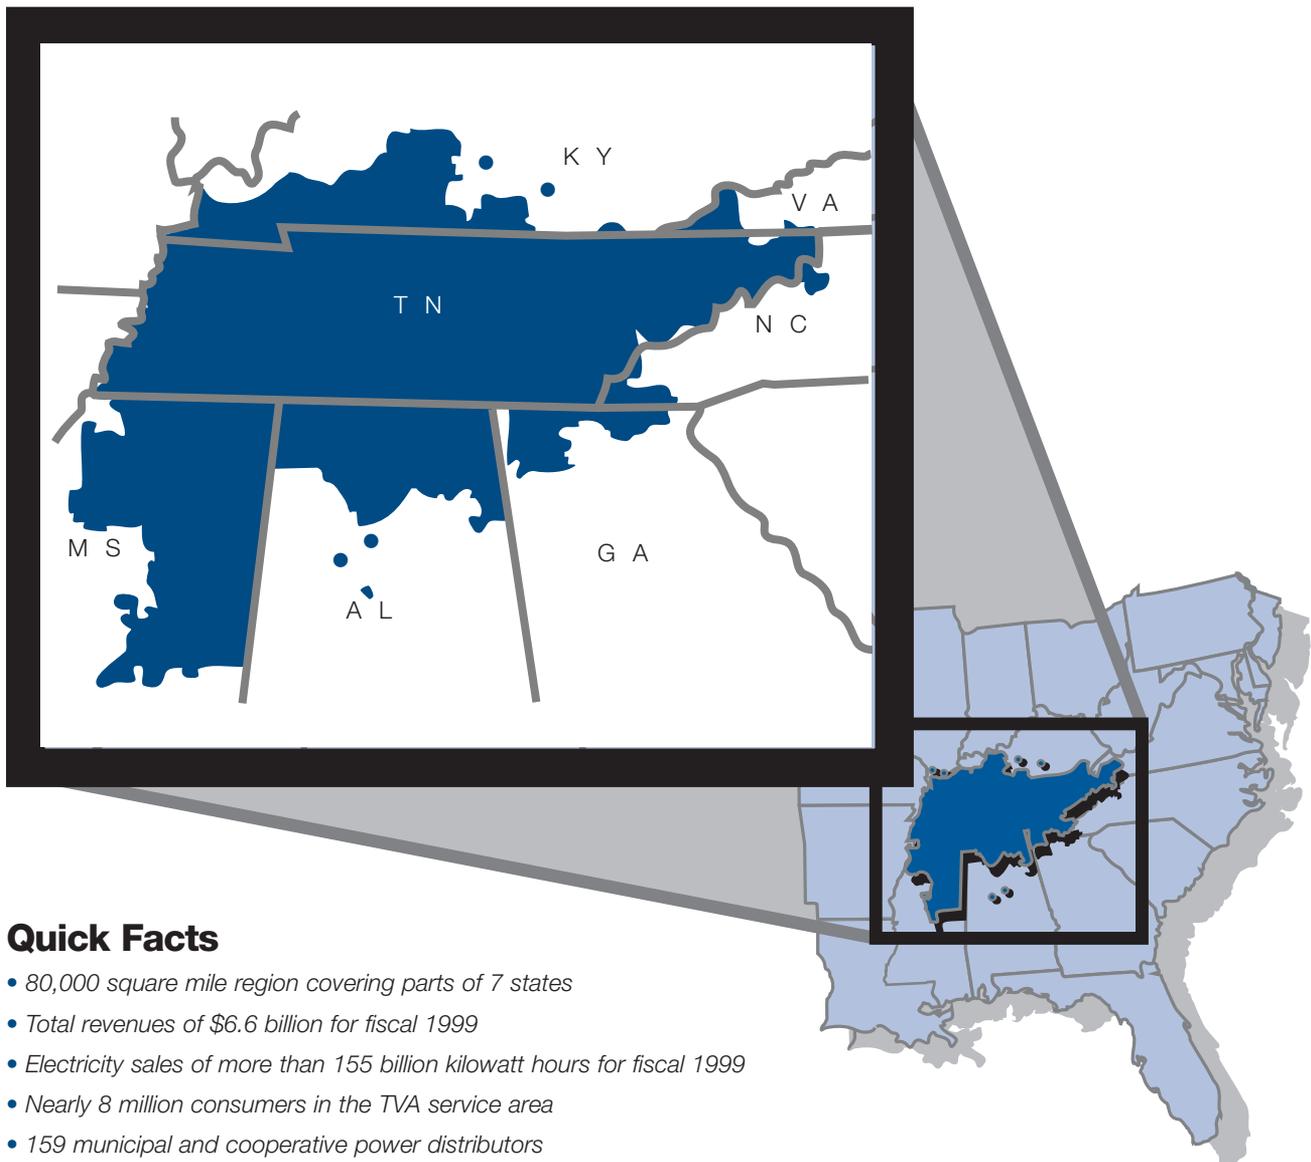

MORGAN STANLEY DEAN WITTER

May 18, 2000

## TVA Overview

The Tennessee Valley Authority (“TVA”) is a U.S. Government-owned corporation established by Congress in 1933. It is the nation’s largest wholesale producer of electricity with a net winter dependable capacity of 28,502 megawatts. TVA maintains about 17,000 miles of transmission lines and manages the nation’s fifth-largest river system for flood control, navigation, power production and recreation. TVA’s power program is 100 percent self-supporting from power revenues and proceeds from the issuance of debt.

## The Tennessee Valley Authority Service Area

## Quick Facts

- 80,000 square mile region covering parts of 7 states
- Total revenues of \$6.6 billion for fiscal 1999
- Electricity sales of more than 155 billion kilowatt hours for fiscal 1999
- Nearly 8 million consumers in the TVA service area
- 159 municipal and cooperative power distributors
- 63 directly-served industrial and federal customers
- New York Stock Exchange symbols

# PROVIDING POWER IN THE PUBLIC INTEREST

TVA is poised to remain a competitive player in what is predicted to be a new, highly competitive

electric utility market. With one of the largest generating

and transmission systems in the United States, TVA's power operations form a vital part of the nation's energy infrastructure.

TVA is more than a power company. In the nearly seven decades since its creation, TVA has been guided by the higher purpose of serving the public interest and promoting economic growth in the Tennessee Valley. TVA is a key partner in helping generate prosperity for the nearly eight million people living in the Tennessee Valley. TVA strengthens the regional economy by promoting economic development, supplying low-cost, reliable power and supporting a thriving river system. As the manager of the nation's fifth largest river system, TVA seeks a balance among the public's competing demands for recreation, water quality, water supply and other uses of this resource while operating its dams and reservoirs primarily for navigation and flood control and, to the extent consistent with these purposes, for hydroelectric generation. Today, TVA is recognized around the world as an expert in power production, flood control, river navigation and environmental quality.

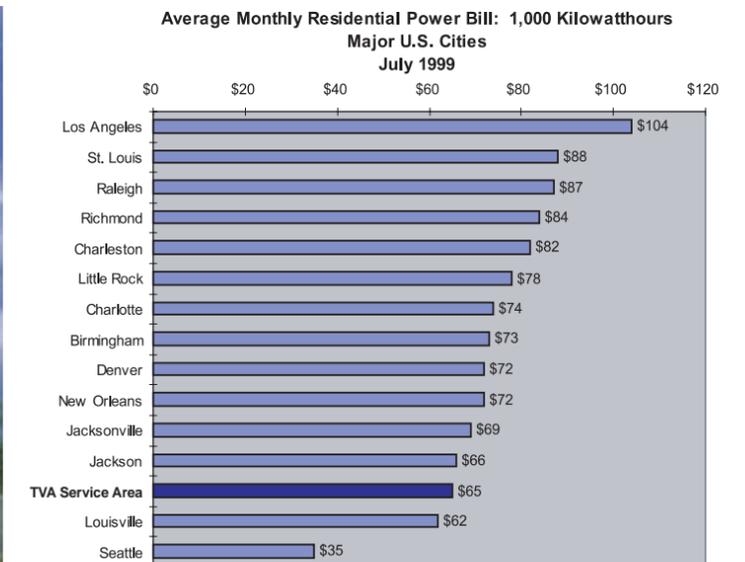

Because TVA's core product is so essential to so many, the reliability and availability of TVA's power plants and transmission system is a top priority. Through meticulous attention to maintenance and modernization, aggressive pursuit of greater

productivity and optimizing the use of assets, TVA is able to ensure its plants are ready when they are needed most. Commitment to reliability and availability has paid off consistently over the last 67 years, especially in the summer of 1999 when TVA set a new all-time peak of 28,295 megawatts.

Beyond assuring that TVA power is reliable and available, TVA has an obligation to ensure that its power is an affordable, competitive value. Consistent with its federal charter, TVA generates and transmits an ample supply of power to the people of the Valley at "rates as low as are feasible." As a result, TVA's energy prices are among the lowest in the nation. In addition, TVA's power program is 100 percent self-supporting from power revenues and proceeds from the issuance of debt.

Retaining its competitive position is important to TVA's success in a restructured environment. TVA recognized over a decade ago that the electric utility industry would undergo significant changes and has taken the necessary steps to prepare for an increasingly competitive environment.

In 1988 TVA began an aggressive program to reduce costs and hold prices steady. In addition, TVA unveiled an ambitious 10-Year Business Plan in July 1997 designed to ensure that TVA's price of power remains competitive in a restructured environment.

TVA is deeply committed to its role of sustaining and improving the quality of life in the Tennessee Valley. TVA will continue to support and enhance the economic prosperity of this region by supplying low-cost, reliable power, supporting a thriving river system and stimulating economic growth.

**THE UNDERWRITER OF THE BONDS MAY ENGAGE IN TRANSACTIONS THAT STABILIZE, MAINTAIN, OR OTHERWISE AFFECT THE PRICE OF THE BONDS. SPECIFICALLY, THE UNDERWRITER MAY OVERALLOT IN CONNECTION WITH THE OFFERING AND MAY BID FOR, AND PURCHASE, BONDS IN THE OPEN MARKET. FOR A DESCRIPTION OF THESE ACTIVITIES, SEE “UNDERWRITING.”**

*We have not authorized anyone to provide you with, and assume no responsibility for, information that is different from that contained in this Offering Circular and the attached Information Statement dated February 4, 2000 (the “current Information Statement”).*

You should read this Offering Circular together with the current Information Statement. This Offering Circular and the current Information Statement are accurate only as of the date of each. TVA assumes no duty to update the Offering Circular or the current Information Statement after the date of each. You should rely on information in the Offering Circular over different information in the current Information Statement.

You may request additional copies of this Offering Circular and the current Information Statement in writing or by telephone:

Tennessee Valley Authority  
400 West Summit Hill Drive  
Knoxville, Tennessee 37902-1401  
Attention: Vice President and Treasurer  
Telephone: (865) 632-3366.

You may inspect the Offering Circular and the current Information Statement and other information concerning TVA at the offices of the New York Stock Exchange, 20 Broad Street, New York, New York 10005.

This Offering Circular does not constitute an offer to sell or a solicitation of an offer to buy the Bonds in any jurisdiction to any person to whom it is unlawful to make an offer or solicitation.

## **FORWARD-LOOKING STATEMENTS**

This Offering Circular and the current Information Statement contain forward-looking statements relating to future events and future performance. Any statements regarding expectations, beliefs, plans, projections, estimates, objectives, intentions or assumptions or otherwise relating to future events or performance may be forward-looking.

Some examples of forward-looking statements include statements regarding TVA's projections of future power and energy requirements, future costs related to environmental compliance and targets for TVA's future competitive position. Although TVA believes that the assumptions underlying the forward-looking statements in this Offering Circular and the current Information Statement are reasonable, TVA does not guarantee the accuracy of these statements.

Numerous factors could cause actual results to differ materially from those in the forward-looking statements. These factors include, among other things, new laws, regulations and administrative orders, especially those related to restructuring of the electric power industry and various environmental matters; increased competition among electric utilities; legal and administrative proceedings affecting TVA; the financial environment; performance of TVA's generating facilities; fuel prices; the demand for electricity; weather conditions; changes in accounting standards; and unforeseeable events.

## SUMMARY OF OFFERING

*Because this is a summary, it does not contain all the information that may be important to you. You should carefully read the entire Offering Circular together with the current Information Statement. Capitalized terms used and not defined in this section have the meanings defined elsewhere in the Offering Circular and current Information Statement.*

### **Issuer**

TVA is a wholly owned corporate agency and instrumentality of the United States of America established by the Tennessee Valley Authority Act of 1933, as amended.

### **Securities Offered**

\$750,000,000 aggregate principal amount of 7.14% Tennessee Valley Authority Power Bonds 2000 Series F Due May 23, 2012.

### **Interest Payment Dates**

TVA will pay interest on the Bonds semi-annually in arrears from May 23, 2000, each May 23 and November 23, beginning November 23, 2000.

### **Interest Rate**

The Bonds will bear interest at a rate of 7.14%.

### **Redemption**

TVA may not redeem the Bonds prior to maturity.

### **Repayment**

Each of the Bonds will be repayable, at the option of the beneficial owner, together with the Holder, on May 23, 2002, at 100 percent of its principal amount plus any accrued interest to the date of repayment. To exercise this option, the beneficial owner, together with the Holder, must deliver a timely notice to TVA. TVA must receive the notice at the office specified herein no earlier than April 23, 2002, and no later than May 7, 2002. Once received, the notice will be irrevocable. See "Description of Bonds" — "Repayment."

### **Fiscal Agent**

The Federal Reserve Banks will act as TVA's Fiscal Agent.

### **Listing**

TVA will apply to list the Bonds on the New York Stock Exchange.

### **Use of Proceeds**

TVA will use the net proceeds from the sale of the Bonds to retire existing debt.

### **Source of Payment**

TVA will pay the interest and principal on the Bonds solely from its Net Power Proceeds. The Bonds are not obligations of or guaranteed by the United States. See "The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness" in the current Information Statement.

### **Form and Denomination of Bonds**

The Bonds will be issued and maintained only on the book-entry system of the Federal Reserve Banks. The Bonds may be held of record and transferred on the book-entry system only by entities eligible to maintain book-entry accounts on that system (such entities being referred to as "Holders"). Unless you are a Holder, you will hold your Bonds indirectly through a financial intermediary. See "Description of Bonds" — "Book-Entry System." You will not be able to exchange the Bonds for definitive securities. The Bonds will be issued, maintained and transferred in principal amounts of \$1,000.

### **Legality of Investment**

The laws of some jurisdictions limit the type and amount of securities that certain institutional investors may acquire. You should consult with your own counsel regarding legality of investment in the Bonds. Generally, Power Bonds are:

- acceptable as security for all fiduciary, trust and public funds, the investment or deposit of which is under the authority or control of any officer or agency of the United States;
- eligible as collateral for U.S. Treasury tax and loan accounts, unless otherwise specified by the U.S. Treasury;

- obligations that national banks may deal in, underwrite and buy for their own accounts in amounts up to 10 percent of their unimpaired capital and surplus;
- eligible as collateral for advances by Federal Reserve Banks to member banks;
- legal investments for federal savings associations and federal savings banks to the extent specified in applicable regulations;
- eligible as collateral for advances by Federal Home Loan Banks to members for which Power Bonds are legal investments; and
- legal investments for federal credit unions, subject to applicable regulations.

See “Legality of Investment.”

**No Acceleration Right**

Holders may not accelerate the maturity of the Bonds upon any default.

**Taxation**

The Bonds are subject to various tax consequences. Principal and interest on the Bonds are generally exempt from state and local income taxes. See “Tax Matters.”

**CUSIP Number**

880591 DL3

## TENNESSEE VALLEY AUTHORITY

The Tennessee Valley Authority is the nation's largest wholesale producer of electricity, having produced over 148 billion kilowatt-hours ("kWh") of electricity in fiscal year 1999. The TVA system supplies electric power to a region containing nearly eight million people located in parts of Tennessee, Kentucky, Mississippi, Alabama, Georgia, North Carolina and Virginia.

TVA is a wholly owned corporate agency and instrumentality of the United States of America established pursuant to the Tennessee Valley Authority Act of 1933, as amended (the "Act"), primarily to develop and manage the resources of the Tennessee Valley region. Historically, the programs at TVA have consisted of power and nonpower programs. The Act requires TVA's electric system operations to be self-supporting from power system revenues, which were about \$6.6 billion in fiscal year 1999. Congress does not appropriate funds to TVA for its power program. The Act authorizes TVA to issue Evidences of Indebtedness (as defined in "Description of Bonds"), the proceeds of which TVA may only use to finance its power program. TVA's nonpower activities have included responsibilities associated with operation of the Tennessee River system, land management, economic development and the environment. While Congress historically has appropriated amounts to fund TVA's nonpower programs (including \$50 million for fiscal year 1999), Congress passed legislation in 1997 providing for the funding of these programs with revenues from TVA's power program and other TVA revenue sources when appropriations are insufficient. TVA received no appropriations for fiscal year 2000. With continuing productivity improvements and cost savings in the power and nonpower areas, TVA expects to be able to fully fund essential stewardship activities in fiscal year 2000 while continuing to improve the overall financial performance of the power system. To carry out such programs in fiscal year 2000, TVA expects to spend approximately \$43 million more of power funds on these programs than it spent in fiscal year 1999. See "The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness" — "Recent Legislation" in the current Information Statement.

For over six decades, TVA has been associated with bringing prosperity to a significant region of the United States. Its dams have averted

an estimated \$4 billion in flood damage; its power program has brought electricity to a large undeveloped area of the country; and its economic development program has contributed to a vast increase in the number of jobs in the Tennessee Valley.

Electric power industry restructuring is changing the way TVA and utilities across the nation generate, transmit and distribute electricity. TVA is positioning itself to successfully compete in a restructured marketplace by sustaining excellent operational performance and achieving greater financial flexibility. Building on its sound operational foundation, TVA implemented its Ten-Year Business Plan in October 1997 to reduce its total delivered cost of power consistent with the forecast future market price of power and adopt a more flexible cost structure suitable for an increasingly volatile marketplace. See "Competition" in the current Information Statement.

TVA is an advocate for the public's interest in universal access, customer service and reliability, economic development and environmental protection. TVA will continue to work actively with Congress to ensure that these standards are upheld through the development of an equitable, effective framework for success in a restructured marketplace.

### USE OF PROCEEDS

TVA will use the net proceeds from the sale of the Bonds to retire existing debt.

### RECENT DEVELOPMENTS

#### Financial Results

TVA has derived the condensed financial statements for TVA's power program for the fiscal years ended September 30, 1999 and 1998, from TVA's audited financial statements. The condensed financial statements for TVA's power program for the six months ended March 31, 2000 and 1999, are unaudited, but in the opinion of management of TVA include all adjustments (consisting only of normal recurring adjustments) necessary for the fair presentation of results for such periods. You should read the following information together with the audited financial statements and notes thereto in the current Information Statement. Results for the six months ended March 31, 2000, and for past years are not necessarily indicative of future results.

**Results of Operations for the Six Months Ended March 31, 2000**

Fiscal year-to-date operating revenues were \$3,141 million compared with \$3,042 million for the same period last year. The \$99 million increase was primarily due to an increase in energy sales of approximately 2 billion kWh (or 2.7 percent) reflecting demand growth within the Tennessee Valley region.

Operating expenses for the six months ended March 31, 2000, were \$2,168 million compared with \$2,398 million for the same period last year. The \$230 million decrease was primarily due to a one-time \$217 million charge for the acceleration of the amortization of regulatory assets in December 1998.

Net interest expense declined \$28 million for the six months ended March 31, 2000, compared with the same period of fiscal year 1999. This reduction reflects lower average interest rates and a lower level of total outstanding debt during the first six months of fiscal year 2000 compared with the same period of 1999.

Results of operations for the six months ended March 31, 1999, reflect a one-time gain of \$217 million related to a change in accounting for pension costs, as well as a \$217 million charge related to accelerated amortization of certain regulatory assets.

**Liquidity and Capital Resources**

In February 2000, TVA issued in the public market \$65 million principal amount of Power Bonds (due 2005), \$35 million principal amount of Power Bonds (due 2010), \$25 million principal amount of Power Bonds (due 2015), \$25 million principal amount of Power Bonds (due 2020) and \$100 million principal amount of Power Bonds (due 2030) to retire existing debt. On April 30, 2000, TVA's short-term debt owed to the U.S. Treasury was \$134 million.

In December 1999, TVA redeemed all of its outstanding 1989 Series G Power Bonds due November 15, 2029, by issuing approximately \$2 billion in short-term notes. TVA anticipates refi-

nancing these notes as long-term debt as opportunities arise.

Net cash provided by operations increased \$174 million, from \$579 million to \$753 million for the six months ended March 31, 1999 and 2000, respectively. Net income increased \$146 million for the six-month period as compared with the same period of fiscal year 1999. Items not requiring cash declined by \$23 million for the six months ended March 31, 2000, as compared to the same period of last year. Net working capital requirements declined by \$51 million for the six months ended March 31, 2000, primarily due to an increase in accounts receivable and decrease in accounts payable.

Net cash used in investing activities increased by \$68 million, from \$465 million to \$533 million for the six months ended March 31, 1999 and 2000, respectively. Cash used in construction expenditures increased \$87 million for the six-month period as compared with the same period of fiscal year 1999. The increase is primarily due to the construction of natural-gas combustion turbines for new peaking capacity and capital spending for clean air projects. In addition, cash paid for nuclear enrichment and fabrication services declined \$8 million for the six months ended March 31, 2000, due to the timing of services received.

Cash flows used in financing activities decreased \$175 million, from \$496 million to \$321 million for the six months ended March 31, 1999 and 2000, respectively. TVA reduced debt by \$160 million for the six months ended March 31, 2000, as compared to a debt reduction of \$442 million for the same period of fiscal year 1999. Other financing costs increased \$107 million for the six months ended March 31, 2000, as compared to the same period of last year, primarily due to premiums paid to redeem approximately \$2 billion of power bonds in December 1999.

#### **Other Matters**

In April 2000, TVA implemented the Wholesale Energy to Market Program. This experimental program provides an opportunity for distributors of TVA power to gain knowledge and experience about wholesale energy markets while limiting their exposure to risk. On a weekly basis, participating distributors may elect to purchase power (in an amount equal to up to 5 percent of the

average weekly energy taken by the distributor from TVA during the TVA fiscal year beginning October 1, 1997) and arrange for its delivery to the TVA system. TVA credits each participating distributor's wholesale power bill for the amount of power the distributor arranges for delivery to the TVA power system at the prices TVA quotes weekly for these deliveries. Each participating distributor continues to be a full requirements customer of TVA and must pay any additional costs incurred by TVA in the event of any disruption of the delivery arrangements made by the distributor under this program.

In 1998, TVA unveiled a new clean air strategy. As part of this strategy, TVA now plans to install equipment that breaks down nitrogen oxide into nitrogen and water on a total of at least 13 units at various fossil plants. TVA currently expects that this strategy will reduce nitrogen oxide emissions from its coal fired plants by up to 168,000 tons per year by 2005. TVA currently anticipates the cost of implementing this strategy at these units to be about \$700 million. See "Environmental Matters" — "Air Pollution" in the current Information Statement.

The U.S. Court of Appeals for the District of Columbia recently upheld EPA's mandated revisions to State Implementation Plans for reduction of ozone transport (the "NO<sub>x</sub> SIP Call Rule"). See "Environmental Matters" — "Air Pollution" in the current Information Statement for a discussion of this rule. The stay of a key date in the NO<sub>x</sub> SIP Call Rule is expected to be lifted in the future.

On May 4, 2000, TVA filed a petition for review in a federal appeals court seeking review of an administrative order issued to TVA in November 1999 by the Environmental Protection Agency ("EPA"). In that order, EPA alleged that TVA violated the Clean Air Act in the course of maintaining certain of its coal-fired generating units over the last two decades. (For more information about EPA's administrative order see "Environmental Matters" — "Air Pollution" in the current Information Statement). TVA brought legal proceedings after several months of settlement discussions with EPA produced no agreement. In the court case, TVA will ask the court to invalidate EPA's order because it is based on a new interpretation of the Clean Air Act that conflicts with the plain language of EPA's imple-

menting regulations and previous EPA interpretations. Alabama Power, Georgia Power, Duke Power and the Tennessee Valley Public Power Association have also petitioned for review of EPA's order to TVA, seeking to invalidate it. The U.S. Department of Justice ("DOJ") has notified TVA that DOJ will seek to have TVA's petition for review dismissed on the basis of DOJ's view that TVA lacks legal authority to file the petition. TVA disagrees with DOJ's view. Though it is not possible to predict with certainty the impact on TVA of EPA's enforcement action, if EPA substantially prevails in this matter, TVA could be required to incur capital costs in excess of \$3 billion and possibly be forced to implement substantial rate increases. These expenditures would be made over some period of years, perhaps as long as 10 to 15 years. Any additional controls that TVA could be required to install on units as a result of this matter would, however, also be sufficient to comply with reduction requirements that are anticipated under other air quality programs. Thus, TVA would likely have to incur a substantial portion of the costs that might result from the EPA enforcement action because of other environmental program requirements, albeit the schedule for installation of the controls could be substantially accelerated by the EPA enforcement action. TVA currently estimates that the costs of such other programs could be in excess of \$2.5 billion.

TVA has been working closely with the Tennessee Valley Public Power Association ("TVPPA"), the association that represents all distributors of TVA power, to further refine the consensus position on industry restructuring reached by TVA and the vast majority of the distributors of TVA power in September 1999. Recently, the consensus position on what restructuring legislation regarding TVA should allow for was modified as follows: (1) simultaneous repeal of the "anti-cherry picking provision" and the "fence" (as these terms are used in the current Information Statement) would be effective on the effective date of the restructuring legislation rather than at a later time; (2) renegotiation of power contract terms would continue to be allowed for, but there would no longer be a one-year negotiation period required before distributors have the right to terminate the contract upon three years' notice; (3) most of TVA's existing regulatory roles with respect to distributors would be reduced

rather than terminated; and (4) new TVA generation would be limited to *meet demand* within its current service territory rather than being limited to locations within its current territory without regard to demand. Other portions of the consensus position remain unchanged. See "Competition" in the current Information Statement. U.S. Senator Frist has introduced a bill in the Senate that incorporates the consensus position.

In addition to the installation of the new peaking capacity described in "Power System" — "Generating Resources" in the current Information Statement, TVA plans to install an additional eight 85 MW natural gas combustion turbines in 2002. TVA also plans to purchase either two combined cycle generating units (500 MW total capacity) or two power steam cogeneration plants (455 MW total capacity) for installation in 2003.

## DESCRIPTION OF BONDS

### General

TVA will issue the Bonds under authority of the Tennessee Valley Authority Act of 1933, as amended (the "Act"), and pursuant to the Basic Tennessee Valley Authority Power Bond Resolution adopted on October 6, 1960, as amended on September 28, 1976, October 17, 1989 and March 25, 1992 (the "Basic Resolution"), and the Supplemental Resolution authorizing the Bonds adopted as of February 17, 1999 (the "Supplemental Resolution" and together with the Basic Resolution, the "Resolutions"). TVA entered into a Fiscal Agency Agreement dated as of October 7, 1997 (the "Fiscal Agency Agreement") with the Federal Reserve Banks, as fiscal agents (together, the "Fiscal Agent"). The Secretary of the Treasury has approved the time of issuance of and the maximum rate of interest to be borne by the Bonds, in compliance with Section 15d(c) of the Act. The Bonds are obligations of TVA only, payable solely from TVA's Net Power Proceeds. The Bonds are not obligations of or guaranteed by the United States of America.

The Act authorizes TVA to issue and sell bonds, notes and other evidences of indebtedness (collectively, "Evidences of Indebtedness") to assist in financing its power program and to refund such Evidences of Indebtedness. Section 2.2 of the Basic Resolution designates certain Evidences of Indebtedness as Tennessee Valley Authority Power Bonds ("Power Bonds"). The aggregate

amount of Evidences of Indebtedness outstanding at one time cannot exceed \$30 billion. As of March 31, 2000, TVA had approximately U.S. \$24.9 billion, Deutsche Mark 1.5 billion (issued in September 1996) and £200 million (issued in December 1998) of Evidences of Indebtedness outstanding. When TVA issued its Deutsche Mark and British pound sterling Evidences of Indebtedness, it entered into currency swap agreements to hedge against fluctuation in these currencies. For information regarding Power Bonds and the Basic Resolution, see “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness” — “Issuance of Additional Bonds and Other Evidences of Indebtedness” in the current Information Statement.

The summaries of certain provisions of the Act, the Resolutions and the Fiscal Agency Agreement are not complete and are entirely qualified by reference to the complete Act, Resolutions and Fiscal Agency Agreement. You may obtain complete copies of these documents by writing to **Tennessee Valley Authority, 400 West Summit Hill Drive, Knoxville, Tennessee 37902-1401, Attention: Vice President and Treasurer, or by calling (865) 632-3366.**

The Bonds will be Power Bonds. TVA will pay all interest and principal on the Bonds solely from its Net Power Proceeds. “Net Power Proceeds” are the remainder of TVA’s gross revenues from its power program,

*after deducting*

- the costs of operating, maintaining and administering its power properties (including multiple-purpose properties in the proportion that multiple-purpose costs are allocated to power) and
- payments to states and counties in lieu of taxes,

*but before deducting*

- depreciation accruals or other charges representing the amortization of capital expenditures,

*plus*

- the net proceeds of the sale or other disposition of any interest in TVA’s power properties that constitute an operating unit or system.

In accordance with Public Law No. 105-62, enacted in 1997, TVA is required, in the absence

of sufficient appropriations, to fund nonpower programs that constitute “essential stewardship activities” with revenues derived from one or more of various sources, including power revenues, notwithstanding provisions of the Act and Resolutions to the contrary. See the discussion of Public Law No. 105-62 in “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness” — “Recent Legislation” in the current Information Statement. Under the Supplemental Resolution, actions taken pursuant to Public Law No. 105-62 shall not be considered an event of default or breach under the Resolutions.

The Bonds will rank equally with all other Power Bonds in application of Net Power Proceeds. Power Bonds rank *senior as to principal* and *senior or on parity as to interest* with TVA’s other outstanding Evidences of Indebtedness. In the future, TVA may issue Evidences of Indebtedness other than Power Bonds that rank on parity with the Bonds as to principal. See “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness” — “Fourth Amendatory Resolution to the Basic Resolution” in the current Information Statement. For a further discussion of the application of the Net Power Proceeds, see “Certain Provisions of the Tennessee Valley Authority Act” and “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness” — “Application of Net Power Proceeds” in the current Information Statement.

Except as provided under the Act, the Basic Resolution and the Supplemental Resolution, there is no limit on other indebtedness or securities that TVA may issue and no financial or similar restrictions on TVA. TVA issues Discount Notes pursuant to Section 15d of the Act and in accordance with Section 2.5 of the Basic Resolution. TVA may also issue other indebtedness in addition to Power Bonds and Discount Notes. TVA issues other indebtedness, such as Quarterly Income Debt Securities, pursuant to Section 15d of the Act and under appropriate authorizing resolutions. See “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness” in the current Information Statement.

### **Possible Future Issuances**

The Supplemental Resolution provides that TVA may issue additional Bonds of any series in one or more future installments. TVA may do so,

without consent of the Holders (as defined in “Book-Entry System”) of the Bonds, by amending the Supplemental Resolution. Additional Bonds so issued must be identical in all respects to the Bonds originally issued, except for any appropriate related changes, including changes in the issue date, issue price and interest commencement date.

### **Payment of Principal and Interest**

The Bonds will consist of \$750,000,000 aggregate principal amount of 7.14% Tennessee Valley Authority Power Bonds 2000 Series F, due May 23, 2012 (the “Maturity Date”). TVA will issue the Bonds in \$1,000 denominations and additional integral multiples of \$1,000 in book-entry form only through the Federal Reserve Banks, as described below in “Book-Entry System.”

TVA will pay interest on the Bonds semi-annually in arrears each May 23 and November 23, beginning November 23, 2000. Each of these payment dates is an “Interest Payment Date.” These interest payments will include any interest accrued from and including May 23, 2000, or the preceding Interest Payment Date, to but excluding the relevant Interest Payment Date. Interest will be computed based on a 360-day year of twelve 30-day months. TVA will repay the principal amount of all outstanding Bonds, together with accrued but unpaid interest, on the Maturity Date. TVA will make principal and interest payments on the Bonds on the applicable payment dates to parties that are Holders of Bonds as of the close of business on the Business Day (as defined in the next paragraph) preceding such payment dates. TVA will make such payments by crediting the payment amount to the Holders’ accounts at the Federal Reserve Banks. **Holders and other financial intermediaries in the chain to beneficial owners are responsible for remitting payments to their customers.**

If an Interest Payment Date, the repayment date or the Maturity Date is not a Business Day, TVA shall make payment on the next succeeding Business Day, and this payment shall have the same force and effect as if made on the Interest Payment Date, repayment date or Maturity Date. A “Business Day” is any day except a Saturday, Sunday or day on which banking institutions in New York City are authorized or required by law or executive order to be closed.

### **Redemption**

TVA may not redeem the Bonds prior to maturity.

### **Repayment**

Each of the Bonds will be repayable on May 23, 2002, at the option of the beneficial owner, together with the Holder thereof, at 100 percent of its principal amount plus accrued interest thereon to the day of repayment. In order for a Bond to be repaid, the beneficial owner of the Bond, together with the Holder of the Bond, must notify TVA of their election and must return the Bond to TVA, as described below.

*Notification of election.* A beneficial owner that has elected to have a Bond owned by it repaid must, together with its Holder, complete an Option to Elect Repayment form, substantially in the form contained herein, in accordance with the instructions contained herein. TVA will provide the form and instructions at the Holder’s request. The Holder must submit the form to TVA. In order for a Bond to be repaid, TVA must receive the form at the office specified in the instructions for completing the form no earlier than April 23, 2002, and no later than May 7, 2002. As described under “Book-Entry System” below, a beneficial owner of a Bond will ordinarily hold the Bond through a Holder. Therefore, a beneficial owner of a Bond should determine from the relevant Holder the amount of notice that it will need to comply with the notice provisions for repayment described above. Notice of the exercise of this repayment option by any Holder of a Bond shall be irrevocable. After receipt of timely notice, TVA will assign a number (“Election Number”) to the notice.

*Return of Bond.* Any Holder that has submitted to TVA a completed Option to Elect Repayment form for a Bond, as described above, must also return the Bond to TVA. The Bond must be returned to TVA by close of business (for securities transfers on the book-entry system of the Federal Reserve Banks) on May 16, 2002. Delivery must be effected by free delivery, without simultaneous payment in exchange therefor, no later than the close of the securities wire on the book-entry system of the Federal Reserve Banks on the proper day to TVA’s account on the book-entry system of the Federal Reserve Banks. Thereafter, the Holder delivering the Bond will

not be listed on the book-entry system of the Federal Reserve Banks as the Holder or owner of the Bond. A delivery of a Bond for repayment that is not accompanied, in the related instructions transmitted on the book-entry system of the Federal Reserve Banks, by the correct corresponding Election Number assigned by TVA may be returned and will not be eligible for repayment on the repayment date.

### **Book-Entry System**

Pursuant to the Fiscal Agency Agreement, the Bonds will be issued and maintained and will be transferred only on the book-entry system of the Federal Reserve Banks in principal amounts of \$1,000 or integral multiples of \$1,000. The Federal Reserve Banks will maintain book-entry accounts for the Bonds and make principal and interest payments on the Bonds to Holders on behalf of TVA. The Federal Reserve Banks will make these payments by crediting Holders' Federal Reserve Bank accounts. You may not have Bonds exchanged for definitive securities.

Regulations governing the use of the book-entry system for the Bonds are contained in 18 C.F.R. Part 1314. These regulations relate primarily to the registration, transfer, exchange and pledge of the Bonds. Applicable Federal Reserve Bank operating circulars govern the accounts of Holders. Applicable Federal Reserve Bank operating circulars, TVA's book-entry regulations and any other federal book-entry regulations that may apply exclusively govern the Federal Reserve Banks' handling of, and rights, duties and obligations with respect to, the Bonds, notwithstanding inconsistent procedures or requirements of any depository or exchange.

Only entities eligible to maintain book-entry accounts with the Federal Reserve Banks may be record holders of the Bonds. "Holders" are those entities whose names appear on the book-entry records of a Federal Reserve Bank as the entities for whose accounts Bonds have been deposited. Though beneficial owners of Bonds may be Holders, beneficial owners will ordinarily hold Bonds indirectly through one or more financial intermediaries such as banks, brokerage firms and securities clearing organizations. Holders and other financial intermediaries in the chain to beneficial owners will be responsible for establishing and maintaining accounts of their respective

customers. A beneficial owner of a Bond may exercise its rights respecting TVA and the Federal Reserve Banks only through the Holder. TVA and the Federal Reserve Banks will have no obligation to a beneficial owner of a Bond that is not also the Holder. The Federal Reserve Banks will act only upon the instructions of Holders in recording transfers of Bonds.

### **Governing Law**

The Fiscal Agency Agreement and the Bonds shall be governed by and construed in accordance with the laws of the State of New York, to the extent not inconsistent with federal law.

### **Listing**

TVA will apply to list the Bonds on the New York Stock Exchange.

### **LEGALITY OF INVESTMENT**

The laws of some jurisdictions limit the type and amount of securities that certain institutional investors may acquire. TVA advises each entity or person to consult its own counsel respecting the legality of investment in the Bonds. Generally, the following describes the legality of investment in Power Bonds:

- Power Bonds are lawful investments and are acceptable as security for all fiduciary, trust and public funds, the investment or deposit of which shall be under the authority or control of any officer or agency of the United States. 16 U.S.C. § 831n-4(d).
- Power Bonds are acceptable as collateral for U.S. Treasury tax and loan accounts pursuant to 31 C.F.R. § 203.24(d), unless specified otherwise by the U.S. Treasury.
- National banks may deal in, underwrite and purchase Power Bonds for their own accounts in an amount not to exceed 10 percent of unimpaired capital and surplus. 12 U.S.C. § 24, seventh paragraph.
- Federal Reserve Banks may accept Power Bonds as eligible collateral for advances to member banks. 12 U.S.C. § 347 and 12 C.F.R. § 201.108(b)(13).
- Federal savings associations and federal savings banks may, to the extent specified in applicable regulations, invest in Power Bonds without regard to limitations generally applicable to investments. 12 U.S.C. § 1464(c)(1)(F).

- Power Bonds are eligible as collateral for advances by Federal Home Loan Banks to members for which Power Bonds are legal investments. 12 U.S.C. § 1430(a) and 12 C.F.R. § 935.9(a)(2).
- Federal credit unions may purchase Power Bonds, subject to applicable regulations. 12 U.S.C. § 1757(7)(E) and 12 C.F.R. Part 703.
- Power Bonds are “obligations of a corporation which is an instrumentality of the United States” within the meaning of Section 7701(a)(19)(C)(ii) of the Internal Revenue Code for purposes of the 60 percent of assets limitation applicable to building and loan associations.

## TAX MATTERS

The following summary of certain United States federal income tax and certain limited federal estate and state and local income tax consequences (where specifically noted) of the purchase, ownership and disposition of the Bonds has been prepared by Orrick, Herrington & Sutcliffe LLP, as special tax counsel to TVA, and is based upon laws, regulations, rulings and decisions, which are subject to change at any time, possibly with retroactive effect. The discussion does not address all aspects of United States federal income and estate taxation that may be relevant to a particular investor in light of its personal investment circumstances or to certain types of investors subject to special treatment under the United States federal income tax laws (for example, brokers, security dealers, traders in securities that elect to mark to market, banks, life insurance companies, tax-exempt organizations and, with limited exceptions, foreign investors), and generally does not address state and local taxation. Further, the discussion is limited to persons who will hold the Bonds as capital assets, and does not deal with United States federal income tax consequences applicable to persons who will hold the Bonds in the ordinary course or as an integral part of their trade or business, or as part of a hedging, straddle, integrated or conversion transaction or persons whose functional currency is not the U.S. dollar. Further, it does not address alternative minimum tax consequences or the indirect effects of the holders of equity interests in an owner of a Bond. Each prospective owner of a Bond is urged to consult with its own tax advisor with respect to the United States

federal, state and local tax consequences associated with the purchase, ownership and disposition of a Bond, as well as the tax consequences arising under the laws of any other taxing jurisdiction, and may not construe the following discussion as legal advice.

For purposes of the following discussion, “U.S. Person” means a citizen or resident of the United States, or a corporation or (except as may be provided in Treasury Regulations) a partnership organized in or under the laws of the United States or any political subdivision thereof, an estate the income of which is includible in gross income for United States tax purposes regardless of its source, or a trust if a United States court is able to exercise primary supervision over administration of the trust and one or more U.S. persons have authority to control all substantial decisions of the trust. The term “U.S. beneficial owner” includes any U.S. Person which is a beneficial owner of a Bond and any person which is a beneficial owner of a Bond that is otherwise subject to United States federal income taxation on a net income basis in respect of income attributable to the Bond.

### U.S. Beneficial Owners

A U.S. beneficial owner is subject to federal income taxation on income on a Bond. The Act, however, provides that bonds issued by TVA are “exempt both as to principal and interest from all taxation now or hereafter imposed by any State or local taxing authority except estate, inheritance, and gift taxes.” This exemption might not extend to franchise or other non-property taxes in lieu thereof imposed on corporations or to gain or loss realized upon the sale or exchange of a Bond, notwithstanding that such gain might in some cases be treated as interest income for United States federal income tax purposes.

Interest on a Bond will be taxable to a U.S. beneficial owner at the time that it is received or accrued, depending upon the U.S. beneficial owner’s method of accounting for United States federal income tax purposes. There is no special exemption for a Bond from United States federal income, estate and gift tax.

Upon a sale or exchange of a Bond, a U.S. beneficial owner generally will recognize capital gain or loss equal to the difference between the amount realized on the sale or exchange (not

including any amounts attributable to accrued and unpaid interest) and the U.S. beneficial owner's adjusted basis for the Bond for federal income tax purposes.

If a U.S. beneficial owner purchases a Bond for less than its stated redemption price at maturity, in general, that difference will be market discount (unless the discount is less than  $\frac{1}{4}$  of 1% of the stated redemption price at maturity of the Bond multiplied by the number of complete years remaining to maturity). In general, under the market discount rules, unless the U.S. beneficial owner elects to include market discount in income currently, any gain on a disposition of a market discount Bond will be ordinary income to the extent of accrued market discount, and deductions for some or all of the interest on any indebtedness incurred or continued to purchase or carry the Bond may be deferred until the disposition of the Bond. Any election to include market discount in income currently generally applies to all debt instruments acquired by the electing U.S. beneficial owner during or after the first taxable year to which the election applies and is irrevocable without the consent of the Internal Revenue Service. A U.S. beneficial owner should consult a tax advisor before making the election.

A U.S. beneficial owner who purchases a Bond for an amount greater than the amount payable at maturity of the Bond may elect to amortize the bond premium. In the case of a U.S. beneficial owner that makes an election to amortize bond premium or has previously made an election that remains in effect, amortizable bond premium on a Bond generally will be treated as a reduction of the interest income on a Bond on a constant yield basis (except to the extent regulations may provide otherwise) over the term of the Bond. The basis of a debt obligation purchased at a premium is reduced by the amount of amortized bond premium. An election to amortize bond premium generally applies to all debt instruments (other than tax-exempt obligations) held by the electing U.S. beneficial owner on the first day of the first taxable year to which the election applies or thereafter acquired by such owner, and is irrevocable without consent of the Internal Revenue Service. A U.S. beneficial owner should consult a tax advisor before making the election. In the proposed budget for the new fiscal year, the Administration proposed a change of law that would require accrual basis taxpayers to include

market discount in income on a current basis, effective with respect to securities acquired on or after the change is enacted. There can be no assurance as to whether this or any similar proposal will be enacted or, if enacted, as to the effective date of the change.

### **Non-U.S. Beneficial Owners**

Generally, an owner of a Bond that is not a U.S. Person and that has no connection with the United States other than holding the Bond (a "non-U.S. beneficial owner") will not be subject to United States federal withholding tax on interest on the Bond. To qualify for the exemption from withholding, the last U.S. Person in the chain of payment prior to payment to a non-U.S. beneficial owner (the "Withholding Agent") must have received in the year in which such a payment occurs, or in either of the two preceding years, a statement that (i) is signed by the beneficial owner under penalties of perjury, (ii) certifies that such owner is not a U.S. beneficial owner, and (iii) provides the name and address of the beneficial owner. The statement may be made on an Internal Revenue Service Form W-8BEN or, in the case of certain non-U.S. beneficial owners, W-8EXP (collectively, "Form W-8") or substantially similar substitute form, and the beneficial owner must inform the Withholding Agent of any change in the information on the statement within 30 days of such change. If a Bond is held through a securities clearing organization or certain other financial institutions, the organization or institution may provide a signed statement to the Withholding Agent. However, in such case, the signed statement must be accompanied by a copy of a Form W-8 or substitute form provided by the beneficial owner to the organization or institution holding the Bond on behalf of the beneficial owner.

Recently issued regulations would provide alternative methods for satisfying the certification requirements described above (the "New Regulations"). The New Regulations also would require, in the case of Bonds held by a foreign partnership, that (a) the certification described above be provided by the partners rather than by the foreign partnership and (b) the partnership provide certain information, including a taxpayer identification number. A look-through rule would apply in the case of tiered partnerships. The New Regula-

tions are generally effective for payments made after 2000. There can be no assurance that the New Regulations will not be amended prior to the date they first become effective.

Generally, any amount which constitutes capital gain to a non-U.S. beneficial owner upon retirement or disposition of a Bond will not be subject to federal income taxation in respect of such amount. Certain exceptions may be applicable and individual non-U.S. beneficial owners are particularly urged to consult a tax advisor. Generally, the Bonds will not be includible in the federal estate of a non-U.S. beneficial owner.

### **Backup Withholding**

Backup withholding of United States federal income tax at a rate of 31 percent may apply to payments made in respect of the Bonds to beneficial owners who are not exempt recipients and who fail to provide certain identifying information (such as the beneficial owner's taxpayer identification number) in the manner required. Generally, individuals are not exempt recipients, whereas corporations and certain other entities generally are exempt recipients. Payments made in respect of the Bonds to a U.S. beneficial owner must be reported to the United States Internal Revenue Service, unless such U.S. beneficial owner is an exempt recipient or establishes an exemption. Compliance with the identification procedures (described in the preceding section) would generally establish an exemption from backup withholding for those non-U.S. beneficial owners who are not exempt recipients.

In addition, upon the sale of a Bond to (or through) a broker, the broker must withhold at a rate of 31 percent of the reportable payment, unless either (i) the broker determines that the seller is a corporation or other exempt recipient or (ii) the seller provides, in the required manner, certain identifying information and, in the case of a non-U.S. beneficial owner, certifies that such

seller is a non-U.S. beneficial owner (and certain other conditions are met). Such a sale must also be reported by the broker to the United States Internal Revenue Service, unless either (i) the broker determines that the seller is an exempt recipient or (ii) the seller certifies its non-U.S. status (and certain other conditions are met). Certification of the beneficial owner's non-U.S. status usually would be made on Form W-8 under penalties of perjury, although in certain cases it may be possible to submit other documentary evidence. The term "broker" generally includes all persons who, in the ordinary course of a trade or business, stand ready to effect sales made by others, as well as brokers and dealers registered as such under the laws of the United States or a state. These requirements generally will apply to a United States office of a broker, and the information reporting requirements generally will apply to a foreign office of a United States broker, as well as to a foreign office of a foreign broker if the broker is (i) a controlled foreign corporation within the meaning of Section 957(a) of the Internal Revenue Code, (ii) a foreign person 50 percent or more of whose gross income from all sources for the 3-year period ending with the close of its taxable year preceding the payment (or for such part of the period that the foreign broker has been in existence) was effectively connected with the conduct of a trade or business within the United States or (iii) under the New Regulations (applicable with respect to payments made after 2000), a foreign partnership if it is engaged in a trade or business in the United States or if 50 percent or more of its income or capital interests are held by U.S. Persons.

Generally, any amounts withheld under the backup withholding rules from a payment to a beneficial owner would be allowed as a refund or a credit against such beneficial owner's United States federal income tax.

## UNDERWRITING

Subject to the terms and conditions set forth in the Underwriting Agreement (the “Underwriting Agreement”) between TVA and Morgan Stanley & Co. Incorporated (the “Underwriter”), TVA has agreed to sell to the Underwriter, and the Underwriter has agreed to purchase, the entire principal amount of the Bonds.

The Underwriting Agreement provides that the obligations of the Underwriter to pay for and accept delivery of the Bonds is subject to approval of certain legal matters by its counsel and to certain other conditions. The Underwriter is committed to purchase all of the Bonds if any are purchased.

The Underwriter has advised TVA that it proposes initially to offer the Bonds to the public at the public offering price set forth on the cover page of this Offering Circular and to certain dealers at such price less a concession not in excess of .10% of the principal amount. The Underwriter may allow and such dealers may reallow a discount not in excess of .05% of the principal amount of the Bonds to certain other dealers. After the initial public offering, the public offering price, concession and discount may be changed.

The Bonds are a new issue of securities with no established trading market. TVA will apply to

list the Bonds on the New York Stock Exchange. However, no assurance can be given as to the liquidity of, or the existence of a trading market for, the Bonds.

TVA has been advised by the Underwriter that it intends to make a market in the Bonds but is not obligated to do so and may discontinue making a market at any time without notice. In order to facilitate the offering of the Bonds, the Underwriter may engage in transactions that stabilize, maintain or otherwise affect the price of the Bonds. Specifically, the Underwriter may overallocate in connection with the offering, creating a short position in the Bonds for its own account. In addition, to cover overallocations or to stabilize the price of the Bonds, the Underwriter may bid for, and purchase, the Bonds in the open market. Any of these activities may stabilize or maintain the market price of the Bonds above independent market levels. The Underwriter is not required to engage in these activities and may end any of the activities at any time.

TVA has agreed to indemnify the Underwriter against certain civil liabilities or to contribute to payments the Underwriter may be required to make in respect thereof.

From time to time, the Underwriter performs services for TVA in the normal course of business.

**VALIDITY OF BONDS**

Edward S. Christenbury, Esq., General Counsel of TVA, will pass on the validity of the Bonds for TVA. Orrick, Herrington & Sutcliffe LLP, 666 Fifth Avenue, New York, New York 10103 will pass on the validity of the Bonds for the Underwriter. Orrick, Herrington & Sutcliffe LLP from time to time performs services for TVA in the ordinary course of business.

---

All statements in this Offering Circular involving opinions, regardless of whether expressly so identified, are opinions only and not factual representations. This Offering Circular is not a contract or agreement with the purchaser of any of the Bonds.

TENNESSEE VALLEY AUTHORITY

By:           /s/  DAVID N. SMITH            
David N. Smith  
*Chief Financial Officer*

Dated May 18, 2000

**ELECTION FORM**  
**TENNESSEE VALLEY AUTHORITY**  
**7.14% POWER BONDS 2000 SERIES F DUE MAY 23, 2012**  
**CUSIP NUMBER 880591 DL3**  
**OPTION TO ELECT REPAYMENT**  
**ON MAY 23, 2002**

To: Tennessee Valley Authority

The undersigned beneficial owner of Tennessee Valley Authority ("TVA") 7.14% Power Bonds 2000 Series F Due May 23, 2012 (the "Bonds"), together with the Holder ("Depository Institution") thereof, hereby exercises an option for repayment of the principal amount of Bonds designated below on May 23, 2002, and agrees to wire the Bonds to TVA's account entitled: "TVA General NYC ABA 021038860" by close of business (for securities transfers on the book-entry system of the Federal Reserve Banks) on May 16, 2002, free of charge and bearing the Election Number assigned by TVA as a reference. To be valid, this Election Form must be received by TVA at the office specified in the instructions for completing this Election Form no earlier than April 23, 2002, and no later than May 7, 2002. The undersigned beneficial owner and Depository Institution acknowledge that this election shall have no effect if the Bonds are not timely wired as required above or if the amount of the Bonds wired to TVA for repayment does not correspond exactly to the principal amount designated on line (6) below.

(1) \_\_\_\_\_  
Name of Beneficial Owner

(2) \_\_\_\_\_  
Signature of Beneficial Owner

(3) \_\_\_\_\_  
Name of Depository Institution (Holder)

(4) \_\_\_\_\_  
ABA Account Number

(5) \_\_\_\_\_  
Signature of Depository Institution Representative

(6) \_\_\_\_\_  
Principal Amount to Be Repaid

(7) \_\_\_\_\_  
Date of Election

(8) Depository Institution Representative:

Name:  
Phone Number:  
Fax Number:  
Mailing Address (no P.O. Boxes):

(9) Wire instructions for payment of principal and interest:

Bank Name:  
ABA Number:  
Account Name:  
Account Number:  
Reference (optional):

Election Number\* (to be completed by TVA):

\* To be assigned by TVA upon receipt of this Election Form. An acknowledgment, in the form of a copy of this document with the assigned Election Number, will be returned to the party and location designated on line (8) above no later than May 13, 2002.

**INSTRUCTIONS FOR COMPLETING ELECTION FORM  
AND EXERCISING REPAYMENT OPTION  
FOR MAY 23, 2002**

1. Indicate name of beneficial owner on line (1).
2. Affix authorized signature of beneficial owner or its agent on line (2). Signature must be guaranteed by Depository Institution designated on line (3) or the appropriate financial intermediary.
3. Indicate name of Depository Institution holding the book-entry Bonds on the book-entry system of the Federal Reserve Banks on line (3).
4. Insert ABA Account Number of Depository Institution on line (4).
5. Affix authorized signature of Depository Institution's representative on line (5). Signature must be notarized.
6. Indicate the principal amount of Bonds to be repaid on line (6).
7. Indicate date the Election Form was completed on line (7).
8. Indicate name, mailing address (no P.O. boxes, please), telephone number and facsimile-transmission number of the party to whom confirmation of this election may be sent on line (8).
9. Indicate the wire instruction for payment of principal and interest on May 23, 2002, on line (9).
10. Mail or otherwise deliver original copy of the completed Election Form to:

Tennessee Valley Authority  
ATTN: Vice President and Treasurer  
400 West Summit Hill Drive  
Knoxville, Tennessee 37902

FACSIMILE TRANSMISSIONS WILL NOT BE ACCEPTED. To be valid, a properly completed Election Form must be received by TVA at the above specified office no earlier than April 23, 2002, and no later than the close of business on May 7, 2002.

11. If confirmation of TVA's receipt of the election, including the assigned Election Number, is not received by May 13, 2002, contact TVA at (865) 632-3366.
12. Arrange for the Depository Institution to wire the principal amount of the Bonds to be repaid to TVA's account entitled "TVA General NYC ABA 021038860," free of charge, by the close of business (for securities transfers on the book-entry system of the Federal Reserve Banks) on May 16, 2002. THE ELECTION NUMBER MUST ACCOMPANY THE DELIVERY.

For assistance with this form or any questions relating thereto,  
please telephone TVA at (865) 632-3366.

## INFORMATION STATEMENT

### TENNESSEE VALLEY AUTHORITY

#### A Wholly Owned Corporate Agency and Instrumentality of the United States of America

The Tennessee Valley Authority (“TVA” or the “Corporation”) presents this Information Statement (this “Statement”) for the information of potential purchasers of (1) its Power Bonds (“New Power Bonds”), including its First Installment Series Bonds (“Installment Bonds” or “FISBS”), (2) its Discount Notes, and (3) any other evidences of indebtedness (“Other Indebtedness”) it may issue pursuant to the Tennessee Valley Authority Act of 1933, as amended (the “Act”). TVA issues New Power Bonds pursuant to the Act and the Basic Tennessee Valley Authority Power Bond Resolution adopted by the Board of Directors of TVA (the “Board”) on October 6, 1960, as amended on September 28, 1976, October 17, 1989 and March 25, 1992 (the “Basic Resolution”). TVA issues Discount Notes and Other Indebtedness pursuant to the Act and their authorizing resolutions. New Power Bonds, Discount Notes and Other Indebtedness are collectively referred to in this Statement as “Evidences of Indebtedness.”

TVA may offer New Power Bonds and Other Indebtedness from time to time. TVA may offer Discount Notes for sale on a continuous basis by direct placement or through selected investment dealers, dealer banks, underwriters or underwriting syndicates. For each offering of New Power Bonds, except for FISBS, TVA will prepare an offering circular describing the specific terms and conditions of the New Power Bonds offered. TVA will prepare a single offering circular that describes the general terms and conditions common to all FISBS offerings. TVA will also prepare a single offering circular describing the general terms and conditions common to all Discount Note offerings. For offerings of Other Indebtedness, TVA will either prepare an offering circular describing the specific terms and conditions of the particular offering or a more general offering circular, as TVA deems appropriate. You should read this Statement, as it may be supplemented or amended, together with the appropriate offering circular, as it may be supplemented or amended, for each offering.

For each offering of an Evidence of Indebtedness, you should rely only on the information contained in (1) this Statement, (2) the relevant offering circular, and (3) any supplements or amendments to these documents approved by TVA. TVA has not authorized anyone to provide you with any information that is different from that found in this Statement and each relevant offering circular. This Statement does not constitute an offer to sell or a solicitation of an offer to buy any Evidences of Indebtedness in any jurisdiction to any person to whom it is unlawful to make an offer or solicitation.

This Statement is accurate only as of its date. TVA will supplement, amend or replace this Statement from time to time to reflect its annual financial results or otherwise as TVA deems appropriate. However, TVA assumes no further duty to update this Statement. You should rely on the most recent supplements or amendments to or replacement of this Statement over different information in this Statement.

You may obtain additional copies of this Statement by writing to Tennessee Valley Authority, 400 West Summit Hill Drive, Knoxville, Tennessee 37902, Attention: Vice President and Treasurer or by calling (865) 632-3366.

*Evidences of Indebtedness are not obligations of the United States of America, and the United States of America does not guarantee the payment of the principal of or interest on any Evidences of Indebtedness. TVA is not required to register Evidences of Indebtedness under the Securities Act of 1933 or to make periodic reports to the Securities and Exchange Commission under the Securities Exchange Act of 1934. TVA does not intend to register any of its Evidences of Indebtedness or file any reports with the Securities and Exchange Commission.*

**The date of this Information Statement is February 4, 2000.**

## FORWARD-LOOKING STATEMENTS

This Statement contains forward-looking statements relating to future events and future performance. Any statements regarding expectations, beliefs, plans, projections, estimates, objectives, intentions or assumptions or otherwise relating to future events or performance may be forward-looking. Some examples include statements regarding TVA's projections of future power and energy requirements, future costs related to environmental compliance and targets for TVA's future competitive position. Although TVA believes that the assumptions underlying the forward-looking statements in this Statement are reasonable, TVA does not guarantee the accuracy of these statements. Numerous factors could cause actual results to differ materially from those in forward-looking statements. Such factors include, among other things, new laws and regulations, especially those related to the restructuring of the electric power industry and various environmental matters; increased competition among electric utilities; legal and administrative proceedings affecting TVA; the financial environment; performance of TVA's generating facilities; fuel prices; the demand for electricity; weather conditions; changes in accounting standards; and unforeseeable events.

## TENNESSEE VALLEY AUTHORITY

TVA is one of the largest electric power systems in the United States, having produced over 148 billion kilowatt-hours (“kWh”) of electricity in fiscal 1999. TVA is a wholly owned corporate agency and instrumentality of the United States of America established by the Act to develop the resources of the Tennessee Valley region.

Historically, the programs at TVA have consisted of power and nonpower programs. Financial accounts for these two types of programs have been kept separately. Substantially all of TVA’s revenues and assets are attributable to its power program.

The Act requires the power program to be self-supporting from power system revenues and capital TVA raises through its power program borrowings. The Act authorizes TVA to issue Evidences of Indebtedness in an amount not exceeding \$30 billion outstanding at any one time, the proceeds of which may be used only for the power program. See “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness.”

Prior to fiscal 2000, congressional appropriations provided most of the funding for TVA’s nonpower programs. TVA has obtained additional funds from revenues and user fees from the nonpower programs. In 1997, Congress enacted appropriations legislation that anticipated no further appropriations for the nonpower programs in fiscal years following 1998. This legislation required TVA, in the absence of appropriations, beginning in fiscal 1999, to fund certain nonpower programs constituting essential stewardship activities from various sources, which may include power revenues. Because Congress did not provide appropriations for TVA’s nonpower programs for fiscal 2000, TVA is using power funds for its essential stewardship activities in compliance with the 1997 appropriations legislation. For a further discussion of this matter see “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness” — “Recent Legislation.”

Congress reserved the right in the Act to alter, amend or repeal the Act but provided that no amendment or repeal shall operate to impair the obligation of any contract made by TVA in the

exercise of any power conferred by the Act. For a discussion of recent legislation relating to the Act, see “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness” — “Recent Legislation.”

TVA is administered by a board of three persons appointed by the President and confirmed by the United States Senate (the “Senate”). Appointments are for nine-year staggered terms, with one term expiring each three-year interval. The Board has the sole authority to determine the rates TVA charges for power. The Act requires the rates to be sufficient to cover certain expenses. See “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness” — “Rate Covenant.”

The Act requires TVA to annually file a financial statement and complete report as to the business of the Corporation with the President and Congress. The Act authorizes the Comptroller General of the United States to periodically audit the transactions of TVA.

Under certain circumstances, the Act permits TVA to borrow up to \$150 million for a period of one year or less from the United States Treasury (the “Treasury”). The Act requires TVA to obtain the approval of the Secretary of the Treasury of the issue date and maximum interest rate for any issuance of an Evidence of Indebtedness with a term of one year or longer. The Office of Management and Budget treats TVA’s borrowing authority as budget authority for purposes of the budget of the United States.

Income on Evidences of Indebtedness issued by TVA is subject to United States federal income taxation and various other federal tax consequences. There is no special exemption for Evidences of Indebtedness from federal estate and gift taxes. Under the Act, Evidences of Indebtedness are exempt both as to principal and interest from all taxation now or hereafter imposed by any state or local taxing authority except estate, inheritance and gift taxes. This exemption might not extend to franchise or other nonproperty taxes imposed on corporations or to gain or loss realized upon the sale or exchange of an Evidence of Indebtedness even though such gain might in some cases be treated as interest income for federal income tax purposes.

## SELECTED FINANCIAL DATA

The following selected financial data of TVA's power program for the fiscal years 1995 through 1999 have been derived from TVA's audited financial statements. These data should be read in conjunction with the audited financial statements and notes thereto (the "Financial Statements") presented herein.

(a) Sales and revenues have been adjusted to include sales to other utilities.

(b) Includes 405 megawatts of dependable capacity from the U.S. Army Corps of Engineers projects on the Cumberland River System.

(c) TVA changed its method of expensing the interest component of nuclear fuel expense in 1995.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Results of Operations

Net income for fiscal 1999 amounted to \$119 million, a decrease of \$114 million from net income of \$233 million in fiscal 1998. Net income for fiscal 1998 was \$233 million compared with \$8 million for fiscal 1997. Reasons for changes from fiscal 1997 to fiscal 1998 and from fiscal 1998 to fiscal 1999 are discussed below.

#### *FISCAL 1999 COMPARED TO FISCAL 1998*

##### *Operating Revenues*

Operating revenues were \$6,595 million in fiscal 1999 compared with \$6,729 million in fiscal 1998. The \$134 million decrease was primarily due to a reduction in wholesale sales to other utilities related to mild weather and a weaker spot market for power during fiscal 1999.

##### *Operating Expenses*

Operating expenses increased \$358 million, from \$4,549 million in fiscal 1998 to \$4,907 million in fiscal 1999. This increase was primarily due to a \$261 million charge for the acceleration of the amortization of regulatory assets (see note 1 of the accompanying Financial Statements — Accelerated amortization), coupled with a \$111 million increase in the amortization of regulatory assets attributable to the reclassification of certain nuclear fuel costs (see note 1 of the accompanying Financial Statements — Other deferred charges).

##### *Interest Expense*

Net interest expense declined \$182 million, from \$1,959 million in fiscal 1998 to \$1,777 million in fiscal 1999. This reduction largely reflects savings associated with the refinancing of \$3.2 billion of debt issues formerly held by the Federal Financing Bank. Total outstanding indebtedness, as of September 30, 1999, was \$26.4 billion, with an average interest rate of 6.83 percent; as of September 30, 1998, this amount outstanding was \$26.7 billion, with an average interest rate of 7.45 percent.

#### *FISCAL 1998 COMPARED TO FISCAL 1997*

##### *Operating Revenues*

Operating revenues were \$6,729 million in fiscal 1998 compared with \$5,934 million in fiscal

1997. The \$795 million increase was primarily due to additional revenues from the fiscal 1998 rate increase, coupled with an increase in energy sales to municipalities and cooperatives as a result of the hot summer during fiscal 1998. The TVA service area experienced 2.2 percent greater heating degree days and 46.2 percent greater cooling degree days in fiscal 1998 versus fiscal 1997.

##### *Operating Expenses*

Operating expenses increased \$469 million, from \$4,080 million in fiscal 1997 to \$4,549 million in fiscal 1998. This increase was primarily due to higher fuel and purchased power expense in fiscal 1998 as a result of higher system generation and greater purchases of power at higher prices, coupled with an increase in operating and maintenance expense.

##### *Other Income and Expenses*

TVA had net other income of \$12 million in fiscal 1998 compared with net other income of \$157 million in fiscal 1997. The fiscal 1997 net other income consisted primarily of investment earnings of the decommissioning trust funds of \$138 million. Subsequent to fiscal 1997, TVA modified its accounting methodology such that investment earnings of the decommissioning trust funds are deferred (see note 9 of the accompanying Financial Statements — Decommissioning costs).

##### *Interest Expense*

Net interest expense declined \$44 million, from \$2,003 million in fiscal 1997 to \$1,959 million in fiscal 1998. Total outstanding indebtedness, as of September 30, 1998, was \$26.7 billion, with an average interest rate of 7.45 percent; as of September 30, 1997, this amount outstanding was \$27.4 billion, with an average interest rate of 7.56 percent.

### Liquidity and Capital Resources

#### *Capital Structure*

During the first 25 years of TVA's existence, the United States Government made appropriation investments in TVA power facilities. In 1959, TVA received congressional approval to issue

bonds to finance its growing power program. For the last four decades, TVA's power program has been required to be self-supporting. As a result, TVA funds its capital requirements through internal cash generation and through borrowings (subject to a congressionally mandated \$30 billion debt limit).

A return on the United States Government's initial appropriation investment in TVA power facilities, plus a repayment of the initial investment, is specified by law. The combined payment for fiscal 1999 was \$57 million. Total cumulative repayments and return on investment by TVA to the Treasury exceed \$3 billion.

#### *Cash Flows*

Net cash provided by power program operations for fiscal 1999, 1998 and 1997 was \$1,431 million, \$1,394 million and \$1,066 million, respectively. This positive trend reflects improvements made in TVA's operating activities during the three-year period coupled with the rate increase in fiscal 1998.

Net cash used in investing activities for fiscal 1999, 1998 and 1997 was \$956 million, \$742 million and \$580 million, respectively. The \$214 million increase from fiscal 1998 to fiscal 1999 was primarily due to an increase in construction expenditures of \$192 million reflecting the construction of natural gas combustion turbines for peaking power. The \$162 million increase from fiscal 1997 to fiscal 1998 primarily reflects the fiscal 1997 sale of certain receivables.

Net cash used in financing activities for fiscal 1999, 1998 and 1997 was \$763 million, \$560 million and \$425 million, respectively. For fiscal 1999, the cash used in financing activities reflects the aggregate net repayment of total outstanding debt of \$308 million coupled with borrowing expenses and other financing costs of \$391 million.

#### *Capital Resources*

During fiscal 1999, 1998 and 1997 TVA accessed the capital markets through cost-effective long-term financing structures and continued to expand its investor base by tapping the global and retail debt markets. The proceeds from the borrowings were used to refinance existing debt.

## **Market Risk**

### *Risk Policies*

TVA is exposed to market risks including changes in interest rates, foreign currency exchange rates and volatility of certain commodity and equity market prices. To manage the volatility attributable to these exposures, TVA has entered into various non-trading derivative transactions, principally interest rate swap agreements, foreign currency swap contracts, forwards, futures and option contracts. TVA has established its Risk Management Committee, which maintains responsibility for reviewing and approving controls and procedures for TVA-wide risk management activities including the oversight of models and assumptions used to measure risk, the review of counterparty exposure limits and the establishment of formal procedures for use of financial hedging instruments.

TVA is exposed to losses in the event of counterparties' nonperformance and accordingly has established controls to determine the creditworthiness of counterparties in order to mitigate exposure to counterparty credit risk. With respect to hedging activities, TVA risk management policies allow the use of derivative financial instruments to manage financial exposures but prohibit the use of these instruments for speculative or trading purposes. TVA currently accounts for such hedging activities using the deferral method, and gains and losses are recognized in the accompanying financial statements when the related hedged transaction occurs.

### *Interest Rate and Foreign Currency Risk*

TVA manages its daily cash needs through issuance of discount notes and other short-term borrowings. These borrowings with maturities of less than one year expose TVA to fluctuations in short-term interest rates. TVA is not exposed to changes in interest rates on most of its long-term debt until such debt matures and may be refinanced at the then applicable rates. An interest rate swap is used to hedge TVA's exposure related to its inflation-indexed accreting principal bonds, and currency swap contracts are used as hedges for foreign currency denominated debt issues (see note 5 of the accompanying Financial Statements — Foreign currency transactions and interest rate swap). Based on TVA's overall interest rate exposure at September 30, 1999, including derivative and other interest rate sensitive instruments, a

near-term 1 percentage point change in interest rates would not have a material impact on TVA's financial position or results of operations for fiscal 1999.

#### *Commodity Price Risk*

TVA is exposed to the impact of market fluctuations in the price and transportation costs of certain commodities and fuels including, but not limited to, coal, natural gas and electricity. TVA employs established policies and procedures to manage risks associated with these market fluctuations by using various commodity-based derivative instruments, including futures, forwards and option contracts. To monitor the risk of commodity trading activities, TVA employs a daily Value at Risk ("VaR") methodology which utilizes a statistical-based approach to determine adjusted historical changes in the value of a market risk sensitive commodity-based financial instrument to estimate the amount of change in the current value of the instrument that could occur at a specified confidence level over a specified interval. Based on TVA's VaR analysis of its overall commodity price risk exposure at September 30, 1999, management does not anticipate a materially adverse effect on TVA's financial position or results of operations as a result of market fluctuations.

#### *Equity Price Risk*

TVA maintains trust funds, consistent with the United States Nuclear Regulatory Commission (the "NRC") requirements, to fund certain costs of decommissioning its nuclear generating units. These funds are managed by various money managers and are primarily invested in marketable equity securities, which are exposed to price fluctuations in equity markets. TVA actively monitors the trust funds' portfolios by benchmarking the performance of their investments against certain price indices. The accounting for nuclear decommissioning recognizes that sufficient funds have been set aside to fully fund expected decommissioning obligations, and, therefore, fluctuations in trust fund marketable security returns do not affect the earnings of TVA (see note 1 of the accompanying Financial Statements — Decommissioning costs).

## **Accounting Standards**

### *Accounting for the Effects of Regulation*

TVA accounts for the financial effects of regulation in accordance with Statement of Financial Accounting Standards ("SFAS") No. 71, *Accounting for the Effects of Certain Types of Regulation*. As a result, TVA records certain regulatory assets and liabilities that would not be recorded on the balance sheet under generally accepted accounting principles for non-regulated entities.

TVA has approximately \$1.6 billion of regulatory assets (see note 1 of the accompanying Financial Statements — Other deferred charges and Debt issue and reacquisition costs) along with approximately \$6.3 billion of deferred nuclear plants as of September 30, 1999. In the event that restructuring of the utility industry changes the application of SFAS No. 71, TVA would be required to evaluate such regulatory assets and deferred nuclear plants under the provisions of SFAS No. 121, *Accounting for the Impairment of Long-Lived Assets and Long-Lived Assets to Be Disposed Of*. Statement 121 establishes criteria for evaluating and measuring asset impairments and states that regulatory assets that are no longer probable of recovery through future revenues be charged to earnings. Such an event may have a material adverse effect on future results of operations from the write-off of regulatory assets. However, TVA intends to fully recover any regulatory and other deferred assets that may result from TVA's transition to a competitive market.

### *New Accounting Pronouncements*

In June 1998, the Financial Accounting Standards Board (the "FASB") issued SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, which requires that every derivative instrument (including certain derivative instruments embedded in other contracts) be recorded on the balance sheet as either an asset or liability measured at its fair value. The statement requires that changes in the derivative's fair value be recognized currently in earnings unless specific hedge accounting criteria are met. TVA may engage in hedging activities using futures, forward contracts, options and swaps to hedge the impact of market fluctuations on energy commodity prices, interest rates and foreign currencies. In July 1999, the FASB deferred the effective date of SFAS No. 133 to fiscal years beginning after June 15, 2000. TVA is

currently assessing the effect, if any, on its financial statements of implementing SFAS No. 133.

In March 1998, the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants issued Statements of Position (“SOP”) 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*, which provides guidance on accounting for the costs of computer software developed or obtained for internal use. Under SOP 98-1, certain costs which are currently expensed may now be capitalized and amortized over some future period. SOP 98-1, which is effective for TVA in fiscal 2000, is not expected to have a material impact on TVA’s financial position or results of operations.

In December 1998, the Emerging Issues Task Force (“EITF” or the “Task Force”) of the FASB issued EITF 98-10, *Accounting for Contracts Involved in Energy Trading and Risk Management Activities*. Some energy-related companies have been entering into contracts for the purchase and sale of energy commodities and netting those activities in the income statement (settlement basis). In EITF 98-10, the Task Force stated that energy trading contracts are to be recorded at fair value on the balance sheet, with related gains and losses included in earnings. EITF 98-10, which is effective for TVA in fiscal 2000, is not expected to have a material impact on TVA’s financial position or results of operations.

#### *Nuclear Decommissioning Costs*

The FASB has undertaken a project regarding the accounting for closure and removal of long-lived assets, including the decommissioning of nuclear generating units. The FASB has reached several tentative conclusions with respect to the project and expects to issue an exposure draft in the first quarter of calendar year 2000; however, it is uncertain when the final statement will be issued and what impact it may ultimately have on TVA’s financial position or results of operations.

Effective for fiscal 1998, TVA changed its method of accounting for decommissioning costs and related liabilities in order to comply with certain of the FASB’s tentative conclusions, as well as certain rate-setting actions. TVA’s current accounting policy recognizes all obligations related to closure and removal of its nuclear units as incurred. The liability for closure is measured as the present

value of the estimated cash flows required to satisfy the related obligation and discounted at a determined risk-free rate of interest. The corresponding charge to recognize the additional obligation was effected through the creation of a regulatory asset. TVA further modified its method of accounting for decommissioning costs such that earnings from decommissioning fund investments, amortization expense of the decommissioning regulatory asset and interest expense on the decommissioning liability are deferred in accordance with SFAS No. 71.

#### **THE AREA SUPPLIED BY TVA**

TVA supplies power in most of Tennessee, northern Alabama, northeastern Mississippi and southwestern Kentucky, and in small portions of Georgia, North Carolina and Virginia. TVA serves a population of about 8 million people. Subject to certain minor exceptions, TVA may not without specific authorization by act of Congress enter into contracts which would have the effect of making it or the distributors of its power a source of power supply outside the area for which TVA or the distributors were the primary source of power supply on July 1, 1957.

TVA is primarily a wholesaler of power. Its customers are composed of three major groups: (1) distributors, consisting of municipal and cooperative systems; (2) industries that have large or unusual loads; and (3) federal agencies. Additionally, TVA has entered into exchange power arrangements with most of its surrounding electric systems.

#### **RATES, CUSTOMERS AND MARKET**

The Act gives the Board sole responsibility for establishing the rates that TVA charges for power and authorizes the Board to include in power contracts terms and conditions that it judges necessary or desirable for carrying out the purposes of the Act. The Act requires TVA to charge rates for power which, among other things, will produce gross revenues sufficient to provide funds for (1) operation, maintenance and administration of its power system; (2) payments to states and counties in lieu of taxes; (3) debt service on outstanding Evidences of Indebtedness; and (4) annual payments to the Treasury in repayment of and as a return on the Government’s appropriation investment in TVA power facilities (the “Appropriation

Investment”). See “Certain Provisions of the Tennessee Valley Authority Act” and “The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness” — “Rate Covenant” and “Recent Legislation.” Rates set by the Board are not subject to review or approval by any state or federal regulatory body. See “Competition.”

A summary of power program operating revenues by customer type for each of the last five fiscal years ended September 30 is shown in the Comparative Five-Year Data presented on page 3.

### **Municipal and Cooperative Distributors**

Sales to municipal and cooperative distributors accounted for approximately 84 percent of TVA’s power revenues in fiscal 1999. TVA has long-term wholesale power contracts with 159 municipal and cooperative distributors. All of these contracts require distributors to purchase substantially all of their electric power and energy requirements from TVA.

All distributors purchase power under one of three basic arrangements. Fifty-eight distributors purchase power under contracts that require 10 years’ notice to terminate and further provide that on each anniversary beginning on the tenth anniversary, one additional year is automatically added to the term. Four distributors have contracts that require 15 years’ notice to terminate the contract. On each anniversary of these contracts, beginning on the fifth anniversary, one additional year is automatically added to the term. TVA has also offered distributors the option of moving from 10- or 15-year termination notice periods to a 5-year termination notice period. These contract amendments are conditioned upon notice not being given during the first 5 years after the effective date of the revision. Ninety-seven distributors have entered into contractual arrangements of this type. TVA has agreed that all of these term arrangements are deemed to provide for adequate recovery by TVA of any investment in generation, transformation or transmission facilities for service to the distributor.

A number of TVA distributors, including some with the largest loads, have expressed interest in further revising their wholesale power contracts to allow them more options respecting contract term and other matters, such as purchasing only a portion of their power requirements from TVA. TVA has indicated its willingness to work with distributors to accommodate their desire for more

flexibility. For a discussion of events that may affect TVA’s relationships with the distributors of its power, see “Competition.”

TVA’s wholesale power contracts contain standard provisions specifying the wholesale rates, resale rates and terms and conditions under which power is to be distributed. Under these contracts, TVA, on a quarterly basis, may determine and make adjustments in the wholesale rate schedule with corresponding adjustments in resale rate schedules necessary to enable TVA to meet all requirements of the Act and the tests and provisions of its bond resolutions. The contracts provide for agreement between the parties on general or major changes in both the wholesale and resale rate schedules. If, however, agreement is not reached, the contracts permit TVA to make changes in these schedules to carry out the objectives of the Act, to meet financial requirements and tests and to comply with the provisions of its bond resolutions.

The power contracts between TVA and the distributors of TVA power specify the resale rates that distributors charge the ultimate power consumers. These rates are revised from time to time to reflect changes in costs, including changes in the wholesale cost of power. They are designed to promote the Act’s objective of providing an adequate supply of power at the lowest feasible rates.

### **Other Sources of Power Revenues**

Revenues from industries and federal agencies directly served and from exchange power arrangements with other power systems and other revenue accounted for approximately 16 percent of TVA’s power revenues in fiscal 1999. Contracts with industries directly served by TVA are normally for 10-year terms. These contracts are subject to termination by TVA or the customer upon a minimum notice period that varies according to the customer’s contract demand and the period of time service has been provided to the location where it is to be terminated. TVA establishes the rates it charges industries it directly serves. These rates are the same as those charged by the distributors of TVA power to large industries (those with demand greater than 25,000 kilowatts). TVA sells power to federal agencies under the same contract terms and rates as directly-served industries. TVA has exchange power arrangements with 12 neighboring power systems. See note 1 of the accompanying Financial Statements.

## COMPETITION

The electric utility industry has become increasingly competitive over the last decade. Competition is expected to continue to intensify, and restructuring legislation may dramatically change the way electric utilities do business in the future. Among the early initiatives that have begun to promote industry competition is the Energy Policy Act of 1992 (the "Energy Act"). The Energy Act, and related Federal Energy Regulatory Commission ("FERC") orders, already allow competitors of a utility to access that utility's transmission system to sell electricity to other electric power suppliers and wholesale customers. In TVA's case, some special provisions apply.

Under the TVA Act, subject to certain minor exceptions, TVA may not currently enter into contracts that would have the effect of making it or the distributors of its power a source of power supply outside a statutorily-specified area. However, under a special provision of the Energy Act (the "anti-cherry-picking provision"), TVA is not required to provide its competitors access to its transmission system to transmit power for consumption within the area that TVA or the distributors of its power may serve. Thus, while TVA may not sell power outside its current service area, its competitors are not allowed to use its transmission system to sell power within TVA's service area.

In the future, it is likely that the current law that serves to limit competition between TVA and its competitors will change. In the past three years, numerous bills have been introduced in Congress designed to restructure the electric utility industry and mandate or promote competition in the industry. Within the context of restructuring legislation, some of the key issues for TVA are: (1) whether TVA rates will be regulated by FERC, (2) whether TVA and the distributors of TVA power will be able to sell power outside the TVA service area, (3) whether Congress will attempt to shorten the terms of TVA's present wholesale power contracts with the distributors of its power, and (4) whether TVA will have the right to recover its power system investments that would no longer be economical under full and open market competition (stranded costs).

In April 1999, the Clinton Administration unveiled its Comprehensive Electricity Competition Act (the "CECA"). Whereas an earlier version of the CECA did not address TVA, this latest version

outlined provisions for TVA in a restructured industry. The CECA provided, among other things, that: (1) TVA's Board would continue to have final authority in setting wholesale power rates, (2) TVA and its power distributors would renegotiate terms of the existing power contracts, (3) TVA would submit a stranded cost recovery plan to FERC for approval, and (4) the anti-cherry picking provision and the statutory fence that limits TVA's sales to its current service area would be simultaneously repealed.

Long before the Administration introduced its bill, TVA had been working closely with the Tennessee Valley Public Power Association ("TVPPA"), the association which represents all distributors of TVA power, to develop a consensus position on industry restructuring. After a series of negotiations, TVA concurred in September 1999 with the vast majority of its distributors on the key elements of legislation regarding TVA. This legislation would allow for: (1) simultaneous repeal of the anti-cherry picking provision and the fence on a yet-to-be-determined "effective date," (2) renegotiation of power contract terms with a minimum termination notice period of three years following a one-year negotiation period, (3) new limitations on TVA retail sales in TVA's current service area, (4) stranded cost recovery, (5) FERC regulation of TVA's transmission system, (6) TVA subjection to antitrust laws (with the exception of civil damages and attorney's fees), (7) termination of most of TVA's existing regulatory role with respect to distributors, and (8) limitation on TVA new generation to locations within the current TVA service territory. No provisions were included with respect to TVA wholesale rate regulation. TVPPA submitted the September 1999 position to Tennessee Valley legislators for consideration in their efforts to draft restructuring legislation.

Throughout the majority of 1999 the United States House of Representatives (the "House") and Senate have held hearings on the topic of industry restructuring. The House Subcommittee on Energy and Power has been the most active in the effort to develop federal legislation and reported a bill in October 1999. The following provisions are part of that legislation: (1) TVA's Board would continue to regulate wholesale power rates inside the current service area while FERC would regulate wholesale rates for sales outside the current service area, (2) TVA must renegotiate power contracts with its power distributors according to the TVPPA

position, (3) TVA's retail sales in the current service area are limited similarly to the TVPPA position, (4) TVA is allowed to recover stranded costs, (5) TVA's transmission system would be regulated by FERC, (6) TVA would be subject to antitrust laws similar to the CECA provisions, (7) the fence for sales of "excess energy" and the anti-cherry picking provision are repealed upon enactment, and (8) additional TVA generation would only be planned and built for customers within the current TVA service area.

Although a great deal of attention has been given to this issue, federal legislation will continue to be debated well into the year 2000 and possibly beyond. Whatever the outcome of the legislative process, TVA's management has developed and will continue to develop plans and strategies designed to position TVA for competitive success in a restructured industry. Through its 10-Year Business Plan, TVA has set forth a comprehensive financial plan to achieve a competitive total cost of power. Having already achieved significant debt reduction as well as other operational improvements, TVA is well on its way to meeting the plan objective.

#### **POWER AND ENERGY REQUIREMENTS**

TVA prepares annual forecasts of future power and energy requirements as part of its planning and budgeting process. TVA's forecast procedure involves producing a range of load forecasts for the explicit purpose of bounding the range of uncertainty associated with load growth. TVA produces the load forecasts probabilistically. TVA believes that there is a 90 percent probability that the actual load will be less than the high load forecast, a 50 percent probability that the actual load will be less than medium load forecast and a 10 percent probability that actual load will be less than the low load forecast. TVA's current load forecast through fiscal year 2002 reflects an average annual load growth rate of 2.9 percent, 1.8 percent and .8 percent for the high, medium and low load forecasts, respectively. TVA's total system energy requirements through fiscal 2002 reflect an average annual growth rate of 2.9 percent, 1.9 percent and .6 percent for the high, medium and low load forecasts, respectively. Numerous factors, such as weather conditions and the health of the regional economy, could cause actual results to differ materially from TVA's forecasts.

#### **POWER SYSTEM**

TVA's power generating facilities at September 30, 1999, included 29 hydroelectric plants, 11 coal-fired plants, 3 nuclear plants, 1 pumped storage hydroelectric plant and 4 combustion turbine plants. Power is delivered to TVA customers over a transmission system of approximately 17,000 miles of lines, including 2,400 miles of extra-high-voltage (500,000 volt) transmission lines. The system interconnects with neighboring power systems at numerous points. TVA has various types of interchange arrangements with these systems. The extent and types of interchange transactions depend upon the characteristics of the systems' loads, the management policies of the systems and other factors. Interchange arrangements are an essential part of TVA's efforts to minimize investment in electrical facilities, increase the reliability of service, effect operating economies and minimize the cost of electric energy.

During the fiscal year ended September 30, 1999, 62 percent of the power generated by the TVA coordinated system was by fossil-fired plants, 30 percent by nuclear, 7 percent by hydro and 1 percent by combustion turbines. Coal consumption during this time was 39.7 million tons. Coal is purchased under contracts ranging from a single delivery to deliveries over several years. TVA coal inventory levels vary from plant to plant based upon a simulated inventory model. As of September 30, 1999, TVA had approximately 30 days' coal supply in inventory at full burn. See "Nuclear Power Program" — "Nuclear Fuel" for a discussion of TVA's nuclear fuel supplies. Management believes the sources and availability of fuel materials essential to its business should be adequate for the foreseeable future.

TVA's power system is one of the largest in the United States in capacity and in energy production. Its size permitted the construction of large facilities which resulted in lower unit costs. Most of TVA's dams were completed years ago when construction costs were far below present-day levels. Because most of the dams are multipurpose, their cost is shared by navigation, flood control, recreation and local economic development, as well as by power. Thus, each purpose is served at a substantially lower cost than if the dams had been built for a single purpose.

## Generating Resources

The following table summarizes the winter net dependable capacity (“NDC”) in megawatts (“MW”) on this coordinated system as of September 30, 1999:

|   | <u>Generating<br/>Units</u> | <u>Winter<br/>NDC<br/>MW(1)</u> |
|---|-----------------------------|---------------------------------|
| TVA Hydro Plants .....                          | 109                         | 3,237                           |
| TAPOCO Hydro Plants .....                       |                             | 318(2)                          |
| U.S. Army Corps of Engineers Hydro Plants ..... |                             | 405(3)                          |
| TVA Pumped Storage Facility .....               | 4                           | <u>1,532</u>                    |
| Total Hydro .....                               |                             | 5,492                           |
| Fossil .....                                    | 59                          | 15,049                          |
| Nuclear .....                                   | 5                           | 5,729                           |
| Combustion Turbine .....                        | 48                          | <u>2,232</u>                    |
| Total NDC .....                                 |                             | <u><u>28,502</u></u>            |

- (1) NDC as stated is the net power output which can be obtained for a period adequate to satisfy the daily load patterns under expected conditions of operation with equipment in an average state of maintenance. For planning purposes, TVA currently estimates summer dependable total hydro capacity of approximately 5,770 MW; coal-fired capacity of approximately 14,668 MW; nuclear power capacity of approximately 5,590 MW and combustion turbine capacity of approximately 2,048 MW, for a total summer NDC of approximately 28,076 MW.
- (2) Four hydro plants owned by TAPOCO, Inc., a subsidiary of the Aluminum Company of America (“Alcoa”), are operated as part of the TVA power system. Under contractual arrangements with TAPOCO, electric power generated at these facilities is supplied to TVA. In return, TVA supplies electric power for Alcoa’s aluminum plant operations located in Tennessee.
- (3) The U.S. Army Corps of Engineers’ plants on the Cumberland River system have a total installed capacity of 975 MW, of which 405 MW of NDC is available to TVA under a marketing agreement with the Southeastern Power Administration.

Under arrangements among TVA, the U.S. Army Corps of Engineers (the “CORPS”) and the Southeastern Power Administration (“SEPA”), 8 hydro plants of the CORPS on the Cumberland River system are operated in coordination with the TVA system. These arrangements further provide for capacity (405 MW) and energy from the Cumberland River system to be supplied to TVA by SEPA at the points of generation and the price paid for the power to be based on the operating and maintenance expenses and amortization of the power facilities. A portion of the output of the Cumberland River system is also made available to SEPA’s customers outside the TVA region. The agreement with SEPA covering these arrangements for power from the Cumberland River system can be terminated upon three years’ notice. This notice may be given beginning June 30, 2017.

TVA has contracted with Choctaw Generation, Inc. to purchase and take delivery of up to

440 MW of power over a 30-year term from a lignite power plant to be constructed in Mississippi, contingent upon satisfactory completion of all necessary environmental reviews. Commercial operation of the plant is currently scheduled for January 2001. The owner of the facility bears the construction and operating risks. If the owner fails to deliver the required energy, the owner will be responsible for securing replacement power for TVA at the contractually agreed price.

TVA plans to install additional peaking capacity at two of its fossil plants. By the summer of 2000, TVA intends to install eight 85 MW natural-gas combustion turbines. Four units will be installed at the Gallatin plant and four at the Johnsonville plant, both of which have existing combustion turbines. TVA is also planning to install eight additional 85 MW natural-gas combustion turbines in 2001.

## **Integrated Resource Plan**

In December 1995, the Board approved TVA's Integrated Resource Plan ("IRP") that presents TVA's strategy for meeting future customer energy demands. The IRP identifies a 25-year, least-cost energy resource strategy for TVA's power system. TVA's IRP strategy relies on a portfolio of energy resource options that made up the best strategies evaluated for the TVA power system. These strategies performed well across all of the IRP evaluation criteria, including debt, rates, costs, reliability and environmental impacts and regulations. These strategies are designed to enable TVA to respond to future demands in a manner that maintains flexibility and enhances its competitive position. Included in the portfolio are customer service options such as energy conservation and load management; supply side options, including power purchased from other producers; and investigation and use of renewable energy. TVA continues to review and update its resource plans.

## **ELECTRICITY FUTURES CONTRACTS**

TVA may enter into electricity futures contracts for the sole purpose of limiting or otherwise hedging TVA's economic risks directly associated with electric power generation, purchases and sales. The Chicago Board of Trade has designated the TVA power transmission system as a hub for electricity futures contracts.

## **NUCLEAR POWER PROGRAM**

### **Overview**

TVA has five operating nuclear units at three locations: Sequoyah Units One and Two, Browns Ferry Units Two and Three and Watts Bar Unit One. Construction activities at three additional units have been suspended. One licensed unit remains in an inoperative status. See detailed discussions on all operating and inoperative nuclear units in the sections below and note 2 of the accompanying Financial Statements.

### **Sequoyah**

Sequoyah is a two-unit plant located approximately 7.5 miles northeast of the city limits of Chattanooga, Tennessee, with pressurized water reactors supplied by Westinghouse Electric Corporation. Unit One is rated at 1,147 MW net electrical output. Unit Two is rated at 1,142 MW net electrical

output. TVA received an Operating License for Unit One in 1980, and the unit began commercial operation in 1981. TVA received an Operating License for Unit Two in 1981, and the unit began commercial operation in 1982. The Operating Licenses for these units expire 40 years after issuance. TVA designed, built and operates the plant. TVA voluntarily shut down both units in 1985 in response to technical and operational concerns.

Both Sequoyah units returned to commercial operation in 1988. Sequoyah Units One and Two have recorded a 90.0 average percent equivalent availability for a three-year period ending September 30, 1999. The "equivalent availability" is the ratio of the energy a unit could have generated, if called on, to the energy the unit would have produced if it had run at full load over the entire period measured, expressed as a percentage.

### **Browns Ferry**

Browns Ferry is a three-unit plant located approximately 10 miles southwest of Athens, Alabama, with boiling water reactors supplied by General Electric Company. Each unit was originally rated at 1,065 MW net electrical output. However, Unit Three was uprated five percent during the cycle 8 refueling outage and Unit Two was uprated during the cycle 10 outage in May 1999. For both units, net electrical output is 1,118 MW. TVA designed, built and operates the plant. TVA received Operating Licenses for Units One, Two and Three in 1973, 1974 and 1976, respectively. These units began commercial operation in 1974, 1975 and 1977, respectively. The Operating Licenses for these units expire 40 years after issuance. TVA voluntarily shut down Units One, Two and Three in 1985 in response to technical and operational concerns.

Browns Ferry Unit Two returned to commercial operation in 1991. Browns Ferry Unit Two has recorded a 91.5 average percent equivalent availability factor for a three-year period ending September 30, 1999.

TVA restarted Browns Ferry Unit Three in November 1995, and the unit returned to commercial operation in January 1996. Browns Ferry Unit Three recorded a 91.1 percent equivalent availability factor from restart through September 30, 1999.

Browns Ferry Unit One has been idled since March 1985. Major modifications would be required to bring the plant to current standards. At September 30, 1999, the undepreciated cost of Browns Ferry Unit One was \$66 million. In 1994, preliminary cost estimates based on IRP information indicated that cost associated with returning Unit One to service would have been between \$1.2 and \$3.2 billion. See “Status of Certain Nuclear Units” for a further discussion of the status of Browns Ferry Unit One.

### **Watts Bar**

Watts Bar is a two-unit plant located approximately 50 miles northeast of Chattanooga, Tennessee, with pressurized water reactors supplied by Westinghouse Electric Corporation. Unit One is rated at 1,158 MW net electrical output. TVA designed and built the plant to its present level of completion. In October 1999, TVA submitted its request for extension of the Construction Permit for Unit Two. Pending NRC action, the permit is extended beyond its December 1999 expiration date.

Although physical construction of Watts Bar Unit One was substantially complete in 1985, efforts to obtain an Operating License were delayed due to numerous safety concerns. Overall plant design was reverified, and extensive modifications were made. The NRC granted TVA a license to operate Unit One at up to five percent of rated power in November 1995 and at full power in February 1996. Watts Bar Unit One commenced full power commercial operation in May 1996. The Operating License for Unit One expires 40 years after issuance. Watts Bar Unit 1 has recorded an 84.3 percent equivalent availability factor for a three-year period ending September 30, 1999.

In 1988, TVA suspended construction activities at Watts Bar Unit Two because of a reduction in the forecasted load growth. Total investment in Unit Two at September 30, 1999, was \$1.7 billion, including capitalized interest. In 1994, preliminary cost estimates based on IRP information indicated that the cost associated with completing Unit Two would have been between \$1.1 and \$2.9 billion. See “Status of Certain Nuclear Units” for a further discussion of the status of Unit Two.

### **Bellefonte**

Bellefonte is a two-unit power plant located approximately 59 miles southwest of Chattanooga, Tennessee. Each unit has a pressurized water reactor supplied by Babcock & Wilcox Company rated at 1,212 MW net electrical output. TVA designed and built the plant to its present level of completion. Construction Permits were obtained from the NRC for both units in December 1974.

TVA deferred construction activities on Bellefonte Unit Two because of a reduction in forecasted load growth in October 1985. TVA deferred construction activity on Unit One in July 1988. In March 1993, TVA notified the NRC of its plans to resume completion activities at Bellefonte, but no construction activities have occurred since 1988. Construction Permits for Unit One and Unit Two have been extended by the NRC to 2001 and 2004, respectively.

As of September 30, 1999, TVA had \$4.6 billion, including capitalized interest, invested in these units. See “Status of Certain Nuclear Units” for discussion of Bellefonte’s current status. In 1994, preliminary cost estimates based on IRP information indicated that cost associated with completing the Bellefonte units would have been between \$1.3 and \$3.5 billion for Unit One and \$900 million and \$2.4 billion for Unit Two.

### **Status of Certain Nuclear Units**

Preliminary cost estimates, utilizing the IRP (see “Power System” — “Integrated Resource Plan”), showed that completing the units at Bellefonte and Watts Bar Unit Two may not be economically feasible. Consequently, in December 1994 the Board announced a major change in policy declaring that TVA will not, by itself, complete Bellefonte Units One and Two and Watts Bar Unit Two as nuclear units. Additionally, the Board decided that Browns Ferry Unit One would continue in its inoperative status.

TVA’s IRP identified as a viable option the conversion of the Bellefonte facility to a combined-cycle plant utilizing natural gas or gasified coal. In 1997, an independent team of technical and financial experts completed a feasibility study to evaluate options for the conversion of Bellefonte Nuclear Plant to a fossil fuel-fired plant. The feasibility study indicates that one of the most economical fossil conversion strategies is to complete Bellefonte

as a natural gas-fired combined-cycle plant. TVA also issued an Environmental Impact Statement (“EIS”) assessing the environmental impacts of various fossil conversion options. The EIS identified the natural gas-fired combined-cycle plant alternative as the preferred option.

Although TVA submitted a proposal to the United States Department of Energy (“DOE”) to complete Bellefonte as a nuclear plant, provide DOE irradiation services for the production of tritium and operate the plant to produce electricity, DOE decided to pursue an alternate option for irradiation services at TVA. Accordingly, this option for Bellefonte is no longer being considered by TVA, and Bellefonte is in deferred status.

Tritium is an isotope of hydrogen that is used in all of the United States’ nuclear weapons. Tritium decays at the rate of five percent per year and must be replaced periodically. The United States has not produced tritium since 1988. An agreement in principle has been reached between TVA and DOE for TVA to use Watts Bar Unit One and its Sequoyah Nuclear Units, if necessary, to provide irradiation services for the production of tritium. TVA’s efforts during the first three to four years of the proposed agreement would focus on obtaining operating license amendments to allow the provision of irradiation services and on performing any necessary modifications to the plants to enable TVA to provide irradiation services.

At September 30, 1999, TVA’s total investment in Bellefonte Units One and Two, Watts Bar Unit Two and Browns Ferry Unit One was \$6.4 billion. TVA’s future decisions regarding these units will ultimately impact the method of cost recovery. The Board has determined that it will establish rate adjustments and operating policies to ensure full recovery of the cost of these units and compliance with the requirements of the TVA Act.

Because of extensive regulatory requirements and resulting delays which are often very lengthy, estimates of the cost to complete nuclear plants have typically been unreliable. No assurance can be given that TVA’s cost estimates (which have not been revised since the IRP was completed in 1994) would not change significantly if a decision were made to complete or operate any of TVA’s inoperative units.

## **Nuclear Fuel**

TVA owns all nuclear fuel held for its operating and deferred nuclear units. The net book value of this fuel was \$394 million as of December 31, 1999. TVA will fill future uranium requirements by a combination of term and spot purchase contracts while maintaining diversity of supply source. TVA currently has approximately 90 percent of its forward 5-year (2000-2004) uranium requirements either in inventory or under contract. TVA generally fills conversion, enrichment and fabrication services needs on a requirements basis under term contracts.

TVA’s investment in the fuel being used in the Sequoyah, Watts Bar and Browns Ferry units is being amortized and accounted for as a fuel expense. The Bellefonte initial cores have been defabricated, and uranium from these cores has been used in the Sequoyah and Browns Ferry units with the net book value assigned accordingly.

## **Nuclear Waste**

### *Spent Nuclear Fuel*

The Nuclear Waste Policy Act of 1982 (the “NWP”) gives the federal government the responsibility for the permanent disposal of spent nuclear fuel but gives each nuclear power system the responsibility for the cost of permanent disposal. The NWP requires each nuclear power system to enter into a disposal contract with DOE for spent nuclear fuel. This contract requires each nuclear power system to pay a fee that is currently one mill per kWh for the net electricity generated by each of its reactors and sold. Although it is uncertain when DOE will be able to begin accepting spent nuclear fuel, TVA believes its spent-fuel efforts will ensure that sufficient at-reactor storage is available to meet all of TVA’s spent-fuel storage requirements until DOE is prepared to accept TVA’s spent fuel.

TVA presently has the capability to store its spent fuel at Sequoyah through the year 2004, at Browns Ferry Units One and Two through the year 2013 and at Browns Ferry Unit Three through the year 2006. Based on a one-unit operation, TVA has the capability to store its spent fuel at Watts Bar through the year 2018.

TVA plans to extend storage capability through life-of-plant if necessary by using higher density racks in its existing storage pools or dry storage casks. Additional storage capacity increases will

require NRC approval. However, all of the above methods of extending storage capability have been licensed by the NRC at other facilities.

#### *Low-Level Radioactive Waste*

Disposal costs for low-level radioactive waste that result from normal operation of nuclear units have increased significantly in recent years. Pursuant to the Low-Level Radioactive Waste Policy Act, each state is responsible for disposal of low-level waste generated in that state. States may form regional compacts to jointly fulfill their disposal responsibilities. The States of Tennessee and Alabama (where TVA's nuclear plants are located) have joined with other southeastern states to form the Southeast Compact Commission for Low-Level Radioactive Waste Management. This commission regulates the siting of new disposal facilities and the disposal of low-level waste within the southeastern states.

Until July 1995, the low-level waste generators located in the southeastern states were required to dispose of their radwaste at the Barnwell, South Carolina, disposal facility. At that time, South Carolina withdrew from the Southeast Compact in order to open the Barnwell facility to all states except North Carolina. The states participating in the Southeast Compact had selected North Carolina as the host state to select, license and construct a new disposal site. Because of funding and licensability issues, however, it appears that North Carolina will not provide a new disposal site.

South Carolina has recently announced its intention to close the Barnwell disposal facility with the possibility of using it only for the disposal of South Carolina radwaste in the future. Because of the impending closure of the Barnwell facility and the cost of low-level radwaste disposal and access fees, TVA began a review of its storage and disposal options for low-level radwaste management. In July 1999, TVA began storage of the type of low-level radwaste that had previously been sent to Barnwell at the storage facilities built on TVA's plant sites in 1981. These facilities are sized to handle the anticipated storage needs for the foreseeable life of the plants. TVA continues to send dry radioactive waste to the Envirocare of Utah disposal facility in Clive, Utah, based on economics.

#### **Nuclear Insurance**

In 1988, Congress extended the indemnification and limitation of liability plan afforded the United States nuclear industry by the Price-Anderson Act for an additional 15 years. Certain provisions of the Price-Anderson Act are now due to expire on August 1, 2002. Under the Price-Anderson Act, the limit of liability from an accident at an NRC-licensed reactor is approximately \$9.3 billion (\$88 million for each of the NRC-licensed reactors in the United States), composed of primary and secondary layers of financial protection. This amount is periodically adjusted for inflation. For further information about this nuclear liability insurance and its deferred premium, see note 9 of the accompanying Financial Statements. In accordance with industry practice, TVA maintains certain liability insurance coverage for workers at its nuclear sites.

NRC regulations require nuclear power plant licensees to obtain, and TVA has acquired, onsite property damage insurance coverage of \$1.06 billion per nuclear site. Some of the nuclear property insurance may require the payment of retrospective premiums of up to approximately \$19.4 million in the event that losses by another insured party or TVA exceed available funds. In accordance with NRC regulations, the proceeds of nuclear property insurance are first used to ensure that the reactor is in safe and stable condition and that it can be maintained in a condition that prevents significant risk to the public. Next, the proceeds are used for decontamination or, if necessary, decommissioning the reactor. Any excess proceeds insure against casualties to property.

#### **Decommissioning**

Consistent with NRC requirements, TVA has established decommissioning trusts to assure the availability of adequate funds for decommissioning TVA's nuclear plants. In prior years, TVA charged the excess of the annual decommissioning provision over earnings from any investments designated for funding decommissioning costs to depreciation expense. TVA made investments in amounts that are expected to grow to be sufficient to fully fund all estimated decommissioning costs. Beginning in fiscal 1998, TVA changed its method of accounting for decommissioning costs and related liabilities. TVA now recognizes, as incurred, all obligations related to closure and removal of its nuclear units.

TVA measures the liability for closure at the present value of the estimated cash flows required to satisfy the related obligation and discounted at a determined risk-free rate of interest. The corresponding charge to recognize the additional obligation was effected through the creation of a regulatory asset. TVA further modified its method of accounting for decommissioning costs such that earnings from decommissioning fund investments, amortization expense of the decommissioning regulatory asset and interest expense on the decommissioning liability are deferred in accordance with Statement of Financial Accounting Standards No. 71, "Accounting for the Effects of Certain Types of Regulation." The book value of TVA's decommissioning fund investments was \$724 million at September 30, 1999. See notes 1 and 9 of the accompanying Financial Statements.

## **ENVIRONMENTAL MATTERS**

TVA's activities are subject to various federal, state and local environmental statutes and regulations. Major areas of regulation affecting TVA's activities include air pollution control, water pollution control and management and disposal of solid and hazardous wastes. Because TVA is a federal agency, it is subject only to those state and local environmental requirements for which Congress has clearly waived federal agency immunity. Respecting the major environmental areas (air, water and waste), limited waivers have been enacted by Congress. TVA's activities may also be subject to other narrower environmental requirements or to environmental requirements that affect only federal activities.

TVA has incurred and continues to incur substantial capital expenditures and operating expenses to comply with environmental requirements. See note 9 of the accompanying Financial Statements. Because these requirements change frequently, the total amount of these costs is not now determinable. It is anticipated that environmental requirements will become more stringent and that compliance costs will increase, perhaps by substantial amounts.

### **Air Pollution**

Under the Clean Air Act, the United States Environmental Protection Agency ("EPA") has promulgated national ambient air quality standards for certain air pollutants, including sulfur dioxide,

particulate matter and ozone. Coal-fired generating units such as TVA's are major sources of these pollutants or their precursors. TVA also operates other facilities that are smaller sources of these pollutants. The States of Alabama and Tennessee and the Commonwealth of Kentucky have promulgated implementation plans that regulate sources of air pollution within their boundaries, including TVA sources, in order to achieve and maintain the national ambient standards. TVA has installed air pollution control equipment and employs strategies to comply with applicable state-established emission limitations.

The acid rain control provisions of the 1990 Amendments to the Clean Air Act established a number of additional requirements for utilities. EPA and states are implementing these requirements in two phases. Through fiscal 1999, TVA had invested approximately \$940 million in capital for Phase 1 and Phase 2 compliance. TVA estimates it will spend an additional \$160 million to \$175 million in capital through 2005 to finalize the Phase 2 compliance measures.

Mountain air quality is an issue that is currently receiving significant attention. The Southern Appalachian Mountains Initiative is studying the effects of emissions from power plants and other sources on National Parks (including the Great Smoky Mountains and Shenandoah National Parks) and wilderness areas in the southeast. This assessment will be completed in 2001. It is too early to determine what, if any, additional power plant sulfur dioxide or nitrogen oxide controls might be required to improve mountain air quality.

During 1998, TVA unveiled a new clean air strategy that will reduce nitrogen oxide emissions from its coal fired plants by up to 168,000 tons per year by 2003. Under this strategy TVA will install equipment in at least ten units at various fossil plants that breaks down nitrogen oxide into nitrogen and water. The cost of implementing this strategy at ten units will be between \$500 million and \$600 million, in addition to amounts that TVA has already spent to comply with the 1990 Amendments to the Clean Air Act. The installation of new equipment will improve local and regional air quality and allow Tennessee Valley states greater flexibility for industrial and economic growth in the region.

TVA's new nitrogen oxide reduction strategy is consistent with the type of controls that would be

needed to comply with EPA's mandated revisions to State Implementation Plans for reduction of ozone transport (the "NO<sub>x</sub> SIP Call Rule"). However, the strategy will not by itself bring TVA into compliance with expected revisions to state plans, depending on the level of generation from TVA's coal-fired units.

EPA has finalized new, more stringent particulate matter standards and a rule to reduce regional haze. These actions may require TVA to make additional reductions of sulfur dioxide emissions beyond those currently planned. TVA anticipates that compliance with the new regulations will be required after 2010.

TVA cannot with certainty determine the costs for additional reductions of nitrogen oxide, sulfur dioxide and particulate matter emissions beyond those required by the acid rain provisions of the 1990 Amendments to the Clean Air Act. In addition, recent court decisions have "remanded" the ozone and fine particulate standards, and "stayed" a key date in the NO<sub>x</sub> SIP Call Rule. These actions create additional uncertainty regarding future air regulatory requirements facing utilities. However, the costs for these additional reductions could exceed \$2.5 billion.

EPA is investigating whether coal-fired utilities in the eastern United States, including TVA, may have modified their coal-fired boilers without complying with new source review requirements. The outcome of this investigation is ongoing and uncertain. However, EPA has issued TVA an administrative order directing TVA to put "new-source" controls on ten of its units and to evaluate whether more controls should be installed on other units. TVA has challenged the validity of this order. It is not possible to predict with certainty what impact implementation of EPA's order would have on TVA if TVA's challenge is unsuccessful. In a worst case scenario, however, TVA might have to incur in excess of \$2 billion of capital costs (net present value) by 2010 to 2015 in order to implement EPA's order. While the timing and amounts may vary, the control measures implemented pursuant to EPA's order are expected to be similar to those implemented under the environmental initiatives discussed above.

The Clinton Administration signed the Kyoto Protocol to the United Nations Framework Convention on Climate Change in November 1998. If

ratified by the Senate, the protocol would require the United States to reduce its annual greenhouse gas emissions (including carbon dioxide) around 2008 to 2012 to a level seven percent below 1990 emission levels. Such a national requirement would likely require electric utilities to achieve similar reductions. The costs to utilities to achieve these reductions could be substantial.

## **Water Pollution**

Under the Clean Water Act, every point source which discharges pollutants into waters of the United States must obtain a National Pollutant Discharge Elimination System ("NPDES") permit specifying the allowable quantity and characteristics of the pollutants discharged. TVA's various point sources have received NPDES permits, including all of its major generating units. Compliance with NPDES requirements has necessitated substantial expenditures and may require additional, substantial expenditures in the future as NPDES permits come up for renewal and applicable requirements become more stringent.

The Clean Water Act allows the permitting authority to establish thermal limits less stringent than the water quality criteria if the discharger can demonstrate that the alternate limit will assure protection and propagation of a balanced, indigenous aquatic population. TVA has now been issued alternate limits at several of its facilities, and it is meeting these limits. EPA has a rulemaking underway that would address the design of water intakes. The rulemaking is not expected to be completed for several years but could require changes to be made at TVA facilities. The cost of such changes is uncertain.

## **Solid and Hazardous Waste Management**

Under the Resource Conservation and Recovery Act ("RCRA"), the storage, transportation and disposal of hazardous wastes are regulated by EPA and the states. RCRA also allows EPA and the states to regulate solid wastes, and the states have detailed permitting programs for this. TVA has detailed procedures in place designed to ensure compliance with all applicable requirements for the management of hazardous wastes. Additionally, TVA has instituted an approved supplier list for hazardous waste disposal contractors under which such contractors' financial status, compliance his-

tory and physical facilities and operations can be reviewed before they are allowed to treat or dispose of any of the hazardous wastes generated by TVA facilities. TVA does not itself operate any hazardous waste disposal or treatment facilities but does operate a permitted hazardous waste storage facility in Muscle Shoals, Alabama. TVA maintains solid waste disposal permits for the solid waste disposal areas (e.g., fly ash, scrubber sludge, demolition materials and asbestos) it operates at some of its plant sites. TVA's costs in this area have not been substantial, but applicable requirements change frequently and are expected to become more stringent.

Under the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), the release and cleanup of hazardous substances are regulated. Certain persons associated with the release of hazardous substances to the environment can be held responsible for their cleanup, regardless of when the substances were released or when the specific person may have been associated with the substance. This liability under CERCLA is generally viewed as joint and several. In a manner similar to other industries and power systems, TVA has generated or used hazardous substances over the years. In connection with these activities, TVA has been identified as a potentially responsible party or received EPA information requests related to five non-TVA sites at which TVA hazardous substances may have been disposed. TVA's potential liabilities for its share of cleanup costs at all five of these sites are estimated to be less than \$100,000.

### **Miscellaneous**

Polychlorinated biphenyls ("PCBs") have been widely used as insulating fluids in electric equipment such as transformers and capacitors. Use of this equipment and the cleanup of released PCBs are regulated by EPA under the Toxic Substances Control Act. The TVA power system uses thousands of pieces of equipment that contain some level of PCBs. This equipment, when maintained properly, may continue to be operated under TVA's PCB regulations for the remainder of its useful lives. However, TVA is phasing out much of this equipment as a matter of policy. The cost of phasing out the remainder of this equipment should not exceed \$40 million (for equipment replacement and disposal costs) but cannot be accurately determined at this time. TVA has detailed procedures in

place to conform its operations to EPA's PCB regulations and has not incurred substantial costs in this area.

The National Emissions Standard for Hazardous Air Pollutants (NESHAP) defines the environmental protection requirements for the management of asbestos. Many of TVA's facilities were constructed at a time when asbestos was the insulation of choice by industry. Special handling and disposal are required when asbestos materials are removed. TVA is removing or encapsulating asbestos as appropriate.

There is public concern about whether there are adverse health effects from exposure to electric and magnetic fields ("EMF"). There are many sources of EMF, including electric transmission lines. Certain research, including a report by a National Academy of Sciences organization, has not found conclusive evidence that EMF causes adverse health effects. Other research, such as a report by the National Institute of Environmental Health Sciences, has found limited evidence that certain types of exposure to EMF are carcinogenic. Research in this area continues. Substantial costs could be incurred by electric systems, including TVA, if EMF levels from transmission lines have to be reduced, but this appears unlikely at this time.

As a federal agency, TVA is required to consider the potential environmental effects of major federal actions affecting the quality of the human environment under the National Environmental Policy Act (the "NEPA") and implementing regulations and to make these evaluations available to the public. TVA has incorporated the NEPA review process into its decision making process. NEPA-related costs are incurred continuously but not in substantial amounts.

### **INSURANCE**

TVA does not generally carry property damage or public liability insurance except (1) as may be required or appropriate with respect to nuclear facilities and (2) to the extent it may do so as part of an owner-controlled insurance program it has implemented for some large contracts requiring on-site labor. The Federal Employees' Compensation Act governs liability for service-connected injuries to employees. See "Nuclear Power Program" — "Nuclear Insurance" herein and note 9 of the accompanying Financial Statements for additional information with respect to insurance.

**PENDING LITIGATION**

EPA has issued TVA an administrative order directing TVA to put “new-source” controls on ten of its units and to evaluate whether more controls should be installed on other units. TVA has challenged the validity of this order. See “Environmental Matters” — “Air Pollution” for a further discussion of this order.

TVA is a party to various other civil lawsuits and claims that have arisen in the ordinary course of its business. Although the outcome of these other civil lawsuits and claims cannot be predicted with any certainty, it is the opinion of TVA counsel that their ultimate outcome should not have a material adverse effect on TVA’s financial position or results of operations.

**MANAGEMENT**

TVA is administered by a board of directors composed of three persons appointed by the President and confirmed by the Senate. The Board and selected officers, their ages, their years of employment with TVA and principal occupations for recent years are as follows:

| <u>Name and Title</u>  | <u>Age</u> | <u>Year Commenced Employment</u> | <u>Year Term Expires</u> |
|--|------------|----------------------------------|--------------------------|
| Craven Crowell . . . . .<br>Chairman   | 56         | 1993                             | 2002                     |
| Skila Harris . . . . .<br>Director   | 49         | 1999                             | 2008                     |
| Glenn L. McCullough, Jr. . . . .<br>Director   | 45         | 1999                             | 2005                     |
| Oswald J. Zeringue . . . . .<br>President and Chief Operating Officer                                      | 54         | 1989                             |                          |
| John A. Scalice . . . . .<br>Chief Nuclear Officer & Executive Vice President, TVA Nuclear                 | 52         | 1989                             |                          |
| David N. Smith . . . . .<br>Chief Financial Officer & Executive Vice President, Financial Services         | 55         | 1995                             |                          |
| Norman A. Zigrossi . . . . .<br>Chief Administrative Officer & Executive Vice President, Business Services | 64         | 1986                             |                          |
| Edward S. Christenbury . . . . .<br>General Counsel and Secretary  | 58         | 1987                             |                          |

Mr. Crowell was appointed to the Board in July 1993. Prior to his current position, he served as Chief of Staff for Jim Sasser, Tennessee’s then-senior United States Senator (1989-1993), as Vice President of TVA’s Office of Governmental & Public Affairs (1988-1989) and as TVA’s Director of Information (1980-1988).

Ms. Harris was appointed to the Board in November 1999. Prior to her current position, she served at DOE as Executive Director of the Secretary of Energy Advisory Board. From 1993 until 1997, she was a Special Assistant to Vice President Gore and Ms. Gore’s Chief of Staff. She came to the White House from Steiner-Liff Iron and Metal Company in Nashville, Tennessee, where she was Vice President for Development and Compliance. Ms. Harris served as a project manager at the U.S. Synthetic Fuels Corporation, and she was with

DOE during the Carter Administration. She has also held positions with management and engineering consulting firms specializing in energy-related work.

Mr. McCullough was appointed to the Board in November 1999, having served as the mayor of Tupelo, Mississippi, since 1997. Prior to his election as mayor of Tupelo, he was the director of the Mississippi office of the Appalachian Regional Commission. Director McCullough also worked in the family business, McCullough Steel Products, for 12 years.

Mr. Zeringue was named President and Chief Operating Officer in April 1998. Prior to his current position, he served as Chief Nuclear Officer & Executive Vice President (1997-1998), as Senior Vice President, Nuclear Operations (1993-1997),

as Browns Ferry Site Vice President (1989-1993) and as Plant Manager of Palo Verde Nuclear Station, Arizona Public Service Company (1987-1989).

Mr. Scalice was named Chief Nuclear Officer & Executive Vice President, TVA Nuclear in June 1998. Prior to his current position, he served as Acting Chief Nuclear Officer (beginning April 1998), as Senior Vice President of Nuclear Operations (1997-1998), as Watts Bar Site Vice President (1993-1997), as Plant Manager of Browns Ferry Nuclear Plant (1991-1993), as Plant Manager of Watts Bar Nuclear Plant (1989-1991) and as Plant Manager of Shoreham Nuclear Power Station, Long Island Lighting Company (1989).

Mr. Smith was named Chief Financial Officer in January 1995 and additionally was named Executive Vice President, Financial Services, in October 1996. Prior to his current position, he served as Executive Director of Odyssey Financial (1993-1994), as Vice President of Finance of LTV Corporation (1991-1993) and as Assistant Treasurer and Director of Corporate Finance of LTV Corporation (1986-1991).

Mr. Zigrossi was named Chief Administrative Officer in February 1994 and additionally was named Executive Vice President, Business Services, in October 1996. Prior to his current position, he served as TVA's President, Resource Group (1992-1994) and as TVA's Inspector General (1986-1992).

Mr. Christenbury assumed the position of General Counsel of TVA in January 1987. Prior to his current position, he served as an Assistant General Counsel at the NRC (1980-1987).

## **EMPLOYEES**

On September 30, 1999, TVA had about 13,300 employees, of which approximately 5,000 were trades and labor employees. Neither the federal labor relations laws covering most private sector employers nor those covering most federal agencies apply to TVA. However, the Board has a long-standing policy of recognizing and dealing with recognized representatives of its employees. Federal law prohibits TVA employees from engaging in strikes against TVA.

TVA has entered into separate long-term recognition agreements with the Tennessee Valley Trades and Labor Annual Council ("Annual

Council"), the International Brotherhood of Teamsters ("Teamsters"), and four unions that represent TVA's salary policy (white collar) employees (collectively, the "Salary Policy Unions"). These agreements typically provide for negotiation of most provisions except monetary matters about every three years. Wage and salary and benefit negotiations or adjustments generally occur annually. Unresolved disputes over rates of pay for trades and labor employees are resolved by binding decisions of the Secretary of Labor. Pay and monetary benefits disputes for other represented employees are resolved through binding arbitration. The recognition agreements with the Annual Council and the Teamsters recognize these entities or their successors through 2007. The agreements with the Salary Policy Unions recognize these entities or their successors through 2012.

TVA currently has separate collective bargaining agreements in place with the Teamsters, the Annual Council and each of the Salary Policy Unions. With the expiration of parts of the collective bargaining agreement between TVA and the Annual Council in December 1997, TVA exercised its right to give a 90-day notice to reopen the remainder of the agreement with the Annual Council and potentially to cancel the agreement. In April 1998, negotiations pursuant to this reopening ended in impasse. To date, TVA has not exercised its right to cancel the agreement, and there is a pending lawsuit by the Annual Council against TVA in which the Annual Council claims that TVA cannot cancel the agreement at this time. Additionally, TVA has notified the Annual Council that a dispute exists concerning the employees who constitute an appropriate bargaining unit. Following a hearing on this matter, TVA issued a decision finding that one bargaining unit is appropriate for its power organizations and that another bargaining unit is appropriate for trades and labor work within two other organizations. These two units would replace the six separate bargaining units that represent trades and labor employees covered by the TVA-Annual Council agreement. The Annual Council's position is that no bargaining unit dispute exists. Under the collective bargaining agreement, bargaining unit disputes may be appealed to arbitration. TVA and the Annual Council are again conducting negotiations on a new collective bargaining agreement covering annual trades and labor employees. TVA has advised the Annual Council

that it will hold any further action on the bargaining unit issue in abeyance during these negotiations.

Salaries of regular TVA employees are limited by a federal pay cap (Executive Level IV, currently \$122,400). The pay cap makes it a challenge for TVA to recruit and retain top management talent. TVA has addressed this issue by developing and implementing supplementary compensation arrangements, which have substantially reduced the impact of the pay cap. TVA recently contracted for the services of a national compensation management firm to review TVA's compensation practices and recommend modifications which would minimize the impact of the pay cap when competing with utilities and other companies for executive talent. Based on that firm's recommendations, TVA has developed and implemented revised executive compensation practices to enhance TVA's ability to attract and retain the caliber of executive talent required to manage one of the largest power systems in the country. TVA believes the implementation of these arrangements is within its legal authority. In the past, the General Accounting Office ("GAO") has expressed the opinion that some of TVA's compensation arrangements are not within TVA's legal authority. However, GAO has no authority to issue binding legal opinions on this matter or to stop any TVA payments. Congress has been aware of TVA's supplemental compensation arrangements and has not taken any action that would undermine TVA's position that the arrangements are within its legal authority.

In October 1995, the President issued an Executive Order requiring government corporations, including TVA, to submit information to the Office of Management and Budget ("OMB") on bonuses paid to its senior executives. TVA submits information on these bonuses annually to OMB and also publicly disseminates this information. OMB approval of TVA's bonuses is not required.

#### **CERTAIN PROVISIONS OF THE TENNESSEE VALLEY AUTHORITY ACT**

*The following summary of certain provisions of the Act is **not complete** and is qualified in its entirety by reference to the full text of the Act.*

##### **Payments in Lieu of Taxes**

TVA is not subject to federal income taxes or to taxation by states or their subdivisions. However, the Act requires TVA to make payments in

lieu of taxes to states and counties in which the Corporation conducts power operations. The basic amount of these payments is 5 percent of gross revenues from the sale of power to entities other than federal agencies during the preceding year, with a provision for minimum payments under certain circumstances.

##### **Payments to the Treasury**

The Act requires TVA to make certain payments to the Treasury each year from Net Power Proceeds in excess of those required for debt service, as a return on and reduction of the Appropriation Investment. The Appropriation Investment totaled \$548 million as of September 30, 1999. Net Power Proceeds are defined as the remainder of gross power revenues from TVA's power program

*after deducting*

- the costs of operating, maintaining and administering its power properties (including multiple-purpose properties in the proportion that multiple-purpose costs are allocated to power) and
- payments to states and counties in lieu of taxes,

*but before deducting*

- depreciation accruals or other charges representing the amortization of capital expenditures,

*plus*

- the net proceeds of the sale or other disposition of any interest in TVA's power properties that constitute an operating unit or system.

##### **Acquisition of Real Estate**

The Act empowers TVA to acquire real estate in the name of the United States of America by purchase or by exercise of the right of eminent domain, "and thereupon all such real estate shall be entrusted to the Corporation as the agent of the United States to accomplish the purposes of [the] Act." Thus, you should read and construe all references in this Statement to TVA properties, and to the amounts invested in TVA properties, in the light of this provision of the Act.

## THE BASIC RESOLUTION; POWER BONDS, DISCOUNT NOTES AND OTHER INDEBTEDNESS

TVA issues Power Bonds pursuant to Section 15d of the Act and pursuant to the Basic Resolution. At December 31, 1999, TVA had U.S. \$21.1 billion, DM 1.5 billion (issued in September 1996) and £200 million (issued in December 1998) principal amount of Power Bonds outstanding. TVA may issue Power Bonds only to provide capital for TVA's power program (including refunding any Evidences of Indebtedness issued for like purposes) and only as authorized by law at the time of issuance. Power Bonds are payable as to both principal and interest solely from Net Power Proceeds, but TVA may, at its option, pay Power Bonds from the proceeds of refunding obligations or other funds legally available for such payment. *Power Bonds are not obligations of, or guaranteed by, the United States of America.* Net Power Proceeds for fiscal 1999, 1998 and 1997 were \$3.1 billion, \$3.2 billion and \$2.9 billion, respectively. Power Bonds of each series must be further authorized by Supplemental Resolution.

TVA intends from time to time to issue New Power Bonds with maturities and on terms determined in light of market conditions at the time of sale. TVA may sell New Power Bonds to dealers or underwriters, who may resell the New Power Bonds in public offerings or otherwise. Additionally, TVA may sell New Power Bonds directly or through other entities.

The offering circular, and any appropriate amendment or supplement to the offering circular, for each offering of New Power Bonds, except for FISBS, will set forth the following information: (1) the aggregate principal amount, (2) maturity, (3) interest rate or method for determining such rate, (4) interest payment dates, if any, (5) purchase price to be paid to TVA, (6) any terms for redemption or other special terms, (7) form and denomination of New Power Bonds, (8) information as to any stock exchange listing, (9) the names of any dealers, underwriters or agents, (10) a description of any amendments or supplements to the Basic Resolution in connection with the sale of the New Power Bonds, and (11) other terms of the New Power Bonds.

FISBS are New Power Bonds that TVA may issue from time to time in installments with maturities from one year to fifty years. TVA may offer

FISBS for sale from time to time to members of a group of securities dealers selected by TVA, who will resell the FISBS. The aggregate principal amount of all Installment Bonds outstanding at any one time will not exceed \$4 billion. The maximum effective rate payable on any Installment Bonds will not exceed 10 percent. Information relating to FISBS will be set forth in an Installment Bonds offering circular and in any appropriate amendments or supplements to the offering circular. At the time of each sale, TVA will determine if the FISBS being sold will be subject to redemption prior to the maturity date and will establish the purchase price, principal amount, interest rate or interest rate formula, maturity date and certain other terms of such sale.

TVA also issues Discount Notes pursuant to Section 15d of the Act and in accord with Section 2.5 of the Basic Resolution. As of December 31, 1999, TVA had approximately \$3.9 billion in Discount Notes outstanding. Discount Notes are payable solely from Net Power Proceeds, but TVA may, at its option, pay Discount Notes from the proceeds of refunding obligations or other funds legally available for such payment. *Discount Notes are not obligations of, or guaranteed by, the United States of America.* TVA intends to offer Discount Notes for sale on a continuous basis to a group of securities dealers selected by TVA, who will resell the notes. TVA will issue Discount Notes in a form and upon terms and conditions as it deems appropriate. Certain information respecting Discount Notes will be set forth in a Discount Notes offering circular and any appropriate supplement to the offering circular.

TVA from time to time may issue Other Indebtedness, in addition to New Power Bonds and Discount Notes, to assist in financing its Power Program. TVA issues Other Indebtedness, such as Quarterly Income Debt Securities ("QIDS"), pursuant to Section 15d of the Act and under appropriate authorizing resolutions. At December 31, 1999, TVA had outstanding \$1.1 billion principal amount of QIDS. TVA may issue subordinated debt securities, such as QIDS, from time to time with maturities and on terms determined in light of market conditions at the time of sale. TVA may sell subordinated debt securities to dealers or underwriters, who may resell them in public offerings or otherwise. Additionally, TVA may sell subordinated debt securities directly or through other entities. TVA subordinated debt securities will be

payable as to both principal and interest solely from Net Power Proceeds, but TVA may, at its option, pay subordinated debt securities from the proceeds of refunding obligations or other funds legally available for such payment. *Subordinated debt securities are not obligations of, or guaranteed by, the United States of America.*

An offering circular, and any appropriate amendment or supplement to the offering circular, for each offering of Other Indebtedness will set forth the following information: (1) the aggregate principal amount, (2) maturity, (3) interest rate or method for determining such rate, (4) interest payment dates, if any, (5) purchase price to be paid to TVA, (6) any terms for redemption or other special terms, (7) form and denomination of Other Indebtedness, (8) information as to any stock exchange listing, (9) the names of any dealers, underwriters or agents, and (10) other terms of Other Indebtedness. *Other Indebtedness will not be obligations of, or guaranteed by, the United States of America.*

*The following summary of certain provisions of the Basic Resolution is **not complete** and is qualified in its entirety by reference to the full text of the Basic Resolution. See also "Recent Legislation."*

#### **Application of Net Power Proceeds**

*Section 2.3 of the Basic Resolution provides as follows:*

Net Power Proceeds shall be applied, and the Corporation hereby specifically pledges them for application, first to payments due as interest on Bonds, on Bond Anticipation Obligations, and on any Evidences of Indebtedness issued pursuant to Section 2.5 which rank on a parity with Bonds as to interest; to payments of the principal due on Bonds for the payment of which other provisions have not been made and on any Evidences of Indebtedness issued pursuant to Section 2.5 which rank on a parity with Bonds as to principal and for the payment of which other provisions have not been made; and to meeting requirements of sinking funds or other analogous funds under any Supplemental Resolutions. The remaining Net Power Proceeds shall be used only for:

(a) Required interest payments on any Evidences of Indebtedness issued pursuant to

Section 2.5 which do not rank on a parity with Bonds as to interest.

(b) Required payments of or on account of principal of any Evidences of Indebtedness which do not rank on a parity with Bonds as to principal.

(c) Minimum payments into the United States Treasury required by the Act in repayment of and as a return on the Appropriation Investment.

(d) Investment in Power Assets, additional reductions of the Corporation's capital obligations, and other lawful purposes related to the Power Program; provided, however, that payments into the United States Treasury in any fiscal year in reduction of the Appropriation Investment in addition to the minimum amounts required for such purpose by the Act may be made only if there is a net reduction during such year in the dollar amount of outstanding Evidences of Indebtedness issued for capital purposes, and only to such extent that the percentage of aggregate reduction in the Appropriation Investment during such year does not exceed the percentage of net reduction during the year in the dollar amount of outstanding Evidences of Indebtedness issued for capital purposes.

*Section 2.4 of the Basic Resolution provides as follows:*

The Corporation, having first adopted a Supplemental Resolution authorizing the issuance of a series of Bonds and pending such issuance, may issue Bond Anticipation Obligations and renewals thereof (including Interim Obligations to the Secretary of the Treasury) to be paid from the proceeds of such series of Bonds when issued or from other funds that may be available for that purpose.

*Section 2.5 of the Basic Resolution provides as follows:*

To assist in financing its Power Program the Corporation may issue Evidences of Indebtedness other than Bonds and Bond Anticipation Obligations, which may be payable out of Net Power Proceeds subject to the provisions of Section 2.3 hereof. Such other Evidences of Indebtedness may rank on a parity with but shall not rank ahead of the Bonds as

to payments on account of the principal thereof or the interest thereon.

See “Recent Legislation” for a discussion of legislation relating to appropriations for TVA’s nonpower programs and the funding of such programs, including the use of power revenues.

### **Rate Covenant**

Section 3.2 of the Basic Resolution provides as follows:

The Corporation shall fix, maintain, and collect rates for power sufficient to meet in each fiscal year the requirements of that portion of the present subsection (f) of section 15d of the Act which reads as follows:

The Corporation shall charge rates for power which will produce gross revenues sufficient to provide funds for operation, maintenance, and administration of its power system; payments to States and counties in lieu of taxes; debt service on outstanding bonds, including provision and maintenance of reserve funds and other funds established in connection therewith; payments to the Treasury as a return on the appropriation investment pursuant to subsection (e) hereof; payment to the Treasury of the repayment sums specified in subsection (e) hereof; and such additional margin as the Board may consider desirable for investment in power system assets, retirement of outstanding bonds in advance of maturity, additional reduction of appropriation investment, and other purposes connected with the Corporation’s power business, having due regard for the primary objectives of the Act, including the objective that power shall be sold at rates as low as are feasible.

For purposes of this Resolution, “debt service on outstanding bonds,” as used in the above provision of the Act, shall mean for any fiscal year the sum of all amounts required to be (a) paid during such fiscal year as interest on Evidences of Indebtedness, (b) accumulated in such fiscal year in any sinking or other analogous fund provided for in connection with any Evidences of Indebtedness, and (c) paid in such fiscal year on account of the principal of any Evidences of Indebtedness for the payment of which funds

will not be available from sinking or other analogous funds, from the proceeds of re-funding issues, or from other sources; provided, however, that for purposes of clause (c) of this definition Bond Anticipation Obligations and renewals thereof shall be deemed to mature in the proportions and at the times provided for paying or setting aside funds for the payment of the principal of the authorized Bonds in anticipation of the issuance of which such Bond Anticipation Obligations were issued.

The rates for power fixed by the Corporation shall also be sufficient so that they would cover all requirements of the above-quoted provision of subsection (f) of section 15d of the Act if, in such requirements, there were substituted for “debt service on outstanding bonds” for any fiscal year the amount which if applied annually for 35 years would retire, with interest at the rates applicable thereto, the originally issued amounts of all series of Bonds and other Evidences of Indebtedness, any part of which was outstanding on October 1 of such year.

### **Covenant for Protection of Bondholders’ Investment**

Under the Act and Section 3.3 of the Basic Resolution, TVA must, in each successive five-year period beginning October 1, 1960, use an amount of Net Power Proceeds at least equal to the sum of (1) depreciation accruals and other charges representing the amortization of capital expenditures and (2) the net proceeds from any disposition of power facilities for either (a) the reduction of its capital obligations (including Evidences of Indebtedness and the Appropriation Investment) or (b) investment in Power Assets.

### **Depreciation**

The Basic Resolution requires TVA to accrue, in accordance with a recognized method, annual amounts for depreciation of its power properties (except land and other nondepreciable property) that will amortize their original cost less anticipated net salvage value within their expected useful lives. TVA has provided allowances for depreciation of its power properties (except land and other nondepreciable property) on a straight-line basis during their expected useful lives.

## **Issuance of Additional Bonds and Other Evidences of Indebtedness**

The Act limits the issuance of Evidences of Indebtedness by TVA to a total of \$30 billion outstanding at any one time. At December 31, 1999, TVA had approximately U.S. \$25.1 billion, DM 1.5 billion (issued in September 1996) and £200 million (issued in December 1998) of Evidences of Indebtedness outstanding. In connection with the issuance of TVA's DM and British pound sterling indebtedness, TVA entered into currency swap agreements to hedge its foreign currency exposure. The Basic Resolution and the Act permit the issuance of Power Bonds only to provide capital for TVA's power program, including the refunding of any Evidences of Indebtedness issued for that purpose.

Power Bonds, the terms and conditions of which may not be inconsistent with the Basic Resolution, must also be authorized by Supplemental Resolution. The Basic Resolution provides that each Supplemental Resolution authorizing the issuance of Power Bonds must contain a finding by the Board that after the authorized Power Bonds have been issued, gross revenues from TVA's power program will be adequate to meet the requirements of the Basic Resolution with respect to rates and the application of depreciation accruals. These requirements are described under "The Basic Resolution; Power Bonds, Discount Notes and Other Indebtedness" — "Rate Covenant" and "Covenant for Protection of Bondholders' Investment."

Pending the issuance of Power Bonds authorized by a Supplemental Resolution, TVA may issue Bond Anticipation Obligations and renewals of Bond Anticipation Obligations (including Interim Obligations to the Secretary of the Treasury), to be paid from the proceeds of such Power Bonds when issued or from other funds that may be available for that purpose.

TVA may also issue Evidences of Indebtedness other than Power Bonds and Bond Anticipation Obligations, such as Discount Notes, to assist in financing TVA's power program. They may be payable out of Net Power Proceeds subject to the provisions of Section 2.3 of the Basic Resolution. They may not rank ahead of the Power Bonds as to principal or interest.

## **Mortgaging and Disposal of Power Properties**

TVA may not mortgage any part of its power properties and may not dispose of all or any substantial portion of these properties unless it provides for a continuance of the interest, principal and sinking fund payments due and to become due on all outstanding Evidences of Indebtedness, or for the retirement of such Evidences of Indebtedness.

## **Modifications of Resolutions and Outstanding Bonds**

The Basic Resolution provides for amendments to it, to any Supplemental Resolution and to any outstanding Power Bonds. Generally, TVA may make amendments to the respective rights and obligations of TVA and the bondholders with the written consent of the holders of at least 66<sup>2</sup>/<sub>3</sub> percent in principal amount of the outstanding Power Bonds to which the amendment applies. However, TVA may not make changes in the maturity, principal amount, redemption premium or rate of interest or maturity of any interest installment, with respect to any Power Bond, or in the above percentage for any such consent, without the consent of the holder of such Power Bond.

Additionally, TVA may amend the Basic Resolution or any Supplemental Resolution without the consent of the bondholders in order (1) to close the Basic Resolution against the issuance of additional Power Bonds or to restrict such issuance by imposing additional conditions or restrictions; (2) to add other covenants and agreements to be observed by TVA or to eliminate any right, power or privilege conferred upon TVA by the Basic Resolution; (3) to modify any provisions to release TVA from any of its obligations, covenants, agreements, limitations, conditions or restrictions, provided that such modification or release shall not become effective with respect to any Power Bonds issued prior to the adoption of such amendment; (4) to correct any defect, ambiguity or inconsistency in, or to make provisions in regard to matters or questions arising under, the Basic Resolution or any Supplemental Resolution, so long as such amendments are not contrary to, or inconsistent with, the Basic Resolution or such Supplemental Resolution; or (5) to make any other modification or amendment which the Board by resolution determines will not materially and adversely affect the interests of holders of the Power Bonds.

## Events of Default

Any of the following shall be deemed an Event of Default under the Basic Resolution: (1) default in the payment of the principal or redemption price of any Power Bond when due and payable at maturity, by call for redemption, or otherwise; (2) default in the payment of any installment of interest on any Power Bond when due and payable for more than 30 days; or (3) failure of TVA to duly perform any other covenant, condition or agreement contained in the Power Bonds or in the Basic Resolution or any Supplemental Resolution for 90 days after written notice specifying such failure has been given to TVA by the holders of at least five percent in aggregate principal amount of the then-outstanding Power Bonds.

Upon any such Event of Default, the holders of the Power Bonds may proceed to protect and enforce their respective rights, subject to the restrictions described below. The holders of at least five percent in aggregate principal amount of Power Bonds then outstanding shall, subject to certain restrictions, have the right and power to institute a proceeding (1) to enforce TVA's covenants and agreements, (2) to enjoin any acts in violation of the rights of holders of Power Bonds, and (3) to protect and enforce the rights of holders of Power Bonds. Power Bonds do not provide for acceleration upon an Event of Default. Such holders have no right to bring any such action or proceeding against TVA unless they have given TVA written notice of an Event of Default and TVA has had a reasonable opportunity to take appropriate corrective action with respect thereto and has failed or refused to do so.

Holders of a majority in aggregate principal amount of the outstanding Power Bonds have the right to direct the time, method and place of conducting any proceeding for any remedy available and may waive any default and its consequences, except a default in the payment of the principal of or premium, if any, or interest on any Power Bonds.

## Fourth Amendatory Resolution to the Basic Resolution

On March 25, 1992, TVA adopted a resolution amending the Basic Resolution, entitled "Fourth Amendatory Resolution to Basic Tennessee Valley Authority Power Bond Resolution" (the "Fourth Amendatory Resolution"). The amendments to the

Basic Resolution made by the Fourth Amendatory Resolution were to become effective only when either (1) all Power Bonds issued prior to the date of adoption of the Fourth Amendatory Resolution ceased to be outstanding (which would occur not later than November 15, 2029) or (2) the holders of at least 66<sup>2</sup>/<sub>3</sub> percent of the principal amount of all then-outstanding Power Bonds issued prior to the adoption of the Fourth Amendatory Resolution consented in writing to such amendments. On December 16, 1999, TVA redeemed the last series of Power Bonds issued prior to the adoption of the Fourth Amendatory Resolution, and this amendatory resolution became effective at that time and applies to all outstanding Power Bonds. The Fourth Amendatory Resolution (1) deleted from the Basic Resolution limitations on issuance of Power Bonds formerly set forth as Section 3.4 thereof and (2) amended the Basic Resolution to permit issuance of other Evidences of Indebtedness under Section 2.5 thereof that rank on a parity with Power Bonds as to principal and interest. With the deletion of Section 3.4 of the Basic Resolution, Sections 3.5 through 3.10 were renumbered as appropriate.

## Recent Legislation

In October 1997, Congress enacted the Energy and Water Development Appropriations Act, 1998, Pub. L. No. 105-62, 111 Stat. 1320, 1338 (1997). The paragraph captioned "TENNESSEE VALLEY AUTHORITY" in Title IV of this act (the "Appropriations Act paragraph") requires TVA, beginning with October 1, 1998, to fund nonpower programs that constitute "essential stewardship activities" with revenues derived from one or more of various sources, including power revenues, notwithstanding provisions of the TVA Act and power bond covenants to the contrary.

The Appropriations Act paragraph states:

For the purpose of carrying out the provisions of the Tennessee Valley Authority Act of 1933, as amended (16 U.S.C. ch. 12A), including hire, maintenance, and operation of aircraft, and purchase and hire of passenger motor vehicles, \$70,000,000, to remain available until expended, of which \$6,900,000 shall be available for operation, maintenance, surveillance, and improvement of Land Between the Lakes; and for essential stewardship activities for which appropriations were pro-

vided to the Tennessee Valley Authority in Public Law 104-206, such sums as are necessary in fiscal year 1999 and thereafter, to be derived only from one or more of the following sources: nonpower fund balances and collections; investment returns of the nonpower program; applied programmatic savings in the power and nonpower programs; savings from the suspension of bonuses and awards; savings from reductions in memberships and contributions; increases in collections resulting from nonpower activities, including user fees; or increases in charges to private and public utilities both investor and cooperatively owned, as well as to direct load customers: *Provided*, That such funds are available to fund the stewardship activities under this paragraph, notwithstanding sections 11, 14, 15, 29, or other provisions of the Tennessee Valley Authority Act, as amended, or provisions of the TVA power bond covenants: *Provided further*, That the savings from, and revenue adjustments to, the TVA budget in fiscal year 1999 and thereafter shall be sufficient to fund the aforementioned stewardship activities such that the net spending authority and resulting

outlays for these activities shall not exceed \$0 in fiscal year 1999 and thereafter.

Congress provided no appropriations for TVA's nonpower programs for fiscal 2000. In compliance with the Appropriations Act paragraph, TVA is and will continue funding its essential stewardship activities with funds from its power program (and other available funds) to the extent that Congress does not make appropriations for these activities.

As part of the October 1998 appropriations legislation, Congress also permitted TVA to repurchase all of its outstanding \$3.2 billion in Power Bonds issued to the Federal Financing Bank (the "FFB") by paying principal and accrued interest only, without obligation to pay any additional amounts under the terms of these Power Bonds. This part of the legislation also requires TVA to apply a certain portion of the interest savings from the repurchase of its FFB Power Bonds to debt reduction. Pursuant to this legislation, TVA repurchased all of its outstanding Power Bonds issued to the FFB using funds obtained from short-term borrowings. TVA has not issued Power Bonds to the FFB since 1991, and this legislation prohibits TVA from doing so in the future.

The accompanying notes are an integral part of these financial statements.

## NOTES TO FINANCIAL STATEMENTS

### 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### General

TVA is a wholly owned corporate agency and instrumentality of the United States. It was established by the TVA Act with the objective of developing the resources of the Tennessee Valley region in order to strengthen the regional and national economy and the national defense by providing: (1) an ample supply of power within the region, (2) navigable channels and flood control for the Tennessee River System, and (3) agricultural and industrial development and improved forestry in the region. TVA carries out these regional and national responsibilities in a service area that centers on Tennessee and parts of Alabama, Georgia, Kentucky, Mississippi, North Carolina and Virginia.

TVA's programs are divided into two types of activities — the power program and the nonpower programs. Substantially all TVA revenues and assets are attributable to the power program. The power program has historically been separate and distinct from the nonpower programs and is required to be self-supporting from power revenues and proceeds from the issuance of debt. The power program receives no congressional appropriations and is required to make annual payments to the United States Treasury (the "Treasury") in repayment of, and as a return on, the government's appropriation investment in TVA power facilities. Most of the funding for TVA's nonpower programs has historically been provided by congressional appropriations. Certain nonpower activities are also funded by various revenues and user fees. Financial accounts for the power and nonpower programs are kept separately. See note 10 for a discussion related to future funding of TVA's nonpower programs.

Power rates are established by the TVA Board of Directors as authorized by the TVA Act. The TVA Act requires TVA to charge rates for power that, among other things, will produce gross revenues sufficient to provide funds for operation, maintenance and administration of its power system; payments to states in lieu of taxes; and debt service on outstanding indebtedness.

#### Fiscal year

Unless otherwise indicated, years (1999, 1998, etc.) refer to TVA's fiscal years ended September 30.

#### Revenue

Revenues from power sales are recorded as power is delivered to customers. TVA accrues estimated unbilled revenues for power sales provided to customers for the period of time from the end of the billing cycle to month-end.

Off-system sales are presented in the accompanying statements of operations as a component of Sales of electricity — Federal agencies and other. Prior to 1998, off-system sales and purchases under exchange power agreements were reflected on a net basis in fuel and purchased power expense. Off-system sales for 1997 have been reclassified to conform with the 1999 and 1998 presentation.

#### Property, plant, and equipment and depreciation

Additions to plant are recorded at cost, which includes direct and indirect costs and an allowance for funds used during construction. The cost of current repairs and minor replacements is charged to operating expense. Nuclear fuel is valued at the lower of cost or market using the average cost method for raw materials and the specific identification method for nuclear fuel in reactor. Amortization of nuclear fuel is calculated on a units of production basis and is included in fuel expense. The TVA Act requires TVA's Board of Directors to allocate the cost of completed multi-purpose projects between the power and nonpower programs, subject to the approval of the President of the United States. The original cost of property retired, together with removal costs less salvage value, is charged to accumulated depreciation. Depreciation is generally computed on a straight-line basis over the estimated service lives of the various classes of assets. Depreciation expense expressed as a percentage of the average annual depreciable completed plant was 3.28 percent for 1999, 3.23 percent for 1998 and 3.21 percent for 1997.

#### Decommissioning costs

Effective for 1998, TVA changed its method of accounting for decommissioning costs and related

## NOTES TO FINANCIAL STATEMENTS — (Continued)

liabilities. TVA's current accounting policy recognizes as incurred all obligations related to closure and removal of its nuclear units. The charge to recognize the additional obligation in 1998 was effected through the creation of a regulatory asset. TVA further modified its accounting methodology such that earnings from decommissioning investments, amortization of the decommissioning regulatory asset and interest expense on the decommissioning liability are deferred (see note 9 — Decommissioning costs). The effect of the change was to decrease 1998 depreciation expense approximately \$38 million — primarily due to the deferral of the decommissioning components of earnings, amortization and interest.

During 1997, the excess of decommissioning investment earnings over the annual decommissioning provision was recorded as other income. TVA's total investment earnings were \$151 million. Of this amount, \$13 million was recorded as an offset to the decommissioning provision and \$138 million was recorded as other income.

### **Allowance for funds used during construction**

TVA capitalizes an allowance for funds used during construction. The allowance is applicable to construction in progress, excluding deferred nuclear generating units.

### **Loans and other long-term receivables**

In June 1997, TVA entered into a five-year agreement with a bank pursuant to which TVA agreed to sell certain receivables relating to TVA's consumer energy-conservation programs. As of September 30, 1999, approximately \$218 million of the receivables have been sold for proceeds equal to their carrying amount. Under the terms of the agreement, TVA has retained substantially the same risk of credit loss as if the receivables had not been sold and, accordingly, an appropriate liability account has been established.

### **Other deferred charges**

Other deferred charges primarily include prepaid pension costs and regulatory assets capitalized under the provisions of Statement of Financial Accounting Standards (SFAS) No. 71, *Accounting*

*for the Effects of Certain Types of Regulation*. At September 30, 1999, other deferred charges included total unamortized regulatory assets of \$968 million — of which \$343 million represents a transition obligation for certain postemployment benefits; \$393 million represents an additional obligation related to the closure and removal of nuclear units (see note 1 — Decommissioning costs); \$221 million represents an over-market portion of nuclear fuel and \$11 million represents TVA's portion of the costs for decommissioning the Department of Energy's (DOE) uranium enrichment facilities. At September 30, 1998, the unamortized balances of regulatory assets of \$1,260 million included \$342 million representing a capitalized interest component of nuclear fuel; \$377 million representing a transition obligation for certain postemployment benefits; \$478 million representing an additional obligation related to the closure and removal of nuclear units (see note 1 — Decommissioning costs) and \$63 million representing TVA's portion of the costs for decommissioning the DOE's uranium enrichment facilities.

Effective for 1999, TVA reclassified an additional \$332 million from nuclear fuel inventory to deferred charges. This regulatory asset will be amortized on a straight-line basis over an estimated three-year period. The effect of this change was to increase 1999 expense approximately \$111 million.

Also effective for 1999, TVA changed its method of accounting for nuclear refueling outage maintenance costs whereby such costs will be deferred and amortized on a straight-line basis over the estimated period until the next refueling outage, rather than expensed as incurred. The effect of the change was to decrease 1999 expense approximately \$63 million.

### **Investment funds**

Investment funds consist primarily of trust funds designated to fund nuclear decommissioning requirements (see note 9 — Decommissioning costs). These funds are invested in portfolios of securities generally designed to earn returns in line with overall equity market performance.

## NOTES TO FINANCIAL STATEMENTS — (Continued)

### Debt issue and reacquisition costs

Effective for 1999, TVA changed its method of amortizing debt issue and reacquisition costs. Under the current policy, issue and reacquisition expenses, call premiums and other related costs are deferred and amortized (accreted), on a pooled straight-line basis over the weighted average life of TVA's public debt portfolio. During 1998 and 1997, debt issue and reacquisition costs were separately amortized on a straight-line basis over the term of the related outstanding securities. The effect of the change was to decrease 1999 expense approximately \$20 million.

TVA has incurred premiums related to certain advanced refundings and also received and paid premiums in connection with the monetization of certain call provisions. In accordance with regulatory practices, TVA has deferred these premiums and is amortizing such premiums on a pooled straight-line basis over the weighted average life of TVA's public debt portfolio. The unamortized balances of such regulatory assets at September 30, 1999 and 1998, were \$641 million and \$674 million, respectively.

### Tax-equivalents

The TVA Act requires TVA to make payments to states and local governments where the power operations of the corporation are conducted. The amount is 5 percent of gross revenues from the prior year's sale of power, excluding sales to other Federal agencies and interchange sales with other utilities, with a provision for minimum payments under certain circumstances.

### Accelerated amortization

Effective for 1999, TVA adopted a new accounting policy whereby annual provisions for amortization of deferred charges will be adjusted as necessary in order to achieve certain earnings levels as set forth in resolutions adopted annually by the TVA Board of Directors in connection with the rate review process. The targeted earnings levels will be based on the earnings requirements of the TVA Act and the Basic TVA Power Bond Resolution (see note 5 — Borrowing authority). Such adjustments may result in either contracting or extending the estimated amortization periods. The amortiza-

tion of such assets is principally computed on a straight-line basis, over periods ranging from three to 15 years. As a result of surplus earnings levels in 1999, due in part to a change in accounting for pension costs (see note 7 — Pension plan), TVA accelerated amortization of certain regulatory assets by \$261 million under the new policy in 1999.

### Interest and capital costs

During 1999, 1998 and 1997, cash paid for interest on outstanding indebtedness (net of amount capitalized) was \$1,740 million, \$1,886 million and \$1,911 million, respectively. In addition to paying interest on outstanding indebtedness, the TVA Act requires TVA to make annual payments to the Treasury. The annual Treasury payments represent a repayment of the original appropriation investment, along with a return on the appropriation investment (see note 4). TVA paid \$20 million each year for 1999, 1998 and 1997 as a repayment of the appropriation investment. TVA paid \$37 million to the Treasury in 1999 as a return on the appropriation investment, while paying \$40 million in 1998 and \$41 million in 1997.

### Risk-management activities

TVA is exposed to market risk from changes in interest rates and currency exchange rates. To manage volatility relating to these exposures, TVA has entered into various derivative transactions, principally an interest rate swap agreement and foreign currency swap agreements. TVA is exposed to credit losses in the event of nonperformance by counterparties on the risk-management instruments. TVA monitors such risk and does not believe that there is a significant risk of nonperformance by any of the parties to these instruments.

TVA may engage in hedging activities using forwards, futures or options to hedge the impact of market fluctuations on energy commodity prices. TVA currently accounts for these transactions using the deferral method, and gains and losses are recognized in the accompanying financial statements when the related hedged transaction occurs. TVA's risk management policies allow the use of derivative financial instruments to manage financial exposures but prohibit the use of these instruments for speculative or trading purposes.

## NOTES TO FINANCIAL STATEMENTS — (Continued)

### Cash and cash equivalents

Cash and cash equivalents include the cash available in commercial bank accounts and Treasury accounts, as well as short-term securities held for the primary purpose of general liquidity. Such securities mature within three months from the date of acquisition.

### Insurance

TVA is primarily self-insured for property loss, workers' compensation, general liability and automotive liability. TVA is also self-insured for health care claims for eligible active and retired employees. Consulting actuaries assist TVA in determining certain liabilities for self-insured claims. TVA

maintains nuclear liability insurance and nuclear property, decommissioning and decontamination insurance with an outside party (see note 9 — Nuclear insurance).

### Management estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the related amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## 2. NUCLEAR POWER PROGRAM

The nuclear power program at September 30, 1999, consisted of nine units — five operating, three deferred and one inoperative — at four locations, with investments in property, plant and equipment as follows and in the status indicated:

|                       | <u>Operating<br/>units</u> | <u>Installed capacity<br/>(megawatts)</u> | <u>Completed<br/>plant, net</u> | <u>Construction<br/>in progress</u> | <u>Deferred<br/>units</u> | <u>Fuel<br/>investment</u> |
|-----------------------|----------------------------|---|---------------------------------|-------------------------------------|---------------------------|----------------------------|
| (dollars in millions) |                            |   |                                 |                                     |                           |                            |
| Browns Ferry* .....   | 2                          | 2,304                                     | \$ 3,167                        | \$ 45                               | \$ —                      | \$185                      |
| Sequoyah .....        | 2                          | 2,442                                     | 1,989                           | 35                                  | —                         | 102                        |
| Watts Bar .....       | 1                          | 1,270                                     | 6,407                           | 4                                   | 1,718                     | 56                         |
| Bellefonte .....      | —                          | —   | —                               | —                                   | 4,602                     | —                          |
| Raw materials .....   | —                          | —   | —                               | —                                   | —                         | 29                         |
| Total .....           | <u>5</u>                   | <u>6,016</u>                              | <u>\$11,563</u>                 | <u>\$ 84</u>                        | <u>\$6,320</u>            | <u>\$372</u>               |

\* Browns Ferry 1, an inoperative unit, is discussed below.

Browns Ferry 1 was taken off-line in 1985 for modifications and improvements and will continue to remain in an inoperative status until its ultimate disposition is determined. The undepreciated cost of Browns Ferry 1 of \$66 million is included in net completed plant and is being depreciated as part of the recoverable cost of the plant over the remaining license period.

TVA has three units in deferred status. In 1988, TVA suspended construction activities on Watts Bar 2, and the unit is currently in lay-up. Bellefonte 1 and 2 were deferred in 1988 and 1985, respectively. Estimated 2000 expenditures for the three deferred units are limited to lay-up, maintenance and ensuring that options remain viable.

In December 1994, TVA determined it will not, by itself, complete Bellefonte 1 and 2 and Watts Bar 2 as nuclear units. TVA's integrated resource planning process identified as a viable option the conversion of the Bellefonte facility to a combined-cycle plant utilizing natural gas or gasified coal. In 1997, an independent team of technical and financial experts completed a feasibility study to evaluate options for the conversion of the Bellefonte Nuclear Plant to a fossil fuel-fired plant. The feasibility study concluded that one of the most economical fossil conversion strategies is to complete Bellefonte as a natural gas-fired combined-cycle plant. TVA also issued an Environmental Impact Statement (EIS) assessing the environmental impacts of various fossil conversion

## NOTES TO FINANCIAL STATEMENTS — (Continued)

options. The EIS identified the natural gas-fired combined-cycle plant alternative as the preferred option. Bellefonte remains in a deferred status.

While the future decisions on TVA's deferred units will ultimately impact the method of cost recovery, the TVA Board has determined that it will establish rate adjustments and operating policies to ensure full recovery of the cost of these units and compliance with the requirements of the TVA Act.

### 3. COMPLETED PLANT — POWER PROGRAM

Completed plant of the power program consisted of the following at September 30:

|                          | 1999          |                          |          | 1998     |                          |          |
|--------------------------|---------------|--------------------------|----------|----------|--------------------------|----------|
|                          | Cost          | Accumulated depreciation | Net      | Cost     | Accumulated depreciation | Net      |
|                          | (in millions) |                          |          |          |                          |          |
| Fossil plants . . . . .  | \$ 7,983      | \$3,407                  | \$ 4,576 | \$ 7,780 | \$3,181                  | \$ 4,599 |
| Nuclear plants . . . . . | 14,705        | 3,142                    | 11,563   | 14,613   | 2,697                    | 11,916   |
| Transmission . . . . .   | 3,384         | 1,091                    | 2,293    | 3,265    | 1,038                    | 2,227    |
| Hydro plants . . . . .   | 1,486         | 514                      | 972      | 1,424    | 491                      | 933      |
| Other . . . . .          | 2,011         | 608                      | 1,403    | 1,973    | 538                      | 1,435    |
| Total . . . . .          | \$29,569      | \$8,762                  | \$20,807 | \$29,055 | \$7,945                  | \$21,110 |

### 4. APPROPRIATION INVESTMENT — POWER PROGRAM

The TVA Act requires TVA to make annual payments to the Treasury from net power proceeds as a return on the appropriation investment in the power system and as a repayment of that investment. The payments required by the TVA Act may be deferred under certain circumstances for not more than two years. The annual repayment amount is \$20 million. The return is based on the appropriation investment as of the beginning of the year and the computed average interest rate payable by the Treasury on its total marketable public obligations as of the same date (6.56 percent at September 30, 1998).

### 5. DEBT

#### Borrowing authority

The TVA Act authorizes TVA to issue bonds, notes and other evidences of indebtedness up to a total of \$30 billion outstanding at any one time. TVA must meet certain cash flow and earnings tests that are contained in the TVA Act and the Basic TVA Power Bond Resolution. Debt service on these obligations, which is payable solely from TVA's net power proceeds, has precedence over the payment to the Treasury described in note 4.

## NOTES TO FINANCIAL STATEMENTS — (Continued)

### Debt outstanding

Debt outstanding at September 30, 1999 and 1998 consisted of the following:

|  | 1999            | 1998            |
|--|-----------------|-----------------|
|  | (in millions)   |                 |
| <b>Short-term debt</b>   |                 |                 |
| Held by the public   |                 |                 |
| Discount notes (net of discount) . . . . .                       | \$ 982          | \$ 1,757        |
| Current maturities of long-term debt — 8.375% . . . . .          | 1,000           | 1,500           |
| Total short-term debt . . . . .                                  | 1,982           | 3,257           |
| <b>Long-term debt</b>  |                 |                 |
| Held by the public — senior                                      |                 |                 |
| Maturing in 2000 . . . . .                                       | —               | 1,250           |
| Maturing in 2001 — 5.00% to 6.50% . . . . .                      | 2,350           | 2,100           |

### Short-term debt

The weighted average rates applicable to short-term debt outstanding in the public market as of September 30, 1999 and 1998, were 5.30 percent and 5.54 percent, respectively. During 1999, 1998 and 1997, the maximum outstanding balance of short-term borrowings held by the public was (in millions) \$4,701, \$2,914 and \$3,962, respectively, and the average amounts (and weighted average interest rates) of such borrowings were approximately (in millions) \$1,945 (5.01 percent), \$2,234 (5.58 percent) and \$2,743 (5.47 percent), respectively.

### Put and call options

Bond issues of \$9.0 billion held by the public are redeemable in whole or in part, at TVA's option, on call dates ranging from the present to July 2020 at call prices ranging from 100 percent to 106.7 percent of the principal amount. Additionally, TVA has bond issues of \$2.1 billion held by the public that are redeemable in whole or in part at the

option of the respective bondholders. One bond issue totaling \$500 million, which matures in July 2045, is redeemable in 2001 by the bondholders. A second issue totaling \$121 million, which matures in April 2036, is redeemable in 2006 at the option of the bondholders and a third issue totaling \$1.5 billion, which matures in April 2036, is redeemable in 2006 at the option of the bondholders. Each of these three issues is reported in the debt schedule with maturity dates corresponding to the earliest redeemable dates. A fourth issue totaling \$250 million, which matures in January 2018, includes a provision for a right of redemption upon the death of a beneficial owner in certain specified circumstances.

Additionally, TVA has two issues of Putable Automatic Rate Reset Securities (PARRS) outstanding. The bonds permit TVA, after a fixed-rate period of five years, to reset the coupon rate downward under certain market conditions. Investors have the option to redeem the bonds at par if and when the interest rate is reset. One PARRS

## NOTES TO FINANCIAL STATEMENTS — (Continued)

issue totals \$575 million, matures in June 2028 and has its first potential reset date in June 2003. The second issue of PARRS totals \$525 million, matures in May 2029 and has its first potential reset date in May 2004.

### Foreign currency transactions and interest rate swap

During 1996, TVA entered into a currency swap contract as a hedge for a foreign currency denominated debt transaction. TVA issued DM1.5 billion of bonds and swapped the cash flows for those of a U.S. dollar obligation of \$1 billion. TVA also entered into a currency swap contract during 1999 as a hedge for a Sterling denominated debt transaction and issued £200 million of bonds in that transaction. Any gains or losses on the debt instruments due to the foreign currency transactions are offset by losses or gains on the swap contracts. At September 30, 1999 and 1998, the currency transactions resulted in net deferred gains of \$182 million and \$102 million, respectively, which are included in the account "unamortized discount and other adjustments." The offsetting losses on the swap contracts are recorded as a deferred liability. If any loss/(gain) were to be incurred as a result of the early termination of a swap contract, any resulting charge/(income) would be amortized over the remaining life of the bond as a component of interest expense.

Additionally, in 1997, TVA issued \$300 million of inflation-indexed accreting principle bonds. The 10-year bonds have a fixed coupon rate that is paid on the inflation-adjusted principal amount. TVA hedged its inflation exposure under the securities

through a 10-year fixed interest rate swap agreement.

### 6. FAIR VALUE OF FINANCIAL INSTRUMENTS

TVA uses the methods and assumptions described below to estimate the fair values of each significant class of financial instrument.

#### Cash and cash equivalents and short-term debt

The carrying amount approximates fair value because of the short-term maturity of these instruments.

#### Investment funds

At September 30, 1999, these investments were classified as trading securities and carried at their fair value.

#### Loans and other long-term receivables

Fair values for these homogeneous categories of loans and receivables are estimated by determining the present value of future cash flows using a discount rate equal to lending rates for similar loans made to borrowers with similar credit ratings and for the same remaining maturities.

#### Bonds

Fair value of long-term debt traded in the public market is determined by multiplying the par value of the bonds by the quoted market price (asked price) nearest the balance sheet date.

The estimated values of TVA's financial instruments at September 30 are as follows:

|  | 1999            |             | 1998            |             |
|--|-----------------|-------------|-----------------|-------------|
|  | Carrying amount | Fair amount | Carrying amount | Fair amount |
|  | (in millions)   |             |                 |             |
| Cash and cash equivalents . . . . .                    | \$ 160          | \$ 160      | \$ 451          | \$ 451      |
| Investment funds . . . . .                             | 731             | 731         | 578             | 578         |
| Loans and other long-term receivables . .              | 153             | 153         | 151             | 151         |
| Short-term debt . . . . .                              | 982             | 982         | 1,757           | 1,757       |
| Long-term debt, including current maturities . . . . . | 25,394          | 24,598      | 24,927          | 26,732      |

The fair market value of the financial instruments held at September 30, 1999, may not be representative of the actual gains or losses that will be recorded when these instruments mature or if they are called or presented for early redemption.

### 7. BENEFIT PLANS

#### Pension plan

TVA has a defined benefit plan for most full-time employees that provides two benefit structures: the Original Benefit Structure and the Cash Balance Benefit Structure. The plan is controlled and administered by a legal entity separate from TVA, the TVA Retirement System (TVARS), which is governed by its own independent board of directors. The plan assets are primarily stocks and bonds. TVA contributes to the plan such amounts as are agreed upon between the TVA and the TVARS boards of directors, which in no event is less than the amount necessary on an actuarial basis to provide assets sufficient to meet obligations for benefits. No TVA contribution is legally required when the plan's assets are sufficient to meet its accrued liabilities, as determined by an independent outside actuary. This situation has existed for several years.

The pension benefit for a member participating in the Original Benefit Structure is based on the member's years of creditable service, average base pay for the highest three consecutive years and the pension rate for the member's age and years of service, less a Social Security offset.

The pension benefit for a member participating in the Cash Balance Benefit Structure is based on credits accumulated in the member's account and member's age. A member's account receives credits each pay period equal to 6.0 percent of his or her straight-time earnings. The account also increases at an interest rate equal to the change in the Consumer Price Index (CPI) plus 3.0 percent, which amounted to 5.8 percent in 1998. During 1999, plan amendments were effected such that the rate may not be less than 6.0 percent nor more than 10.0 percent. The actual change in the CPI for 1999 was 1.6 percent, resulting in the minimum of 6.0 percent for 1999.

During 1998, plan amendments were effected such that certain pension benefits were enhanced, resulting in approximately \$590 million in additional pension plan benefit obligations.

During 1999, TVA changed its accounting policy for the method of determining the market-related value of pension assets, resulting in a one-

time gain of approximately \$217 million. This gain is presented on the Statement of Income under the caption "Cumulative effect of change in accounting principle." This accounting change also had the effect of increasing 1999 pension income approximately \$64 million.

The discount rate used to determine the actuarial present value of the projected benefit obligation was 7.5 percent in 1999, 7.0 percent in 1998 and 8.0 percent in 1997. The assumed annual rates of increase in future compensation levels for 1999, 1998 and 1997 ranged from 3.3 to 8.3 percent. The expected long-term rate of return on plan assets was 11.0 percent for 1999, 1998 and 1997.

In 1998, the FASB issued SFAS No. 132, *Employers' Disclosures About Pensions and Other Postretirement Benefits*. This statement modifies current financial statement disclosure requirements from those required under SFAS Nos. 87, 88 and 106. SFAS No. 132 requires additional information be disclosed regarding changes in the benefit obligation and fair value of plan assets, but does not change the existing measurement or recognition provisions under the aforementioned standards. SFAS No. 132 was effective for fiscal years beginning after December 15, 1997.

#### Other postretirement benefits

TVA has sponsored an unfunded postretirement plan that provides for non-vested contributions toward the cost of certain retirees' medical coverage. The plan generally has covered employees who, at retirement, are age 60 and older (or who are age 50 and have at least five years of service). TVA's contributions are a flat dollar amount based upon the participants' age and years of service and certain payments toward the plan costs.

In connection with the pension plan benefit amendments, TVA also effected other postretirement benefit plan amendments during 1998 such that certain TVA contributions to retiree health benefits were discontinued, resulting in approximately \$120 million in reduced other postretirement benefit obligations.

The annual assumed cost trend for covered benefits is 9.5 percent in 1999, decreasing by one-half percent per year until reaching 5.0 percent in

## NOTES TO FINANCIAL STATEMENTS — (Continued)

2008 and held constant thereafter. For 1998 and 1997, an annual trend rate of 10.0 percent and 10.5 percent, respectively, was assumed. The effect of the change in assumptions of the cost basis was not significant. Increasing/ (reducing) the assumed health-care cost trend rates by one percent would increase/ (reduce) the accumulated postretirement benefit obligation (APBO) as of September 30, 1999, by \$12 million/ (\$11 million) and the aggregated service and interest cost components of net periodic postretirement benefit cost for 1999 by \$1 million/ (\$1 million).

The weighted average discount rate used in determining the APBO was 7.5 percent for 1999, 7.0 percent for 1998 and 8.0 percent for 1997. Any net unrecognized gain or loss resulting from experience different from that assumed or from changes in assumptions, and which is in excess of 10 percent of the APBO, is amortized over the average remaining service period of active plan participants.

### **Other postemployment benefits**

Other postemployment benefits include workers' compensation provided to former or inactive

employees, their beneficiaries and covered dependents for the period after employment but before retirement. Adoption of Statement of Financial Accounting Standards No. 112, *Employers' Accounting for Postemployment Benefits* (SFAS No. 112) in 1995 changed TVA's method of accounting practice from recognizing costs as benefits are paid to accruing the expected costs of providing these benefits. This resulted in recognition of an original transition obligation of approximately \$280 million. During 1996, TVA made adjustments to certain assumptions utilized in the determination of the obligation at September 30, 1996, which resulted in an increase in the original transition obligation of approximately \$194 million. In connection with the adoption of SFAS No. 112, and related approval by its Board of Directors, TVA recorded the transition obligation as a regulatory asset. The regulatory asset is being amortized over approximately 15 years, whereby the annual expense approximates the expense that would have been recorded on an as-paid basis.

## NOTES TO FINANCIAL STATEMENTS — (Continued)

The components of pension expense and other postretirement benefits expense for the years ended September 30 were:

|   | Pension Benefits |                | Other Postretirement Benefits |                |
|---|------------------|----------------|-------------------------------|----------------|
|   | 1999             | 1998           | 1999                          | 1998           |
|   | (in millions)    |                |                               |                |

## NOTES TO FINANCIAL STATEMENTS — (Continued)

### 8. MAJOR CUSTOMERS

One municipal customer accounts for approximately 9.1 percent of total power sales, and four other municipal customers account for an additional aggregate 17.7 percent of total power sales.

These five municipal customers purchase power from TVA under long-term contracts, which require 10 years' notice to terminate.

### 9. COMMITMENTS AND CONTINGENCIES

#### Leases

Certain property, plant and equipment are leased under agreements with terms ranging from one to 30 years. Most of the agreements include purchase options or renewal options that cover substantially all the economic lives of the properties. Obligations under capital lease agreements in effect at September 30, 1999, total \$36 million annually through 2004, and an aggregate of \$228 million thereafter, for a total commitment of \$408 million. Of this amount, \$220 million is interest.

#### Fuel purchase commitments

TVA has entered into approximately \$2.4 billion in long-term commitments ranging in terms of up to six years for the purchase of coal, and approximately \$195 million in long-term commitments ranging in terms of up to five years for the purchase of uranium.

#### Contingencies

**Nuclear insurance.** The Price-Anderson Act sets forth an indemnification and limitation of liability plan for the United States nuclear industry. All Nuclear Regulatory Commission (NRC) licensees, including TVA, maintain nuclear liability insurance in the amount of \$200 million for each plant with an operating license. The second level of financial protection required is the industry's retrospective assessment plan, using deferred premium charges. The maximum amount of the deferred premium for each nuclear incident is approximately \$88 million per reactor, but not more than \$10 million per reactor may be charged in any one year for each incident. TVA could be required to pay a maximum of \$528 million per nuclear incident on the basis of its six licensed units, but it would have

to pay no more than \$60 million per incident in any one year.

In accordance with NRC regulations, TVA carries property and decontamination insurance of \$1.06 billion at each licensed nuclear plant for the cost of stabilizing or shutting down a reactor after an accident. Some of this insurance may require the payment of retrospective premiums of up to a maximum of approximately \$21 million.

**Clean air legislation.** The Clean Air Act Amendments of 1990 require coal-fired generation units to reduce their sulfur dioxide and nitrogen oxide emissions in two phases in order to control acid rain. The Phase I compliance period commenced January 1, 1995, for sulfur dioxide and January 1, 1996, for nitrogen oxide, while the Phase II compliance period commences January 1, 2000. Based on the level of emissions, 26 of TVA's 59 operating coal-fired units are classified as Phase I units, with the remaining units being Phase II units. Compliance with these requirements has resulted in substantial expenditures for the reduction of emissions at TVA's coal-fired generating plants.

TVA's strategy for complying with the 1990 Amendments includes the use of scrubbers at two fossil units and the use of lower-sulfur coal at other fossil units to reduce sulfur dioxide. TVA has completed all planned scrubbers and is on schedule to complete the change-over to lower-sulfur coal.

Nitrogen oxide reductions are required for 19 of TVA's Phase I units. These reductions were achieved through the installation of low-nitrogen-oxide burners at 13 units. TVA is in compliance with all Phase I requirements and is currently installing nitrogen oxide reduction equipment on remaining units to bring TVA into compliance with Phase II nitrogen oxide emission requirements.

Expenditures related to the Clean Air projects during 1999 and 1998 were approximately \$77 million and \$64 million, respectively. TVA has already completed the actions necessary to achieve Phase I compliance for both sulfur dioxide and nitrogen oxide emissions, and TVA is proceeding to take actions to comply with Phase II requirements that become effective in the year 2000 or after.

## NOTES TO FINANCIAL STATEMENTS — (Continued)

The total cost of compliance cannot reasonably be determined at this time because of the uncertainties surrounding emerging Environmental Protection Agency regulations, resultant compliance strategies, potential for development of new emission control technologies and future amendments to the legislation.

**Hazardous substances.** The release and cleanup of hazardous substances are regulated under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). In a manner similar to many other industries and power systems, TVA has generated or used hazardous substances over the years. TVA has been identified as a potentially responsible party with respect to five off-site disposal areas. TVA's liability at these sites has not yet been determined. In addition, TVA is currently investigating one other TVA-owned site under a state statute similar to CERCLA. TVA may have cleanup responsibilities at this site by virtue of its control of the property. TVA's potential liabilities for its share of cleanup costs at all of these sites are uncertain but are not expected to have a significant impact on TVA's financial position or results of operations.

**Pending litigation.** TVA is a party to various civil lawsuits and claims that have arisen in the ordinary course of its business. Although the outcome of pending litigation cannot be predicted with any certainty, it is the opinion of TVA counsel that the ultimate outcome should not have a material adverse effect on TVA's financial position or results of operations.

**Decommissioning costs.** Provision for decommissioning costs of nuclear generating units is based on the estimated cost to dismantle and decontaminate the facilities to meet NRC criteria for license termination. The Financial Accounting Standards Board (FASB) has reached several tentative conclusions with respect to its project regarding the accounting for closure and removal of long-lived assets, including the decommissioning of nuclear generating units. Effective for 1998, TVA changed its method of accounting for decommissioning costs and related liabilities in order to comply with certain of the FASB's tentative conclusions, as well as certain rate-setting actions. The FASB expects to issue an exposure draft in the first quarter of 2000; however, it is uncertain

when a final statement will be issued and what impact it may ultimately have on TVA's financial position or results of operations.

TVA's current accounting policy recognizes as incurred all obligations related to closure and removal of its nuclear units. The liability for closure is measured as the present value of the estimated cash flows required to satisfy the related obligation and discounted at a determined risk-free rate of interest. The corresponding charge to recognize the additional obligation is effected through the creation of a regulatory asset. TVA further modified its method of accounting for decommissioning costs such that earnings from decommissioning fund investments, amortization expense of the decommissioning regulatory asset and interest expense on the decommissioning liability are deferred in accordance with SFAS No. 71, *Accounting for the Effects of Certain Types of Regulation*. At September 30, 1999, the present value of the estimated future decommissioning cost of \$882 million was included in other liabilities. The decommissioning cost estimates from a 1995 study are based on prompt dismantlement and removal of the plant from service. The actual decommissioning costs may vary from the estimates because of changes in the assumed dates of decommissioning, changes in regulatory requirements, changes in technology and changes in cost of labor, materials and equipment.

TVA maintains an investment trust fund to provide funding for the decommissioning of nuclear power plants. In May 1997, TVA sold the entire \$402 million equity index fund portfolio and transferred the proceeds to trust portfolios managed by independent money managers. During 1997, TVA recognized \$151 million of income related to the fund, which included an \$81 million gain on the sale of fund investments and \$70 million in net appreciation and interest income. As of September 30, 1999, the decommissioning trust fund investments totaled \$724 million and were invested in securities designed to achieve a return in line with overall equity market performance.

Effective November 23, 1998, the NRC amended its regulations regarding decommissioning funding. The regulations required TVA to provide financial assurance for decommissioning funding through the use of certain prescribed mechanisms

## NOTES TO FINANCIAL STATEMENTS — (Continued)

such as the trust agreements entered into by TVA in May 1997. These new regulations did not have a material impact on TVA's financial position or results of operations.

**Cost-based regulation.** As a regulated entity, TVA is subject to the provisions of SFAS No. 71, *Accounting for the Effects of Certain Types of Regulation*. Accordingly, TVA records certain assets and liabilities that result from the effects of the ratemaking process that would not be recorded under generally accepted accounting principles for non-regulated entities. Currently, the electric utility industry is predominantly regulated on a basis designed to recover the cost of providing electric power to its customers. If cost-based regulation were to be discontinued in the industry for any reason, profits could be reduced and utilities might be required to reduce their asset balances to reflect a market basis less than cost. Discontinuance of cost-based regulation would also require affected utilities to write off their associated regulatory assets. Such regulatory assets for TVA total approximately \$1.6 billion at September 30, 1999, along with approximately \$6.3 billion of deferred nuclear plants. Management cannot predict the potential impact, if any, of the change in the regulatory environment on TVA's future financial position and results of operations.

### 10. NONPOWER PROGRAMS

TVA's nonpower programs provide various public services, including managing navigable river channels, providing flood control and overseeing certain recreation facilities. The nonpower programs encompass general stewardship of land, water and wildlife resources. TVA's nonpower programs also conduct certain research and development activities in pollution prevention and remediation.

Funding for the nonpower programs has historically been primarily provided through Federal appropriations. Certain nonpower program activities have also been funded by user fees and outside

services revenues. During 1999, TVA received total Federal appropriations of approximately \$50 million, of which \$43 million was for essential stewardship activities and \$7 million was for TVA's Land Between The Lakes National Recreation Area (LBL). During 1998, TVA received total Federal appropriations of approximately \$70 million, of which \$60 million was for essential stewardship activities, \$7 million was for LBL and \$3 million was for TVA's Environmental Research Center. As discussed below, TVA will receive no Federal appropriations in 2000.

In October 1997, Congress passed legislation that directed TVA to fund essential stewardship activities related to its management of the Tennessee River system and TVA properties with power funds in the event that there were insufficient appropriations or other available funds to pay for such activities in any year. Congress did not provide any appropriations to TVA to fund such activities in 2000. Consequently, during 2000, TVA will pay for essential stewardship activities primarily with power revenues, with the remainder funded with user fees and other forms of revenues derived in connection with those activities. In addition, administrative jurisdiction over LBL was transferred to the Secretary of Agriculture effective October 1, 1999. TVA is responsible for certain transition costs associated with the transfer of LBL, estimated to be approximately \$10 million. This liability was recorded against available nonpower fund balances at September 30, 1999. TVA retains responsibility for management of the remaining nonpower assets and settlement of nonpower obligations.

The completed plant of the nonpower programs consists of multipurpose dams and other plant. At September 30, 1999, the net completed plant balances for multipurpose dams and other plant were \$692 million and \$112 million, respectively. At September 30, 1998, the net completed plant balances for multipurpose dams and other plant were \$698 million and \$115 million, respectively.

## REPORT OF INDEPENDENT ACCOUNTANTS

### To the Board of Directors of the Tennessee Valley Authority

In our opinion, the accompanying balance sheets (power program and all programs) and the related statements of income (power program), changes in proprietary capital (power program and nonpower programs), net expense (nonpower programs) and cash flows (power program and all programs) present fairly, in all material respects, the financial position of the power program and all programs of the Tennessee Valley Authority as of September 30, 1999 and 1998, the results of operations of the power program and nonpower programs and cash flows of the power program and all programs for each of the three years in the period ended September 30, 1999, in conformity with generally accepted accounting principles. These financial statements are the responsibility of the Tennessee Valley Authority's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with generally accepted auditing standards and Government Auditing Standards issued by the Comptroller General of the United States which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for the opinion expressed above.

In accordance with Government Auditing Standards, we have also issued a report, dated October 22, 1999, on our consideration of the Tennessee Valley Authority's internal controls over financial reporting and our tests of compliance with certain provisions of laws, regulations, contracts and grants.

As discussed in note 7 to the financial statements, TVA changed its method for determining the market-related value of pension assets in 1999.

Knoxville, Tennessee  
October 22, 1999

## REPORT OF MANAGEMENT

Management is responsible for the preparation, integrity and objectivity of the financial statements of the Tennessee Valley Authority as well as all other information contained in the annual report. The financial statements have been prepared in conformity with generally accepted accounting principles applied on a consistent basis and, in some cases, reflect amounts based on the best estimates and judgments of management, giving due consideration to materiality. Financial information contained in the annual report is consistent with that in the financial statements.

The Tennessee Valley Authority maintains an adequate system of internal controls to provide reasonable assurance that transactions are executed in accordance with management's authorization, that financial statements are prepared in accordance with generally accepted accounting principles, and that the assets of the corporation are properly safeguarded. The system of internal controls is documented, evaluated, and tested on a continuing basis. No internal control system can provide absolute assurance that errors and irregularities will not occur due to the inherent limitations of the effectiveness of internal controls; however, management strives to maintain a balance, recognizing that the cost of such a system should not exceed the benefits derived. No material internal control weaknesses have been reported to management.

PricewaterhouseCoopers LLP was engaged to audit the financial statements of the Tennessee Valley Authority and issue reports thereon. Its audits were conducted in accordance with generally accepted auditing standards. Such standards require a review of internal controls and an examination of selected transactions and other procedures sufficient to provide reasonable assurance that the financial statements neither are misleading nor contain material errors. The Report of Independent Accountants does not limit the responsibility of management for information contained in the financial statements and elsewhere in the annual report.
